SPIE

**Volume 13133**

Proceedings of SPIE 0277-786X, V. 13133

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical System Alignment, Tolerancing, and Verification XV*, edited by José Sasián, Kenneth R. Castle, Proc. of SPIE 13133, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## VERIFICATION OF SYSTEMS

---

- 13133 03 **Determination of the unique optical axis of assembled lens systems** [13133-2]
- 13133 04 **Display luminance impact on chromaticity error in colorimeter measurements** [13133-3]
- 13133 05 **Quantifying micron-level robotic movement errors using low coherence interferometry** [13133-4]
- 13133 06 **A confocal mount concept for OAPs and other conic mirrors** [13133-5]

---

## ALIGNMENT OF SYSTEMS AND COMPONENTS I

---

- 13133 07 **Calibration and alignment of large zoom lens systems** [13133-6]
- 13133 08 **Efficient numerical method for flat-field correction in complex optical systems with minimal data collection** [13133-8]

---

## TOLERANCING OF SYSTEMS

---

- 13133 0A **Defining and tolerancing freeform surfaces for manufacturing (Invited Paper)** [13133-10]
- 13133 0B **Ultra-stable wide field of regard electronic autocollimator (UWFOREA) and its applications** [13133-11]
- 13133 0C **Atmospheric waves experiment (AWE) advanced mesospheric temperature mapper (AMTM) optical system design, alignment, and image quality verification** [13133-12]
- 13133 0D **Design and development of high-power laser calibration system and alignment at the National Institute of Metrology (NIMT)** [13133-13]

---

## ALIGNMENT OF SYSTEMS AND COMPONENTS II

---

- 13133 0E **TBIRD: a rapid prototyping approach for design, assembly, and test of a LEO-to-ground lasercom CubeSat** [13133-14]

- 13133 OF **Design, integration, and test of the optical telescope assembly for the photometric observations of exoplanet transits (POET) mission** [13133-15]
- 13133 OG **Optical alignment techniques of dichroics and gratings for NASA's plankton aerosol cloud and ocean ecosystem's (PACE) ocean color instrument (OCI)** [13133-16]
- 13133 OH **Image-based iterative piston-tip-tilt alignment for space-based multiaperture imagers using the stochastic parallel gradient descent algorithm** [13133-18]

---

**POSTER SESSION**

---

- 13133 OJ **Alignment of Korsch telescope using laser radar-measured optical axis of aspheric primary mirror** [13133-19]
- 13133 OK **Application of Ronchi test in rapid calibration of long effective focal length collimators** [13133-20]
- 13133 OL **Enhancing collimator calibration precision with sub-pixel resolution using composite periodic patterns** [13133-21]
- 13133 OM **Design methodology and lens centering alignment performance of corrector lens in the FORMOSAT-8 remote sensing satellites program** [13133-22]
