Sponsored and Published by
SPIE

Volume 13134

Proceedings of SPIE 0277-786X, V. 13134

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Manufacturing and Testing 2024*, edited by Daewook Kim, Heejoo Choi, Heidi Ottevaere, Proc. of SPIE 13134, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICAL TESTING I

13134 02 **A dual-detection chromatic confocal probe employing a mode-locked femtosecond laser (Invited Paper)** [13134-1]

13134 03 **Aspherical surface measurement: a cost-effective and fast AI solution** [13134-2]

OPTICAL TESTING II

13134 04 **Evaluating approximate and rigorous scattering models in virtual coherence scanning interferometry for improved surface topography measurement (Invited Paper)** [13134-4]

13134 05 **Absolute distance measurement using individual frequency modes of the electro-optic comb based on multiwavelength interferometry** [13134-5]

13134 06 **Study on phase measurement uncertainty according to the number of phase shifting steps in a multiwavelength interferometer directly using optical comb modes** [13134-6]

OPTICAL TESTING III

13134 07 **Refractive optics metrology using on-axis deflectometry system** [13134-8]

13134 08 **Comprehensive analysis of surfaces featuring functional characteristics by angular-resolved scattering light measurement** [13134-10]

TELESCOPE SYSTEM I

13134 09 **Temporal variability in magnetically actuated deformable mirror surface figure measured via interferometry** [13134-12]

TELESCOPE SYSTEM II

13134 0A **Focus diverse phase retrieval test results on broadband continuous wavefront sensing in space telescope applications** [13134-16]

13134 0B **A hybrid wavefront sensor: combining Shack-Hartmann and pyramid wavefront sensors to enable high dynamic range and sensitivity** [13134-18]

TELESCOPE SYSTEM III

- 13134 0C **Integration of off-axis freeform mirrors KASI deep rolling imaging fast telescope generation 1 (Invited Paper)** [13134-19]
- 13134 0D **UVOIR to far-IR mirror technology development: year 2 status** [13134-21]

TELESCOPE SYSTEM IV

- 13134 0E **Optical alignment of the Roman space telescope's coronagraph instrument (Invited Paper)** [13134-23]
- 13134 0F **Alignment of three mirror anastigmat telescopes using a multilayered stochastic parallel gradient descent algorithm** [13134-22]
- 13134 0G **Big actuated three mirror anastigmat network** [13134-25]

OPTICAL MANUFACTURING I

- 13134 0H **Precision glass molding: towards a cost-efficient production of glass lenses using a multicavity approach** [13134-28]
- 13134 0I **Measurement of mid-spatial frequencies of diamond turned optics by using dual-mode snapshot interferometry** [13134-29]
- 13134 0J **High speed laser-assisted diamond turning of tungsten carbide molds: an alternative to ultra-precision grinding** [13134-30]

OPTICAL MANUFACTURING II

- 13134 0K **Key aspects of sub-nanometer deterministic ion beam figuring for synchrotron hard x-ray mirror fabrication (Invited Paper)** [13134-31]

POSTER SESSION

- 13134 0L **A study on mechanical processing characteristics of Si grating** [13134-37]
- 13134 0M **Design and test of small mirror supports for harsh environments** [13134-40]

DIGITAL POSTER SESSION

- 13134 0N **3D inspection of wire bonding using oblique-illumination optical sectioning microscopy** [13134-42]
