Volume 13136

Proceedings of SPIE 0277-786X, V. 13136

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics and Photonics for Information Processing XVIII*, edited by Khan M. Iftakharuddin, Abdul A. S. Awwal, Victor Hugo Diaz-Ramirez, Andrés Márquez, Proc. of SPIE 13136, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ARTIFICIAL INTELLIGENCE AND ALGORITHMS

- 13136 03 **Automated flood depth estimation on roadways** [13136-1]
- 13136 04 **Multimodal network model with localization and semantic segmentation for morphological identification of sea turtles** [13136-2]
- 13136 06 **An enhanced deep neural networks algorithm for hand segmentation** [13136-5]
- 13136 07 **Identification of sea turtles with graphical convolutional networks and SLIC superpixel segmentation** [13136-6]

PHOTONICS SYSTEMS AND DEVICES FOR INFORMATION PROCESSING

- 13136 0A **Understanding the degrees of freedom of wavefront modulation by liquid crystal on silicon microdisplay with a digital backplane** [13136-9]
- 13136 0C **Estimation of stellar parameters in J-PLUS DR3 through machine learning techniques** [13136-4]

IMAGING SYSTEMS AND AUTONOMOUS NAVIGATION

- 13136 0D **Stereo disparity refinement using genetic optimization** [13136-11]
- 13136 0E **Three-dimensional object texturing for visible-thermal fringe projection profilometers** [13136-12]
- 13136 0F **Binocular vision-based depth estimation in scattering media** [13136-13]
- 13136 0G **Autonomous navigation of aerial vehicles by visual reference** [13136-14]
- 13136 0H **Autonomous mapping and navigation for a holonomic robot in an unknown environment** [13136-15]

ALGORITHMS AND IMAGING

- 13136 OI **Weight adjustment of the quantum layer in a hybrid model for skin cancer image classification** [13136-16]
- 13136 OJ **Multipurpose image colorization: a novel pipeline using convolutional neural networks** [13136-17]
- 13136 OK **A comparative study of facial feature classification methods** [13136-18]
- 13136 OL **Enhancing sea turtle photo identification: a comparative analysis of a self-developed noninvasive automated algorithm versus the manual HotSpotter method** [13136-19]
- 13136 OM **Active thermography strategy in phantom models under magnetic induction: a new perspective for the hyperthermia** [13136-20]

POSTER SESSION

- 13136 ON **Challenges and impact of the grating vector direction in high-frequency LC-SLM binary phase gratings** [13136-22]
- 13136 OO **Enhancing subcellular imaging in muscle: a two-photon microscopy approach for super-resolution insights** [13136-23]
- 13136 OP **Open-source 3D-printed microscope with semiautomated liquid crystal polarizer setups: a new opportunity for detecting small phase retards in oocyte meiotic spindles** [13136-24]
- 13136 OQ **LiDAR-based classification of objects and terrain** [13136-25]
- 13136 OR **Curvature sensor based on structure of Mach-Zehnder interferometer coated with aluminum-doped zinc oxide** [13136-26]
- 13136 OS **Holographic mirror-based approach in augmented reality glasses** [13136-28]
- 13136 OT **Aperture masking imaging using a hybrid algorithm for binary stars with 1.56-m telescope** [13136-29]
- 13136 OU **Role of redundancy in boosting the robustness in image analysis in the automatic alignment system at the National Ignition Facility** [13136-30]
