**Volume 13140**

Proceedings of SPIE 0277-786X, V. 13140

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Fiber and Crystal Devices: Advances in Materials and Innovations in Device Applications XVIII*, edited by Shizhuo Yin, Ruyan Guo, Proc. of SPIE 13140, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: MATERIALS AND PROPERTIES

---

- 13140 02 **Photonic nanocomposite films with plasmonic metal nanoparticles for ultraviolet sensing (Invited Paper)** [13140-1]
- 13140 03 **Optical limiters based on PT-symmetry breaking of reflectionless modes (Invited Paper)** [13140-4]
- 13140 04 **Harnessing exciton-strain interactions in 2D TMDCs for advanced sensing and photodetection** [13140-7]

---

## PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: DEVICES AND APPLICATIONS I

---

- 13140 05 **Fabrication of photopolymers using ethylene glycol phenyl ether acrylate (EGPEA) monomers for holographic storage (Invited Paper)** [13140-8]
- 13140 06 **Inscription of micro/nano structures in functional crystalline materials by femtosecond laser illumination** [13140-9]
- 13140 07 **Growth of multifunctional electro-optic Yb:LiNbO<sub>3</sub> crystalline fibers by laser heated pedestal growth (LHPG) method** [13140-10]

---

## PHOTONIC CRYSTALS, FIBERS, AND THIN FILMS: DEVICES AND APPLICATIONS II

---

- 13140 08 **Holographic properties of H-PDLC transmission volume grating with high spatial frequency for waveguide imaging propagation (Invited Paper)** [13140-13]
- 13140 09 **A study of transmission properties in tapered graded-index fibre** [13140-15]
- 13140 0A **Molten-core fibers with broadband infrared halide materials** [13140-16]
- 13140 0B **The basic properties of holographic polarization variable line-space grating** [13140-17]

**SPECIAL SESSION: VOLUME HOLOGRAPHIC OPTICAL ELEMENTS AND APPLICATIONS TO VR/AR/MR**

---

- 13140 0C **Optimizing image quality using multiplexed gratings and drive signal management in a VHOEs-waveguide-based AR eyewear display** [13140-22]
- 13140 0D **Programmable edge enhancement using volume holographic elements in photorefractive materials (Invited Paper)** [13140-23]
- 13140 0E **Digital volume reflection holography using 3D point cloud and layer method** [13140-24]
- 13140 0F **Impact of shot noise and quantization in a self-interference incoherent digital holography** [13140-26]

**POSTER SESSION**

---

- 13140 0G **Low-temperature synthesis of lithium tantalate powders for single crystal growth** [13140-2]
- 13140 0H **Development of hot-zone structure for LiTaO<sub>3</sub> single crystal growth by simulation** [13140-28]
- 13140 0I **A possibility using azobenzene holographic materials for dynamic holographic applications** [13140-32]
- 13140 0J **Phase-shifting projected fringe profilometry using the phase-wedged encoding algorithm** [13140-33]
- 13140 0K **Fabrications of graded index layers by means of mesoporous silica materials** [13140-34]
- 13140 0L **A signal processing algorithm for coaxial fringe projections in applications of 3D shape measurements** [13140-35]
- 13140 0M **Color performance characteristics of a diffractive light guide using volume holographic optical elements** [13140-36]
- 13140 0N **Phase-shifting projected fringe profilometry for 3D shape measurements of dynamic objects** [13140-37]
