PROCEEDINGS OF SPIE

Third International Conference on Digital Technologies, Optics, and Materials Science (DTIEE 2024)

Khamza Eshankulov
Arthur Gibadullin
Editors

22–24 May 2024
Bukhara, Uzbekistan

Organized by
Bukhara State University (Uzbekistan)
Fergana State University (Uzbekistan)

Published by
SPIE

Volume 13217

Proceedings of SPIE 0277-786X, V. 13217

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Third International Conference on Digital Technologies, Optics, and Materials Science (DTIEE 2024)*, edited by Khamza Eshankulov, Arthur Gibadullin, Proc. of SPIE 13217, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xii *Conference Committee*

OPTICS AND MATERIALS SCIENCE

13217 02 **Increasing the efficiency and speed of the full production cycle of printed antennas using additive technologies** [13217-1]

13217 03 **The influence of vacuum annealing on the strength characteristics of plow shares** [13217-2]

13217 04 **Modeling of the parameters of a fiber-optic refractometric converter** [13217-29]

13217 05 **Effect of laser cladding modes on plastic deformation inhomogeneity of surface hardened stainless steel** [13217-8]

13217 06 **Deformation inhomogeneity of the stainless steel/low carbon steel composite** [13217-9]

13217 07 **Corrosion mechanical strength of TiNi shape memory medical alloy in different corrosive environments** [13217-26]

13217 08 **Information technologies in the development of a technical process for producing metal-polymer coatings in vacuum** [13217-36]

13217 09 **Calculation of ceramic high-entropy alloys systems** [13217-10]

13217 0A **Calculation of soft magnetic high-entropy alloys systems** [13217-11]

13217 0B **Enhancement of tribological properties of tool metal-ceramic materials by high-power ion beams** [13217-16]

13217 0C **Some features of the formation of gas hydrates in solutions of common salt** [13217-46]

13217 0D **Study of the features of formation of gas hydrates in solutions of common salt and calcium chloride** [13217-47]

INFORMATION TECHNOLOGY

13217 0E **Design of SCMA codebooks based on APSK constellations for Rayleigh fading channels** [13217-4]

13217 0F **Development of mathematical models for nonlinear nonstationary random processes** [13217-13]

13217 0G **Detecting anomalies in forest input data in a supply chain system using machine learning** [13217-14]

13217 0H **Grid approximation in the problems of synthesis of UAV control systems** [13217-17]

13217 0I **Development of an emotion and age recognition model based on the combination of local binary patterns and squeeze-and-excitation block method** [13217-44]

13217 0J **Simulation modeling as a decision support system tool for improving the environmental safety of road transport** [13217-21]

13217 0K **Creating indoor space model based on single RGB image with the segmentation of surface free to move** [13217-22]

13217 0L **Basic minimum stack of experiments in time series forecasting with ARIMA model** [13217-23]

13217 0M **Features of modelling in automation for the primary oil refining technological process** [13217-25]

13217 0N **Estimating the state of electrical equipment using fuzzy logic** [13217-27]

13217 0O **An experimental study of the prospects for monitoring the woody vegetation state in the near-infrared range** [13217-28]

13217 0P **Experimental studies of a method for detecting oil pollution on the Earth's surface in the near-infrared range** [13217-31]

13217 0Q **Algorithm for converting an image into a quantum state** [13217-32]

13217 0R **Quantum methods of image analysis and processing in the frequency domain** [13217-33]

13217 0S **Decision support in a smart greenhouse using large language model with retrieval augmented generation** [13217-3]

13217 0T **An improved device for automated control of mass transfer processes used in distillation units** [13217-6]

13217 0U **Creation of input data sets when constructing neural network models** [13217-34]

13217 0V **Screw thread quality control using machine vision** [13217-35]

13217 0W **Estimating the level of urbanization based on machine learning** [13217-37]

13217 0X **Using decision tree-based classification rules to improve land device measurement accuracy at a railway marshaling yard** [13217-38]

13217 0Y **Entropy-based detection of synchronization of pulse oscillators: a comparative analysis of entropic measures** [13217-39]

13217 0Z **Development of a mathematical model of modem reception in an information transmission system** [13217-40]

13217 10 **Developing an object-oriented model database of the smart library of the works of medieval scientists of Uzbekistan** [13217-41]

13217 11 **Creation of a software tool for monitoring and forecasting the process of transport and diffusion of harmful substances in the atmosphere** [13217-42]

13217 12 **Solving complex problems of mixed-binary bounded optimization based on quantum algorithms** [13217-43]

13217 13 **Determining the route and roadway condition in front of autonomous vehicle** [13217-45]

13217 14 **Synthesis of an adaptive digital system for modal control of a dynamic plant** [13217-7]

13217 15 **Modeling of geomagnetic SuperMAG electrojet index by neural networks** [13217-20]
