

PROCEEDINGS OF SPIE

2024 AI Photonics Technology Symposium

Xiang Zhang
Editor

16–17 May 2024
Wuhan, China

Organized by
Shanghai Ephoton Optoelectronics Technology Company, Ltd. (China)
Tsinghua University (China)
Hunan Normal University (China)
Huazhong University of Science and Technology (China)
Wuhan University (China)

Volume 13227

Proceedings of SPIE 0277-786X, V. 13227

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2024 AI Photonics Technology Symposium*, edited by Xiang Zhang, Proc. of SPIE 13227, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

2024 AI PHOTONICS TECHNOLOGY SYMPOSIUM

- 13227 01 **On-chip optical frequency comb-based wireless terahertz interconnect system for data centers** [13227-1]
- 13227 02 **Locally weighted model spectral reflectance reconstruction based on LED multi-illuminant** [13227-2]
- 13227 03 **Combining global gate axial-attention with U-Net for skin lesion segmentation** [13227-3]
- 13227 04 **Helicity-gradient force on chiral multipoles induced by optical vortex** [13227-6]
- 13227 05 **High-order phase-shifted Bragg grating waveguide sensor for ultrasound detection** [13227-7]
- 13227 06 **Denoising reconstruction of Raman spectra based on wavelet transform and weighted Wiener estimation** [13227-9]
- 13227 07 **Patch-based dual-channel weighted image color constancy network** [13227-13]
- 13227 08 **Multispectral imaging light estimation based on convolutional neural networks** [13227-14]
- 13227 09 **Predicting the vector optical soliton propagation in birefringent fibers via EMPINN** [13227-15]
- 13227 0A **Lithium niobate-based optically transparent transducer for broadband ultrasound transceiving** [13227-16]
