

PROCEEDINGS OF SPIE

***Fifth International Conference
on Computer Communication
and Network Security (CCNS 2024)***

**Zhaolong Ning
Zhiyong Xiong**
Editors

**17–19 May 2024
Kunming, China**

*Organized by
Guangdong Polytechnic Normal University (China)*

*Sponsored by
South China University of Technology (China)
Chongqing University of Posts and Telecommunications (China)
AEIC Academic Exchange Information Centre (China)*

*Published by
SPIE*

Volume 13228

Proceedings of SPIE 0277-786X, V. 13228

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Computer Communication and Network Security (CCNS 2024)*, edited by Zhaolong Ning, Zhiyong Xiong, Proc. of SPIE 13228, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510681842

Publication of record for individual papers is online in the SPIE Digital Library.

**SPIE. DIGITAL
LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

COMPUTER COMMUNICATION AND NETWORK SENSING APPLICATION

- 13228 02 **Research on control flow integrity for RISC-V** [13228-74]
- 13228 03 **Based on FPGA 3D force sensor data acquisition system design** [13228-66]
- 13228 04 **Research on BERT-based deep multilayer fusion Chinese short text classification method** [13228-41]
- 13228 05 **Research on preliminary application of 5G technology in the low-voltage station area of new power system** [13228-75]
- 13228 06 **Regular expression implementation: a comprehensive review from software algorithms to hardware acceleration** [13228-49]
- 13228 07 **Research on fusion algorithm based for multimodal sensor** [13228-25]
- 13228 08 **Constraint solver selection based on the transformer model** [13228-88]
- 13228 09 **Fuzzing guided by program state** [13228-65]
- 13228 0A **Application of BeiDou-3 data transmission technology on the buoy light at sea** [13228-24]
- 13228 0B **An improved LEACH-FV protocol for communication networking during offshore operations of small fishing vessels** [13228-3]
- 13228 0C **Low-complexity equalization algorithm for orthogonal time frequency space based on iterative enhancement** [13228-73]
- 13228 0D **Dynamic polarization control optimization algorithm for quantum system in atmospheric channels** [13228-39]
- 13228 0E **Research on WSN routing optimization based on improved ant colony algorithm** [13228-82]
- 13228 0F **Reliability evaluation method of communication equipment in digital main distribution network** [13228-58]
- 13228 0G **A method for improving data processing efficiency of operators based on 5G edge computing technology** [13228-13]
- 13228 0H **Design of UAV onboard 5G intelligent terminal** [13228-76]
- 13228 0I **Design and optimization of natural routing system based on mobile internet of things** [13228-83]

- 13228 OJ **A flexible and dynamic partition storage scheme based on key-value separation** [13228-16]
- 13228 OK **Fingerprint-Geo: IPv6 geolocation through path fingerprint** [13228-27]
- 13228 OL **FastJett: asynchronous BFT protocol for variable bandwidth system** [13228-26]
- 13228 OM **FAST star selection algorithm based on BDS/GPS combination** [13228-7]
- 13228 ON **A computer network communication data encryption method based on improved MD5 algorithm** [13228-12]
- 13228 OO **City-level IPv6 geolocation algorithm based on self-attention-driven router sequence learning** [13228-85]
- 13228 OP **AI-driven analysis of information dissemination dynamics in online social networks** [13228-68]

INTELLIGENT DETECTION ALGORITHMS AND DATA ANALYSIS

- 13228 OQ **Research on the object detection algorithm with modified YOLOv7 for autonomous driving applications** [13228-60]
- 13228 OR **Design and implementation of an anti-cheating system for exams** [13228-17]
- 13228 OS **Improved YOLOv8-based surface defect detection algorithm for aluminum profile** [13228-54]
- 13228 OT **Hierarchical detection of unsafe conditions in banks based on YOLOv8** [13228-4]
- 13228 OU **Attribute graph node anomaly detection based on training strategy optimization** [13228-2]
- 13228 OV **Distributed data storage auditing scheme in fog computing environment** [13228-50]
- 13228 OW **Generating syntactically and semantically valid test cases for fuzzing JavaScript engines** [13228-70]
- 13228 OX **Structural block process model mining method under incomplete logs** [13228-34]
- 13228 OY **Improving infrared road object detection with YOLOv8** [13228-31]
- 13228 OZ **Symbolic execution search strategy based on Katz centrality analysis** [13228-89]
- 13228 10 **Fuzzing guided by context-sensitive branch coverage** [13228-71]
- 13228 11 **Few-shot rumor detection based on prompt learning and meta learning** [13228-77]
- 13228 12 **ABC-DE hybrid evolutionary algorithm based on individual preference population selection** [13228-29]

- 13228 13 **Research progress and prospects of deep reinforcement learning in the field of mobile edge computing** [13228-48]
- 13228 14 **Machine-learning-based adaptive keyboard sound masking against acoustic channel attacks** [13228-51]
- 13228 15 **Research on traffic sign detection method based on FLB-YOLOv8** [13228-35]
- 13228 16 **Oblivious dynamic cross-tags scheme with conjunctive query based on hash subset membership check** [13228-46]
- 13228 17 **A hybrid algorithm based on ABC algorithm and its application in Hpcf pump fuzzy control** [13228-14]
- 13228 18 **IP geographical location range inference method based on router location estimation** [13228-21]
- 13228 19 **Approach to constructing student portrait based on multilevel labeling system** [13228-15]
- 13228 1A **Improved YOLOv8-based surface defect detection algorithm for bare printed circuit board** [13228-28]
- 13228 1B **Uninterruptible IMS: maintaining the registration and call services during signaling storm in IP multimedia subsystem** [13228-23]
- 13228 1C **A latent fault diagnosis method for GIS equipment based on multicomponent data fusion** [13228-55]
- 13228 1D **Inverse multiserver parallel outsourcing computing scheme based on three-step decomposition matrix** [13228-79]

NETWORK SECURITY AND ADVANCED DEFENSE TECHNOLOGY

- 13228 1E **Mitigating transient execution attacks: enhancing security through branch predictor defense strategies** [13228-80]
- 13228 1F **Research on the design of network security system for natural resources big data platform based on zero-trust architecture** [13228-81]
- 13228 1G **Analysis of the current state of network security alert management and recommendations** [13228-52]
- 13228 1H **Design and simulation experiments of the security model for edge devices of government terminal networks** [13228-11]
- 13228 1I **A technique to locate control-flow hijacking point for vulnerability exploitation based on jump-oriented features** [13228-20]
- 13228 1J **A password management scheme considering multinetwork interaction** [13228-38]

- 13228 1K **Fuzzing for redundancy elimination vulnerabilities in just-in-time JavaScript engines** [13228-67]
- 13228 1L **GBERT: a hybrid BERT and GRU model for enhanced encrypted traffic classification** [13228-40]
- 13228 1M **Blockchain transaction data privacy protection scheme** [13228-37]
- 13228 1N **The study of network intrusion detection based on cnn-gru-twd** [13228-53]
- 13228 1O **A trusted metric-based security protection scheme for wireless sensor networks** [13228-18]
- 13228 1P **Intrusion detection model based on ensemble learning in big data network** [13228-87]
- 13228 1Q **Detecting collusive fake reviews using heterogeneous graph attention networks** [13228-44]
- 13228 1R **Security identification of abnormal access to network databases based on GSA-SVM algorithm and deep features** [13228-56]
- 13228 1S **Enhancing data leakage tracing: a novel digital watermarking method for document files** [13228-78]
- 13228 1T **A highly reliable IPOE authentication method** [13228-36]
- 13228 1U **Design of comprehensive operation and maintenance system for security command vehicles** [13228-22]
- 13228 1V **Design and implementation of a security system algorithm based on the combination of improved AES and SHA-512** [13228-19]
- 13228 1W **Self-organizing mechanism for service mesh proxy based on NDN** [13228-9]
- 13228 1X **ET-MobileNet: a lightweight encryption traffic classification method** [13228-42]
- 13228 1Y **A homomorphic encryption-based leakage prevention method for cross-domain circulation of sensitive network data** [13228-59]
- 13228 1Z **Achieving efficient and secure keyword attribute community search on cloud servers** [13228-47]
- 13228 20 **A semi-honest three-party secure and efficient neural network privacy-preserving inference framework** [13228-33]
- 13228 21 **Secure identity authentication scheme design leveraging zero-knowledge proof technology** [13228-6]
- 13228 22 **A malicious encrypted traffic detection method based on hybrid feature selection** [13228-84]
