2024 International Conference on Artificial Intelligence and Power Systems (AIPS) **AIPS 2024**

Table of Contents

Preface	xxiii
Conference Committee	xxiv

Electromechanical Equipment Simulation and Artificial Intelligence Monitoring

Optimal Configuration Method of Harmonic Measuring Devices in Distribution Network Based on Power Big Data and Fuzzy Matching Algorithm	1
<i>Yue Zhang (Digital Business Unit of State Grid Inner Mongolia East Electric Power Co., Ltd, China)</i>	
Whale Optimization Algorithm Enhanced Multi-Layer Perceptron for Switch Cabinet Fault Diagnosis	5
<i>Quan Shi (Guangdong Yuedianke Testing Technology Co., Ltd., China), Wang Ran (Guangdong Yuedianke Testing Technology Co., Ltd., China), Ming Fu (Guangdong Yuedianke Testing Technology Co., Ltd., China), Dong Fu (Guangdong Yuedianke Testing Technology Co., Ltd., China), and Wenjie Xu (Guangdong Yuedianke Testing Technology Co., Ltd., China)</i>	
Design of Programmable Logic Controller Remote Monitoring System Based on Industrial Internet	11
<i>Liping Liu (Qingdao Institute of Technology, China) and Hongfeng Qi (Qingdao Institute of Technology, China)</i>	
Research on Temperature Control of Cold Storage Based on bp Neural Network PID Control	15
<i>Mei Xue (Shandong Institute of Commerce and Technology, China)</i>	
Detection Technology of Switch Status Lights in Distribution Cabinets Based on Improved Detection Transformer	19
<i>Yi Li (Shenzhen Power Supply Co., Ltd.), Wenpeng Li (Shenzhen Power Supply Co., Ltd.), Yun Zheng (Shenzhen Power Supply Co., Ltd.), Xiaoting Zhuang (Shenzhen Power Supply Co., Ltd.), Guangyu Shi (Shenzhen Power Supply Co., Ltd.), and Wei Huang (Shenzhen Power Supply Co., Ltd.)</i>	

Knowledge Graph Construction for Secondary Equipment Fault Diagnosis Based on Graph Attention	24
<i>Juntao Mu (State Grid Qinghai Electric Company Limited, China), Shengcheng Song (State Grid Qinghai Electric Company Limited, China), Lijuan Ye (State Grid Qinghai Electric Company Limited, China), Yulin Shi (State Grid Qinghai Electric Company Limited, China), Wei Zhou (State Grid Qinghai Electric Company Limited, China), Bin Chen (XJ Electric Co. Ltd., China), and Yongkang Yang (Zhengzhou University, China)</i>	
Transmission Line Engineering Disturbance Recognition Technology Based on Internet of Things Perception and Artificial Intelligence Technology	28
<i>Jia Feng (State Grid Zhejiang Electric Power Co. Ltd., China), Bin Chen (State Grid Zhejiang Electric Power Co. Ltd., China), Fei Liu (State Grid Zhejiang Electric Power Co. Ltd., China), Qingdong Liu (State Grid Zhejiang Electric Power Co. Ltd., China), Yuanping Shi (Unisplendour Software System Co. Ltd., China), and Lijuan Xu (Unisplendour Software System Co. Ltd., China)</i>	
A Method for Detecting Insulation Defects in Cable Terminals Based on Meteorological Information	32
<i>Yipeng Yan (State Grid Shanghai Electric Power Company Qingpu Power Supply Company, China), Meng Jiang (State Grid Shanghai Electric Power Company Qingpu Power Supply Company, China), Xiaofeng Shen (State Grid Shanghai Electric Power Company Qingpu Power Supply Company, China), Qi Fang (State Grid Shanghai Electric Power Company Qingpu Power Supply Company, China), Shuxin Zhang (State Grid Shanghai Electric Power Company Qingpu Power Supply Company, China), Anan Ni (State Grid Shanghai Electric Power Company Qingpu Power Supply Company, China), and Runping He (Ningbo Dehong Enterprise Development Co., Ltd, China)</i>	
UAV Formation Control Based on Event-Triggered Active Disturbance Rejection Algorithm	36
<i>Feng Zhang (Chongqing University of Posts and Telecommunications, China)</i>	
Research on Industrial Electric Energy Substitution Potential Value Based on Machine Learning	40
<i>Zhukui Tan (Institute of Electric Power Science of Guizhou Power Grid Co., Ltd., China), Yun Zhao (CSG Electric Power Research Institute Co., Ltd., China), Dunhui Chen (Institute of Electric Power Science of Guizhou Power Grid Co., Ltd., China), Ziwen Cai (CSG Electric Power Research Institute Co., Ltd., China), Qihui Feng (Institute of Electric Power Science of Guizhou Power Grid Co., Ltd., China), and Yuxin Lu (CSG Electric Power Research Institute Co., Ltd., China)</i>	
Heat Dissipation Model and Simulation of Piezoelectric Transformer	45
<i>Yuzhi Gao (Anhui University, China), Chao Gao (Anhui University, China), De Du (Anhui University, China), and Bin Ju (Anhui University, China)</i>	
Great Lakes Water Level Controller Based on MPC Control Algorithm	49
<i>Ziyang Zhang (Nanjing University of Technology, China), Hanbing Zhou (Nanjing University of Technology, China), and Guoyu Yang (Nanjing University of Technology, China)</i>	

The Power Equipment Detection Method Based on the Dual-Stream Network with Vision Transformer	53
<i>Qian Ding (China Southern Power Grid Ultra High Voltage Transmission Company Liuzhou Bureau, China), Min Huang (South China University of Technology, China), Wuzhi Yang (China Southern Power Grid Ultra High Voltage Transmission Company Liuzhou Bureau, China), Liangbin Fang (China Southern Power Grid Ultra High Voltage Transmission Company Liuzhou Bureau, China), Diqiu Shen (China Southern Power Grid Ultra High Voltage Transmission Company Liuzhou Bureau, China), Zonglv Qin (China Southern Power Grid Ultra High Voltage Transmission Company Liuzhou Bureau, China), Pengcheng Xue (China Southern Power Grid Ultra High Voltage Transmission Company Liuzhou Bureau, China), and Liuqi Zhao (CSG EHV Power Transmission Company, China)</i>	
Enhancing Circuit Breaker Fault Detection with Data-Augmented SVD-XGBoost Methodology	57
<i>Chunping Liu (Yanbian Power Supply Company Jilin Electric Power Co. Ltd, China), Qiang Yao (Yanbian Power Supply Company Jilin Electric Power Co. Ltd, China), Jianbo Fang (Yanbian Power Supply Company Jilin Electric Power Co. Ltd, China), Zhenwei Xie (Yanbian Power Supply Company Jilin Electric Power Co. Ltd, China), Wei Yang (Yanbian Power Supply Company Jilin Electric Power Co. Ltd, China), and Chao Ma (Yanbian Power Supply Company Jilin Electric Power Co. Ltd, China)</i>	
Privacy-Preserving Multi-Agent Time-Varying Formation Control Under Multi-Rate Sampling Mechanism	62
<i>Jiqing Luo (Army Engineering University of PLA), Husheng Fang (Army Engineering University of PLA), Jing Zhang (Army Engineering University of PLA), and Shengli Song (Army Engineering University of PLA)</i>	
Design of Sewage Treatment Automatic Control System Based on DCS	68
<i>Feiyu Long (Jiangsu University of Science and Technology, China), Yun Yao (Jiangsu University of Science and Technology, China), and Jie He (Jiangsu University of Science and Technology, China)</i>	
Research on Human-Computer Interaction Interface Design Based on User Experience	73
<i>Xuefei Yang (North China University of Science and Technology, China), Weihao Zeng (Dalian University of Technology, China), Yi Zhang (North China University of Science and Technology, China), Ruyun Zhu (North China University of Science and Technology, China), Zihao Ren (North China University of Science and Technology, China), and Zhitao Yu (China Academy of Art, China)</i>	

Analysis of a New Method for Evaluating Lightning Trip-out Fault Rate in Active Distribution Networks	78
<i>Henglong Chen (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Chang Li (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Juan Bai (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Yu Zou (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Zhidu Huang (Electric Power Research Institute of Guangxi Power Grid Co., Ltd, China; Guangxi Key Laboratory of Intelligent Control and Maintenance of Power Equipment, China), Honghuai Mo (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Deyin Wang (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Junming Liao (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), Zhenjun Xie (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China), and Ming Wang (Qinzhou Power Supply Bureau of Guangxi Power Grid Co., Ltd, China)</i>	
Intelligent Detection of Insulator Defects on Transmission Lines in Complex Backgrounds Based on Improved DETR Visual Perception Model	83
<i>Songping Tang (Huizhou PowerSupply Bureau of Guangdong Power Grid Co., Ltd, China), Rui Feng Zhu (Huizhou PowerSupply Bureau of Guangdong Power Grid Co., Ltd, China), Chao Ji (Xi'An Polytechnic University, China), Chong Li (Huizhou PowerSupply Bureau of Guangdong Power Grid Co., Ltd, China), Yuxi Dong (Huizhou PowerSupply Bureau of Guangdong Power Grid Co., Ltd, China), Yun Zhang (Huizhou PowerSupply Bureau of Guangdong Power Grid Co., Ltd, China), and Junpeng Liu (Xi'An Polytechnic University, China)</i>	
Path-Following of Under-Actuated Ships Based on Nonsingular Fast Terminal Sliding Mode	90
<i>Yuzhang Jiao (Dalian Maritime University, China), Renxiang Bu (Dalian Maritime University, China), and Mingxin Chen (Dalian Maritime University, China)</i>	
Android Malware Detection Method Based on Graph Convolutional Networks	95
<i>Qingling Xu (Qilu University of Technology, China; Shandong Fundamental Research Center for Computer Science, China), Shumian Yang (Qilu University of Technology, China; Shandong Fundamental Research Center for Computer Science, China), Lijuan Xu (Qilu University of Technology, China; Shandong Fundamental Research Center for Computer Science, China), and Dawei Zhao (Qilu University of Technology, China; Shandong Fundamental Research Center for Computer Science, China)</i>	
Research on Three-Phase Three-Level Rectifier Control Based on Fuzzy PI Algorithm	99
<i>Siyang Du (Shanghai Maritime University, China) and Yi Guo (Shanghai Maritime University, China)</i>	
Intelligent Opening and Closing Control Method for Large Hydropower Stations Based on Time-Frequency Feature Subset	104
<i>Zhanguo He (Power-China Huadong Engineering Corporation Limited), Qinyu Mao (Power-China Huadong Engineering Corporation Limited), and Chengjia Huang (Power-China Huadong Engineering Corporation Limited)</i>	
A Virtual Synchronous Machine Fault Smooth Transition Strategy	108
<i>Longfei Mu (Shandong University, China)</i>	

Fault Diagnosis of Chiller Based on ALSTM-FCN	112
<i>Xuejin Gao (Beijing University of Technology, China; Engineering Research Center of Ministry of Education, China; Beijing Laboratory of Association of Metros, China; Beijing Key Laboratory of Computational Intelligence and Intelligent Systems, China), Yiwei Jiang (Beijing University of Technology, China; Engineering Research Center of Ministry of Education, China; Beijing Laboratory of Association of Metros, China; Beijing Key Laboratory of Computational Intelligence and Intelligent Systems, China), and Huayun Han (Beijing University of Technology, China; Engineering Research Center of Ministry of Education, China; Beijing Laboratory of Association of Metros, China; Beijing Key Laboratory of Computational Intelligence and Intelligent Systems, China)</i>	
Apparent Temperature Modeling for Smart Home Using Kolmogorov-Arnold Network	116
<i>Xingjia Li (Shanghai Liangxin Electrical Co., Ltd, China), Chenghu Zhou (Shanghai Liangxin Electrical Co., Ltd, China), Yu Zuo (Jiangsu university, China), Jinan Gu (Jiangsu university, China), Longsheng Yang (Shanghai Liangxin Electrical Co., Ltd, China), and Yali Xie (Shanghai Liangxin Electrical Co., Ltd, China)</i>	
Fault Diagnosis Method of Draught Fan Bearing Based on EMD and MCKD	120
<i>Xinyu Yang (Shenyang Polytechnic University, China), Hui Jiang (Shenyang Skyeye Intelligence Cloud Information and Technology Co., Ltd., China), Lupeng Qiu (Shenyang Polytechnic University, China), and Zheng Li (Shenyang Polytechnic University, China)</i>	
Control Strategy for Storage Primary Frequency Modulation Taking into Account SOC and Frequency Characteristics	124
<i>Peng Zhang (Shanghai Dianji University, China) and Xiaohong Zhang (Shanghai Dianji University, China)</i>	
A Hierarchical Decision Framework for Transformer Fault Diagnosis Based on Support Vector Machine	130
<i>Jiahui Gu (Southeast University, China)</i>	

Intelligent Algorithm Modeling and Electronic Information Analysis

On-Load Tap-Changer Online Monitoring Research Based on the K-Means Algorithm	136
<i>Guowei Zhou (EHV Branch company of state grid Zhejiang Electric Power CO., LTD, China), Chenguang Peng (EHV Branch company of state grid Zhejiang Electric Power CO., LTD, China), Lang Peng (China Agricultural University, China), Rongrong Ji (EHV Branch company of state grid Zhejiang Electric Power CO., LTD, China), and Xin Chen (EHV Branch company of state grid Zhejiang Electric Power CO., LTD, China)</i>	
Research on Multi-Substation-Information Synchronization Scheme Based on Wavelet Transform..	140
<i>Baojiang Tian (State Grid Henan Electric Power Company Power Dispatching Control Center, China), Yan Li (State Grid Henan Electric Power Company Power Dispatching Control Center, China), Xingwei Du (State Grid Henan Electric Power Company Power Dispatching Control Center, China), Xiaoyu Liao (State Grid Henan Electric Power Company Power Dispatching Control Center, China), and Wenyan Duan (State Grid Henan Electric Power Company Electric Power Science Research Institute, China)</i>	

Deep Learning Strategies for Improving Machine Translation Effectiveness	144
<i>Lantian Wei (Northwest Minzu University, China)</i>	
Point Cloud Object Classification Based on Dynamic Relation Shape Convolution	148
<i>Zhiheng Geng (Hubei University of Technology, China)</i>	
Research on Multiple Hybrid Characters Based on CTC Algorithm	152
<i>Jie Liu (Beijing DianKeZhiXin Technology Co. LTD, China), Shuai Wang (Beijing DianKeZhiXin Technology Co. LTD, China), Fei Peng (Beijing DianKeZhiXin Technology Co. LTD, China), Zhixin Wu (Beijing DianKeZhiXin Technology Co. LTD, China), Peidong He (State Grid Sichuan Electric Power Company Marketing Service Center, China), and Xiaojun Li (State Grid Sichuan Electric Power Company Marketing Service Center, China)</i>	
Deep Graph Matching with Improved Graph-Context Networks Based by Attention	156
<i>Shuowei Wang (Sciences University of Electronic Science and Technology of China, China), Sifan Ding (Sciences University of Electronic Science and Technology of China, China), and William Zhu (Sciences University of Electronic Science and Technology of China, China)</i>	
Research on the Construction Method of Power User Behavior Portrait Based on Big Data Analysis	161
<i>Bingbing Qiu (State Grid Liaoning Electric Power Research Institute, China), Bin Zhang (State Grid Liaoning Electric Power Research Institute, China), Jingjing Li (State Grid Liaoning Electric Power Research Institute, China), and Heyang Sun (State Grid Liaoning Electric Power Research Institute, China)</i>	
Unmanned Aerial Vehicle Trajectory Optimization Algorithm Based on Safe Flight Corridors	166
<i>Ying Huang (Wuhan University of Technology, China), Zhou Wang (SAIC GM Wuling Automobile Company Limited, China), and Juncheng Lv (SAIC GM Wuling Automobile Company Limited, China)</i>	
Improved UKF Algorithm Based on Fractional Order Model for SOC Estimation	169
<i>Wenhao Zhang (Shandong Qilu University of Technology), Chao Li (Shandong Qilu University of Technology), Dongdong Hou (Qilu University of Technology), and Yunhai Zhu (Qilu University of Technology)</i>	
A Distributed Storage Data Processing Method for Substation 3D Modeling	173
<i>Qifeng Luo (Zhongshan Power Supply Bureau of Guangdong Power Grid Co., Ltd, China), Wentao Liu (Zhongshan Power Supply Bureau of Guangdong Power Grid Co., Ltd, China), Lei Liu (Zhongshan Power Supply Bureau of Guangdong Power Grid Co., Ltd, China), and Yingying Tan (Zhongshan Power Supply Bureau of Guangdong Power Grid Co., Ltd, China)</i>	
A Data-Model Cycle-Driven Data Anomaly Detection Method Based on Microgrid Point of Common Coupling	177
<i>Jianbin Li (State Grid Hebei Electric Power Co., Ltd., China), Yonglu Han (State Grid Hebei Electric Power Co., Ltd., China), and ZiLong Yin (Hunan Qinggu Technology Co., Ltd, China)</i>	
Comparison and Application Research of Unsupervised Anomaly Detection Algorithms	182
<i>Jincheng Li (Zhuhai College of Science and Technology, China), Simin Fan (Zhuhai College of Science and Technology, China), and Xiang Li (Zhuhai College of Science and Technology, China)</i>	

An Efficient and Low-Data Migration Method for Recycling Block's Selection of SSD	189
<i>Chenyuan Wang (Shandong Yunhai Guochuang Cloud Computing Equipment Industry Innovation CO., Ltd, China), Meizhou Gao (Shan Dong Sinochip Semiconductors CO., Ltd, China), Peng Guo (Shan Dong Sinochip Semiconductors CO., Ltd, China), Dapeng Sun (Shan Dong Sinochip Semiconductors CO., Ltd, China), Fengzhi Fu (Shandong Yunhai Guochuang Cloud Computing Equipment Industry Innovation CO., Ltd, China), Minzhai Liu (Shan Dong Sinochip Semiconductors CO., Ltd, China), and Tai Guo (Shan Dong Sinochip Semiconductors CO., Ltd, China)</i>	
NURBS Curve Fitting Based on ACO Algorithm for Solving Optimal Control Vertices	197
<i>Liqin Miao (Changchun ResearchInstitute of Equipment and Technology, China; Changchun University of Science and Technology, China), Chaoneng Liao (Changchun University of Science and Technology, China), Dashun Zhang (Changchun ResearchInstitute of Equipment and Technology, China), Huaidan Liang (Changchun University of Science and Technology, China), and Jing Wang (Changchun ResearchInstitute of Equipment and Technology, China)</i>	
Implementation Method and Code Reuse and Maintenance Mechanism of a RISC-V Lightweight Code Library	203
<i>Jian Xu (Wuxi Micro integrated circuit design Company Ltd, China), Jingbo Huang (Wuxi Micro integrated circuit design Company Ltd, China), Yanfeng Yang (Wuxi Research Institute of Applied Technologies Tsinghua University, China), and Qiaoyin Yang (Wuxi Research Institute of Applied Technologies Tsinghua University, China)</i>	
Automated Model of Cloud Resource Acquisition Data Based on AI Prediction	216
<i>Weiming Tao (Anhui Electrical Engineering Professional Technique College, China)</i>	
Research on Data Classification Algorithm of Unstructured Government Information Based on Improved Graph Neural Network	220
<i>Shengyang Wei (Soochow University, China) and Shuoyan Han (Soochow University, China)</i>	
Algorithm for Extracting Time Series of Feature Points of Fingerprint Images of Disconnecting Switch Tap-Changing Contactors	228
<i>Shu'an Liu (Dongguan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), Hong Liu (Dongguan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), Weijian Lai (Dongguan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), Songlin Luo (Dongguan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), and Jiahui Chen (Dongguan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China)</i>	
LEO Satellite Routing Method Based on Dynamic A-Star Algorithm	233
<i>Zhenyu Niu (Academy of Military Sciences, China), Yongqiang Xie (Academy of Military Sciences, China), Zhongbo Li (Academy of Military Sciences, China), and Juan Fu (Academy of Military Sciences, China)</i>	
Improved YOLOv7 Algorithm for Drone Image Object Detection	238
<i>Changquan Hu (Nanchang Hangkong University, China) and Yun Ge (Nanchang Hangkong University, China)</i>	
Research on Speech Recognition Methods with Emotional Description	243
<i>Yingjie Qi (Xinjiang University, China)</i>	

Enhancing Large Model Document Question Answering Through Retrieval Augmentation	249
<i>Jingwen Zeng (State Grid Information & Telecommunication Branch, China), Rongrong Zheng (State Grid Information & Telecommunication Branch, China), Chenhui Wang (State Grid Information & Telecommunication Branch, China), Wenting Xue (State Grid Information & Telecommunication Branch, China), Xiaoyang Yu (State Grid Information & Telecommunication Branch, China), and Tao Zhang (State Grid Sgitg Digital Technology(Beijing) Co., Ltd, China)</i>	
Research on Security Monitoring Data Platform Based on Big Data Technology	254
<i>Jiale Liu (PowerChina Northwest Engineering Corporation Limited, China; Xi'an Key Laboratory of Clean Energy Digital Technology, China), Yuan Liu (PowerChina Northwest Engineering Corporation Limited, China; Xi'an Key Laboratory of Clean Energy Digital Technology, China), Yong He (PowerChina Northwest Engineering Corporation Limited, China; Xi'an Key Laboratory of Clean Energy Digital Technology, China), and Dongjie Wu (PowerChina Northwest Engineering Corporation Limited, China; Xi'an Key Laboratory of Clean Energy Digital Technology, China)</i>	
A Deep Convolutional Self-Encoder-Based Algorithm for Bilateral Integration of Unstructured Data in Electrical Distribution Engineering	258
<i>Haifeng Tian (Economic and Technological Research Institute of State Grid Qinghai Electric Power Company, China), Duojie Caihai (Economic and Technological Research Institute of State Grid Qinghai Electric Power Company, China), Lantao Wang (Economic and Technological Research Institute of State Grid Qinghai Electric Power Company, China), Taimin Zhao (Economic and Technological Research Institute of State Grid Qinghai Electric Power Company, China), Congyuan Zhao (Economic and Technological Research Institute of State Grid Qinghai Electric Power Company, China), and Shengyan Zhao (Economic and Technological Research Institute of State Grid Qinghai Electric Power Company, China)</i>	
Multi-Module Model Refinement for Real-Time Object Detection	262
<i>Kejian Xu (Guilin University of Electronic Technology, China), Jinglong Chen (Guilin University of Electronic Technology, China), and Yi Ning (Guilin University of Electronic Technology, China)</i>	
A Security Encryption Algorithm for Transmission Line Monitoring Images	268
<i>Zhiguang Chu (Guohua Energy Investment Company, China), Haibin Meng (Guohua Energy Investment Company, China), Xingquan Zhao (Guohua Energy Investment Company, China), Dejun Liu (Guohua Energy Investment Company, China), and Hao Zhang (Guohua Energy Investment Company, China)</i>	
Influence Identification Method of Complex Network Nodes Based on Local and Global Structure	275
<i>Maolin Bian (Lanzhou Jiaotong University, China; Key Laboratory of Media Convergence Technology and Communication of Gansu Province, China), Guanghui Yan (Lanzhou Jiaotong University, China; Key Laboratory of Media Convergence Technology and Communication of Gansu Province, China), and Wenwen Chang (Lanzhou Jiaotong University, China; Key Laboratory of Media Convergence Technology and Communication of Gansu Province, China)</i>	

Optimize the Edge Detection Algorithm of Canny Operator Threshold Selection	280
<i>Yuan Gao (State Grid Corporation of China Henan Electric Power Company Boai County Power Supply Company, P.R. China; Lanzhou Jiaotong University, China) and Fengyang Gao (Lanzhou Jiaotong University, China)</i>	
Research on the Application of Wensheng Large Video Model in Information Science	288
<i>Yanan Di (High-tech Institute, China), Mingyan Zhao (High-tech Institute, China), and Xun Wang (High-tech Institute, China)</i>	
Application of Six-Axis Fusion Posture Solving Method Based on Kalman Filter for IMU	293
<i>Shaochen Li (Shenyang Polytechnic University, China) and Hui Jiang (Shenyang Skyeye Intelligence Cloud Information and Technology Co., Ltd., China)</i>	
User Portrait Construction of Power Digital Twin Based on Power Data	297
<i>Jie Li (Guangxi Power Grid Co., Ltd, China), Zhou Yang (Guangxi Power Grid Co., Ltd, China), Juntao Pan (Guangxi Power Grid Co., Ltd, China), Min Luo (China Southern Power Grid Digital Power Grid Group Co., Ltd, China), Yuchen Lai (China Southern Power Grid Digital Power Grid Group Co., Ltd, China), Yangyun Guo (China Southern Power Grid Digital Power Grid Group Co., Ltd, China), and Shuyu Xiao (China Southern Power Grid Digital Power Grid Group Co., Ltd, China)</i>	

Integrated Photovoltaic Power Generation and Electricity Load Forecasting

Distributed Power Supply Fault Tolerant Control Algorithm Based on Improved Artificial Immune Algorithm	302
<i>Jiao Shu (State Grid Jiangxi Electric Power Co., Ltd., China), Shiyuan Zhong (State Grid Jiangxi Electric Power Co., Ltd., China), Peng Xie (State Grid Jiangxi Electric Power Co., Ltd., China), Yuting Li (State Grid Jiangxi Electric Power Co., Ltd., China), and Tao Jiang (State Grid Jiangxi Electric Power Co., Ltd., China)</i>	
Three-Level Planning and Dispatching Method of Regional Comprehensive Energy Based on Stochastic Forest Algorithm	306
<i>Kai Wang (Shanghai Saga Energy Technology Co., Ltd., China), Huailiang Zhang (Shandong Xinfu Group Co., Ltd., China), and Weizwei Dong (Shanghai Institute of Technology, China)</i>	
A Short-Term Accurate Forecast Model for User Load and its Software Implementation	310
<i>Zhanrong Tang (Inner Mongolia Power (Group) Co., Ltd., China), Hailong Ye (Inner Mongolia Power (Group) Co., Ltd., China), Chenxu Zhao (Inner Mongolia Power Group Economic and Technological Research Co., Ltd., China), An Wang (Inner Mongolia Power Group Economic and Technological Research Co., Ltd., China), and Xiaohua Liu (Tianjin Tiandian Qingyuan Technology Co., Ltd., China)</i>	

Mountain PV Plant with BP Neural Network Incorporating PCA Power Generation	316
<i>Zihao Wang (Power Construction Corporation of China Guizhou Electric Power Design & Research Institute Company., Ltd, China), Ping Zhao (Power Construction Corporation of China Guizhou Electric Power Design & Research Institute Company., Ltd, China), Shuanghe Cao (Power Construction Corporation of China Guizhou Electric Power Design & Research Institute Company., Ltd, China), and Yong Liu (Power Construction Corporation of China Guizhou Electric Power Design & Research Institute Company., Ltd, China)</i>	
Photovoltaic Power Supply Power Prediction and Capability Assessment Based on Neural Network and Fuzzy Control	320
<i>Xiaojiao Liang (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), Juncheng Si (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), Shuangle Zhang (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), Xiaoxiang Su (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), Yuanyuan Wang (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), Xiaolin Chen (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), Shu Li (State Grid Shandong Electric Power Company Dongying Power Supply Company, China), and Ye Pan (State Grid Shandong Electric Power Company Dongying Power Supply Company, China)</i>	
Research on Dynamic Adjustment Strategy of Charging Power in Station Area Based on Intelligent Energy Control	326
<i>Shuai Yuan (Beijing Fibrlink Communications Co., Ltd., China), Siwei Li (Beijing Fibrlink Communications Co., Ltd., China), Shulin Guo (Beijing Fibrlink Communications Co., Ltd., China), and Xiaolu Pei (Beijing Fibrlink Communications Co., Ltd., China)</i>	
Industrial Park Power Control Strategy Based on Carbon Flow Optimization Management Algorithms	330
<i>Yalu Sun (Economics and Technology Research Institute of Gansu Electric Power Company, China), Chunjuan Zhao (Economics and Technology Research Institute of Gansu Electric Power Company, China), Kun Ding (Economics and Technology Research Institute of Gansu Electric Power Company, China), and Changhai Yang (Economics and Technology Research Institute of Gansu Electric Power Company, China)</i>	
Modeling of Unmanned Aerial Vehicles Wireless Channel in Transmission Scenario	336
<i>Ruibin Sun (North China Electric Power University, China) and Dongsheng Han (North China Electric Power University, China)</i>	
Few-Sample Wind Power Forecast Using Improved Conditional GAN and Neighborhood Search Crisscross Optimization Algorithm	340
<i>Haitao Zhang (Guangdong University of Technology, China), Zhongfu Dai (Electric Power Research Institute of China Southern Power Grid Company Limited, China), Honghui Liu (Guangdong University of Technology, China), Rufang Guan (Guangdong University of Technology, China), Yue Huang (Guangdong University of Technology, China), Zhenglin Tan (Guangdong University of Technology, China), Gongfu Luo (Guangdong University of Technology, China), and Yuchen Liu (Guangdong University of Technology, China)</i>	

Control Data Mining of Decentralized Solar PV Generation Plant Operation and Servicing Under Cloud Architecture	347
<i>Weixiu Lin (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), Qing Pan (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), Feng Li (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), Jie Xu (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), Yanfen Wu (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), Yuyan Xu (State Grid Zhejiang Electric Power Co., Ltd., China), Yuqing Wei (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), Jin Chen (Ningbo Power Transmission and Transformation Construction Co., Ltd., China), and Dandan Chen (Ningbo Power Transmission and Transformation Construction Co., Ltd., China)</i>	
Research on Joint Clearance Model of Electricity-Carbon Coupled Market Based on Carbon Emission Flow	351
<i>Yinong Cai (State Grid Liaoning Marketing Service Center, China), Jing Li (State Grid Liaoning Marketing Service Center, China), and Xiyiing Gao (State Grid Liaoning Marketing Service Center, China)</i>	
A Comparative Study of Machine Learning Based Tank Pressure Prediction for Ships	356
<i>Jiayang Wu (Zhejiang Ocean University, China), Yuanming Tao (Zhejiang Ocean University, China), and Xiaochuan Wang (Zhejiang Ocean University, China)</i>	
Interactive Response Optimization Strategy Considering Uncertain Source Load Resources of Virtual Power Plant	360
<i>Lingyan Li (National Network Heilongjiang Technical training Center, China), Changwei Lu (Changchun Institute of Engineering, China), Zhijun Yang (National Network Heilongjiang Technical training Center, China), Di Cui (National Network Heilongjiang Technical training Center, China), Wei Liu (National Network Heilongjiang Technical training Center, China), and Tao Jiang (National Network Heilongjiang Technical training Center, China)</i>	
A Fast Response Control Algorithm for Flexible Load in Virtual Power Plants with Differentiated Scenarios	364
<i>Ruixue Lei (State Grid Shaanxi Marketing Service Center, China), Rongrong Jia (State Grid Shaanxi Marketing Service Center, China), and Chao Zhu (State Grid Shaanxi Electric Power Research Institute, China)</i>	

Prediction of Spatiotemporal Distribution of Electric Vehicle Charging Load Based on User Behavior	368
<i>Yuting Li (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Tao Jiang (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Jiao Shu (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Chun Zheng (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Peng Xie (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Luping Luo (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Hua Liu (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Ding Hu (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), Yu Long (Economic Research Institute of State Grid Jiangxi Electric Power Company, China), and Sijun Xiong (Changsha University of Science and Technology, China)</i>	
An Electricity Demand Forecasting Model Based on GCN and Transformer	372
<i>Qionglan Na (State Grid Jibei Information & Telecommunication Company, China), Xin Li (State Grid Jibei Information & Telecommunication Company, China), Yifei Wang (State Grid Jibei Information & Telecommunication Company, China), Yixi Yang (State Grid Information & Telecommunication Branch, China), Shijun Zhang (State Grid Information & Telecommunication Branch, China), and Xinyi Li (State Grid Jibei Information & Telecommunication Company, China)</i>	
Communication Queue Scheduling Optimization Strategy for Demand Response Service	378
<i>Huajiang Yan (State Grid Zhejiang Electric Power Co., Ltd., China), Chunguang Lu (State Grid Zhejiang Electric Power Co., Ltd., China), Chaoliang Wang (State Grid Zhejiang Electric Power Co., Ltd., China), and Chi Jiang (State Grid Zhejiang Electric Power Co., Ltd., China)</i>	
Integrated Regional Energy Model Predictive Control System Based on a Dual-Layer Structure.....	382
<i>Gang Zheng (Kaifeng Power Supply Company State Grid Henan Electric Power Company, China), Yu Nan (Kaifeng Power Supply Company State Grid Henan Electric Power Company, China), and Yan Tao (Kaifeng Power Supply Company State Grid Henan Electric Power Company, China)</i>	
PV Power Prediction Method Based on EMD-KPCA-SSA-LSTM	386
<i>Bin Fan (PLA Army Academy of Artillery and Air Defense, China), Rui Wang (PLA Army Academy of Artillery and Air Defense, China), Baotao Yang (PLA Army Academy of Artillery and Air Defense, China), and LingLing Huang (PLA Army Academy of Artillery and Air Defense, China)</i>	
Prediction of Residential Carbon Emissions Based on PSO-BiLSTM Model	391
<i>Li Wang (State Grid Smart Internet of Vehicles Co., Ltd, China), Daiwen Peng (State Grid Smart Internet of Vehicles Co., Ltd, China), Sha Li (State Grid Smart Internet of Vehicles Co., Ltd, China), Yao Li (State Grid Smart Internet of Vehicles Co., Ltd, China), Ting Yu (State Grid Smart Internet of Vehicles Co., Ltd, China), and Yudong Tang (State Grid Smart Internet of Vehicles Co., Ltd, China)</i>	

Double-Layer Optimized Configuration of Heat Storage Capacity of Photothermal Power Station Based on k-Means	396
<i>Bin Wang (State Grid Lanzhou Power Supply Company, China), Zaixiang Zhou (Gansu Power Transmission and Transformation Engineering Co., Ltd., China), Chenchun Xia (Lanzhou Ion Therapy Co., Ltd., China), Keqiang Chen (State Grid Lanzhou Power Supply Company, China), and Baoqi Chen (State Grid Lanzhou Power Supply Company, China)</i>	
Research on SOC Method of Lithium Battery Based on FFRLS-DEKF	400
<i>Yichen Du (Engineering Northeastern University), Dazhi Wang (Engineering Northeastern University), Yongliang Ni (China Northern Vehicle Research Institute), Keling Song (China Northern Vehicle Research Institute), Yanming Li (China Northern Vehicle Research Institute), and Guofeng Sun (State Grid Shandong Electric Power Company)</i>	
Risk Optimisation of Capacity and Energy Reserve Under New Energy Output Uncertainty	404
<i>Tianyuan Yang (State Grid Electric Power Research Institute, NARI Group Corporation, China), Dongliang Xie (State Grid Electric Power Research Institute, NARI Group Corporation, China), Huilin Zhang (State Grid Electric Power Research Institute, NARI Group Corporation, China), Chuhao Wang (State Grid Electric Power Research Institute, NARI Group Corporation, China), and Linjun Cai (State Grid Electric Power Research Institute, NARI Group Corporation, China)</i>	
Photovoltaic Power Generation Prediction Based on IWOA-TCN-Self-Attention-LSTM Neural Network	411
<i>Junming Wang (Chengdu University of Information Technology, China), Zhiheng Hu (Chengdu University of Information Technology, China), and Zhenzhen Hu (Chengdu University of Information Technology, China)</i>	
Research on Electric Power Load Forecasting Based on SO-CatBoost	416
<i>Zhiyu Du (Tongji University, China)</i>	

Power System Modeling and Smart Grid Technology

Segmented Analysis of the Maximum Carrying Capacity of the Distribution Network Considering the Time and Space Risks of the Transmission Network	421
<i>Zhangguo Chen (NARI Information & Communication Technology Co., Ltd., China), Bo Zhou (NARI Information & Communication Technology Co., Ltd., China), and Zhizhong Qiao (NARI Information & Communication Technology Co., Ltd., China)</i>	
Intelligent Prediction Method of Relay Protection Device Reliability Based on the Bayesian Network and Index Entropy Value	425
<i>Wei Liu (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd., China), Shaolin Jiao (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd., China), Tao Wen (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd., China), and Jia Zhu (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd., China)</i>	

The Economic Optimization Control of DC Microgrid: A MPC Solution	429
<i>Hao Zhang (Shandong University Shenzhen Research Institute, China), Zhenbin Zhang (Shandong University Shenzhen Research Institute, China), Zhen Li (Shandong University Shenzhen Research Institute, China), and Yafei Yin (Shandong University Shenzhen Research Institute, China)</i>	
A Least Squares Dual Support Vector Machine Based Algorithm for Identifying Abnormal Behavior in Energy Meter Installation and Removal Field Operations	434
<i>Di Wu (State Grid Shanghai North power supply company, China), Jingjing Jiang (State Grid Shanghai North power supply company, China), Jiayun Li (State Grid Shanghai North power supply company, China), and Lin Chen (State Grid Shanghai North power supply company, China)</i>	
An Wireless Access Selection Algorithm of Power Service Based on Traffic Prediction	438
<i>Lu Bai (Jiuquan Power Supply Company of State Grid Gansu Electric Power Company, China), Lu Wang (Jiuquan Power Supply Company of State Grid Gansu Electric Power Company, China), Chao Tu (Jiuquan Power Supply Company of State Grid Gansu Electric Power Company, China), Weizheng Tu (Jiuquan Power Supply Company of State Grid Gansu Electric Power Company, China), Xi Song (State Grid Gansu Electric Power Company, China), and Xilian Lei (Jiuquan Power Supply Company of State Grid Gansu Electric Power Company, China)</i>	
Planning Strategy for Electric Vehicle Charging Stations Based on Maximizing Operator Profits	443
<i>Ran Jiao (State Grid Beijing Electric Power Company, China), Longfei Ma (State Grid Beijing Electric Power Company, China), Siyue Lu (State Grid Beijing Electric Power Company, China), Baoqun Zhang (State Grid Beijing Electric Power Company, China), Yayun Li (State Grid Beijing Electric Power Company, China), Bin Yao (State Grid Beijing Electric Power Company, China), Cheng Gong (State Grid Beijing Electric Power Company, China), and Jiani Zeng (State Grid Beijing Electric Power Company, China)</i>	
Distributionally Robust Planning Method of Power Generation and Transmission Considering Multi-Energy Complementary and DC Transmission	448
<i>Xingang Wang (State Grid Xinjiang Electric Power Co., Ltd., China), Zhipeng Li (State Grid Xinjiang Electric Power Co., Ltd., China), Daigang Wang (State Grid Xinjiang Electric Power Co., Ltd., China), Qing Meng (State Grid Xinjiang Electric Power Co., Ltd., China), Qinghe Xia (State Grid Xinjiang Electric Power Co., Ltd., China), Huachun Wang (State Grid Xinjiang Electric Power Co., Ltd., China), and Chengming Zhang (State Grid Zhejiang Electric Power Research Institute, China)</i>	

A Planning Model of Active Distribution Network Considering Microgrid-Cluster Access Under a Distrubted Solving Framework Baed on Objective Cascade Analysis	453
<i>Yi Lin (Economic and Technological Research Institute of State Grid Fujian Electric Power Co., Ltd, China; Multiple Disaster Superimposed Areas State Grid Corporation Laboratory, China; Zhejiang University, China), Hao Chen (Economic and Technological Research Institute of State Grid Fujian Electric Power Co., Ltd, China; Multiple Disaster Superimposed Areas State Grid Corporation Laboratory, China), Naixuan Zhu (Economic and Technological Research Institute of State Grid Fujian Electric Power Co., Ltd, China; Multiple Disaster Superimposed Areas State Grid Corporation Laboratory, China), and Chuangxin Guo (Zhejiang University, China)</i>	
Research on Security Risk Assessment Model for Power 5g Virtual Private Network	457
<i>Xu Wang (China Electric Power Research Institute Co., Ltd., China), Dahua Zhang (China Electric Power Research Institute Co., Ltd., China), Ziqing Lin (China Electric Power Research Institute Co., Ltd., China), Yayun Zhu (China Electric Power Research Institute Co., Ltd., China), Xin Liu (State Grid Shandong Electric Power Research Institute, China), Rui Wang (State Grid Shandong Electric Power Research Institute, China), and Baiji Hu (China Electric Power Research Institute Co., Ltd., China)</i>	
The Application of "Xingbo Old Test" in the Fault Warning and Positioning of the Distribution Network	462
<i>Hao Tian (State Grid Baoji Electric Power Supply Company, China), Min Yang (State Grid Baoji Electric Power Supply Company, China), and Yanni Chen (State Grid Baoji Electric Power Supply Company, China)</i>	
Optimal Scheduling of Microgrid Based on Improved Particle Swarm Optimization	466
<i>Xiaohong Zhang (Shanghai Dianji University, China) and Shaokai Li (Shanghai Dianji University, China)</i>	
Multi-Objective Structural Optimisation of Immersion Heat Pump Water Heater Tank Based on Genetic Algorithm	470
<i>Yang Wei (Shanghai University of Electric Power, China) and Liu Fang (Shanghai Non-carbon energy conversion and utilization institute, China)</i>	
Adaptive Evaluation Method of Communication Access Network for Multi-Service of New Power System	475
<i>Ziyun Cheng (Development Division of State Grid Gansu Electric Power Company, China), Wenqian Yao (Development Division of State Grid Gansu Electric Power Company, China), Zhaoyan Cheng (Development Division of State Grid Gansu Electric Power Company, China), and Pengjiao Wang (North China Electric Power University, China)</i>	
Study on Economic Optimal Scheduling of Microgrid Based on Improved Bald Eagle Algorithm ...	480
<i>Yu Zhang (Shenyang Institute of Engineering, China), Xiaoyu Sun (Shenyang Institute of Engineering, China), and Tianshuo Zhang (State Grid Chaoyang Electric Power Supply Company, China)</i>	

Network Attack Detection Method of Power Equipment Communication System Based on FP-Growth Algorithm	484
<i>Tao Yang (State Grid Shandong Electric Power Company Jining Power Supply Company), Kun Zhang (State Grid Shandong Electric Power Company Jining Power Supply Company), Chao Cong (State Grid Shandong Electric Power Company Jining Power Supply Company), Lingji Kong (State Grid Shandong Electric Power Company Jining Power Supply Company), and Dengkao Xi (State Grid Shandong Electric Power Company Jining Power Supply Company)</i>	
Security Evaluation of Power Communication Coupling System for New Power System	491
<i>Pu Zhang (State Grid Shandong Electric Power Company Information Communication, China), Yongjing Wei (State Grid Shandong Electric Power Company Information Communication, China), Yan Zhang (State Grid Shandong Electric Power Company Information Communication, China), Youxiang Zhu (State Grid Shandong Electric Power Company Information Communication, China), and Hao Zhang (State Grid Shandong Electric Power Company Economic Research Institute, China)</i>	
Design and Verification of Electronic Evidence Solidification System Based on Power Trading Business	497
<i>Fuman Zhou (Beijing Dianke Zhixin Technology Co., Ltd, China), Haitao Jin (Beijing Dianke Zhixin Technology Co., Ltd, China), Jian Xue (Beijing Dianke Zhixin Technology Co., Ltd, China), and Binglun Li (Beijing Dianke Zhixin Technology Co., Ltd, China)</i>	
A Multi Time Scale Layered Control Method for Distribution Networks with Multi Terminal Flexible Interconnection Devices	501
<i>Yang Yang (Economic & Technology Research Institute of State Grid Shandong Electric Power Company, China), Shenquan Yang (Economic & Technology Research Institute of State Grid Shandong Electric Power Company, China), Can Cui (Economic & Technology Research Institute of State Grid Shandong Electric Power Company, China), Shuli Liu (Economic & Technology Research Institute of State Grid Shandong Electric Power Company, China), Qiuyang Yu (Economic & Technology Research Institute of State Grid Shandong Electric Power Company, China), and Xiaolin Liang (Economic & Technology Research Institute of State Grid Shandong Electric Power Company, China)</i>	
A Research on a Power Grid Alarm Information Handling Method Based on the Integration of Dispatching and Communication Systems	505
<i>Chunliang Tai (NARI Technology Development Ltd. Company, NARI Group Corporation (State Grid Electric Power Research Institute), China), Manfei Gao (NARI Technology Development Ltd. Company, NARI Group Corporation (State Grid Electric Power Research Institute), China), Xing Chen (NARI Technology Development Ltd. Company, NARI Group Corporation (State Grid Electric Power Research Institute), China), and Chao Liu (NARI Technology Development Ltd. Company, NARI Group Corporation (State Grid Electric Power Research Institute), China)</i>	
An Efficient Power Dispatching Switching Network Traffic Control Method with FPGA Acceleration	510
<i>Jie Pang (State Grid Yinchuan Electric Power Supply Company, China)</i>	

Construction Method and Application of Digital Twin for Power Grid Equipment Based on Electrical Topology	514
<i>Shuai Gao (China Electric Power Research Institute, China), Zhe Li (China Electric Power Research Institute, China), Zhipeng Wang (China Electric Power Research Institute, China), Chenkun Song (China Electric Power Research Institute, China), Lin Peng (State Grid Smart Grid Research Institute, China), and Zhu Jian Ou (State Grid Jiangsu Electric Power, China)</i>	
A Study on Real-Time Monitoring of Meter-Driven Data in Power Systems Based on OpenHarmony... 519	
<i>Hua Li (China Southern Power Grid, China), Bin Zhang (China Southern Power Grid, China), Zhengrong Wu (China Southern Power Grid, China), Chen Yang (Southern Power Grid Digital Grid Technology (Guangdong) Co., Ltd, China), and Shaohui Du (Southern Power Grid Digital Grid Technology (Guangdong) Co., Ltd, China)</i>	
A Forecasting-Aided State Estimator Based on PSO-ELM for Active Distribution Networks	524
<i>Jiahui Guo (Shandong University, China) and Bingqing Nie (Shandong University, China)</i>	
Prediction of Disturbance Arrival Time in Power System Based on Electromechanical Wave Propagation Theory	528
<i>Xingyuan Wei (Shandong University, China)</i>	
Analysis of the Application Prospect of Wireless Charging Technology in Port Horizontal Transportation Equipment	532
<i>Jing Li (China Waterborne Transport Research Institute, China) and Jianrui Sun (China Waterborne Transport Research Institute, China)</i>	
Research on Hierarchical Fault Location of Active Distribution Network	536
<i>Rui Li (Shanghai Dianji University, China) and Jianchuan Xianyu (Shanghai Dianji University, China)</i>	
Dynamic Simulation Technology for the Electrical System of Large-Scale Thermal Power Plants	540
<i>Jian Gao (Shouguang Power Generation Co. LTD, CHN ENERGY, China), Chengshuai Li (Shouguang Power Generation Co. LTD, CHN ENERGY, China), Liang Teng (Shouguang Power Generation Co. LTD, CHN ENERGY, China), Wenyan Gao (Shouguang Power Generation Co. LTD, CHN ENERGY, China), and Yajie Wang (Shouguang Power Generation Co. LTD, CHN ENERGY, China)</i>	
Renewable Energy Power System Load Frequency Control with Demand Response Based on Fractional Sliding Mode Control	548
<i>Liang Yuan (State Grid Henan Electric Power Company, China), Guixi Miao (State Grid Henan Electric Power Company, China), Meiqing Wang (State Grid Henan Electric Power Company, China), Yandong Liu (State Grid Henan Electric Power Company, China), Xin Wang (State Grid Henan Electric Power Company, China), and Zishuai Yang (Shanghai University of Electric Power, China)</i>	
Research on Non-Contact Detection Method of Deteriorated Insulators Based on Magnetic Field Measurement	552
<i>Zhiguo Zhou (Beijing Institute of Technology, China), Zhengyan He (Beijing Institute of Technology, China), and Xuehua Zhou (Beijing Institute of Technology, China)</i>	

Loss Reduction Control Method for Low-Voltage Distribution Network Considering Power Quality Disturbance	559
<i>Xiping Ma (State Grid Gansu Electric Power Research Institute, China), Chen Liang (State Grid Gansu Electric Power Research Institute, China), Yaxin Li (State Grid Gansu Electric Power Research Institute, China), Xiaoyang Dong (State Grid Gansu Electric Power Research Institute, China), Kai Wei (State Grid Gansu Electric Power Research Institute, China), and Dongping Zhang (State Grid Gansu Electric Power Research Institute, China)</i>
