Table of Contents

Message from the General Chairs	xiv
Message from the Program Chairs	xvi
Organizing Committee	xvii
Program Committee	xix
Steering Committee	xxiii
Reviewers	xxiv
Keynotes	xxv
Sponsors	xxix

Research Session I: Best Papers Candidates

APIBeh: Learning Behavior Inclination of APIs for Malware Classification	1
<i>Lei Cui (Zhongguancun Laboratory), Yiran Zhu (Zhejiang University; Hangzhou High-Tech Zone (Binjiang) Institute of Blockchain and Data Security), Junnan Yin (Zhongguancun Laboratory), Zhiyu Hao (Zhongguancun Laboratory), Wei Wang (Zhongguancun Laboratory), Peng Liu (Guangxi Normal University), Ziqi Yang (Zhejiang University; Hangzhou High-Tech Zone (Binjiang) Institute of Blockchain and Data Security), and Xiaochun Yun (Zhongguancun Laboratory)</i>	
LiScopeLens: An Open-Source License Incompatibility Analysis Tool Based on Scope Representation of License Terms	13
<i>Ziang Liu (Lanzhou University), Xin Liu (Lanzhou University), Yingli Zhang (Lanzhou University), Zihao Zhang (Lanzhou University), Song Li (Zhejiang University), Weina Niu (University of Electronic Science and Technology of China), Qingguo Zhou (Lanzhou University), Rui Zhou (Lanzhou University), and Xiaokang Zhou (Kansai University)</i>	
Exploring Hierarchical Patterns for Alert Aggregation in Supercomputers	25
<i>Yuan Yuan (National University of Defense Technology), Tongqing Zhou (National University of Defense Technology), Xiuhong Tan (Changsha University of Science and Technology), Yongqian Sun (Nankai University), Yuqi Li (National University of Defense Technology; National Supercomputer Center in Tianjin), Zhixing Li (National University of Defense Technology), Zhiping Cai (National University of Defense Technology), and Tiejun Li (National University of Defense Technology)</i>	

Research Session II: Anomaly Detection I

Detection Latencies of Anomaly Detectors - An Overlooked Perspective?	37
<i>Tommaso Puccetti (University of Florence, Italy) and Andrea Ceccarelli (University of Florence, Italy)</i>	
Self-Evolutionary Group-Wise Log Parsing Based on Large Language Model	49
<i>Changhua Pei (University of Chinese Academy of Sciences), Zihan Liu (Chinese Academy of Sciences, University of Chinese Academy of Sciences), Jianhui Li (Chinese Academy of Sciences), Erhan Zhang (Chinese Academy of Sciences; University of Chinese Academy of Sciences), Le Zhang (Tencent), Haiming Zhang (Chinese Academy of Sciences), Wei Chen (Chinese Academy of Sciences), Dan Pei (Tsinghua University), and Gaogang Xie (Chinese Academy of Sciences; University of Chinese Academy of Sciences)</i>	
TimeSeriesBench: An Industrial-Grade Benchmark for Time Series Anomaly Detection Models	61
<i>Haotian Si (Computer Network Information Center, CAS, China; University of Chinese Academy of Sciences, China), Jianhui Li (Computer Network Information Center, CAS, China), Changhua Pei (Computer Network Information Center, CAS, China; University of Chinese Academy of Sciences, China), Hang Cui (Jilin University, China), Jingwen Yang (Computer Network Information Center, CAS, China; University of Chinese Academy of Sciences, China), Yongqian Sun (Nankai University, China), Shenglin Zhang (Nankai University, China), Jingjing Li (Computer Network Information Center, CAS, China), Haiming Zhang (Computer Network Information Center, CAS, China), Jing Han (ZTE Co., Ltd, China), Dan Pei (Tsinghua University, China), and Gaogang Xie (Computer Network Information Center, CAS, China)</i>	
Detecting Numerical Deviations in Deep Learning Models Introduced by the TVM Compiler	73
<i>Zichao Xia (Shanghai Jiao Tong University, China), Yuting Chen (Shanghai Jiao Tong University, China), Pengbo Nie (Shanghai Jiao Tong University, China), and Zihan Wang (Shanghai Jiao Tong University, China)</i>	

Research Session III: Vulnerability Analysis and Detection

S2Vul: Vulnerability Analysis Based on Self-supervised Information Integration	84
<i>Shaojie Yang (National University of Defense Technology, China), Haoran Xu (National University of Defense Technology, China), Fangliang Xu (National University of Defense Technology, China), and Yongjun Wang (National University of Defense Technology, China)</i>	
A Comprehensive Study on the Impact of Vulnerable Dependencies on Open-Source Software	96
<i>Shree Hari Bittugondanahalli Indra Kumar (Technische Universität Dresden, Germany), Lilia Rodrigues Sampaio (Universidade Federal de Campina Grande, Brazil), André Martin (Technische Universität Dresden, Germany), Andrey Brito (Universidade Federal de Campina Grande, Brazil), and Christof Fetzer (Technische Universität Dresden, Germany)</i>	

Fine-Tuning Pre-Trained Model with Optimizable Prompt Learning for Code Vulnerability Detection	108
<i>Wei Chang (Hainan University, China), Chunyang Ye (Hainan University, China), and Hui Zhou (Hainan University, China)</i>	
Learning Graph-Based Patch Representations for Identifying and Assessing Silent Vulnerability Fixes	120
<i>Mei Han (Southeast University, China), Lulu Wang (Southeast University, China), Jianming Chang (Southeast University, China), Bixin Li (Southeast University, China), and Chunguang Zhang (Southeast University, China)</i>	

Research Session IV: Anomaly Detection II

LLMeLog: An Approach for Anomaly Detection based on LLM-Enriched Log Events	132
<i>Minghua He (Peking University, China), Tong Jia (Peking University, China), Chiming Duan (Peking University, China), Huaqian Cai (Peking University, China), Ying Li (Peking University, China), and Gang Huang (Peking University, China)</i>	
LogCAE: An Approach for Log-Based Anomaly Detection with Active Learning and Contrastive Learning	144
<i>Pei Xiao (Peking University, China), Tong Jia (Peking University, China), Chiming Duan (Peking University, China), Huaqian Cai (Peking University, China), Ying Li (Peking University, China), and Gang Huang (Peking University, China)</i>	
VCRLog: Variable Contents Relationship Perception for Log-Based Anomaly Detection	156
<i>Jinyuan Wang (Beijing University of Technology, China), Tong Li (Beijing University of Technology, China), Runzi Zhang (NSFOCUS Technologies Group Co., Ltd., China), Zifang Tang (Beijing University of Technology, China), Di Wu (Beijing University of Technology, China), and Zhen Yang (Beijing University of Technology, China)</i>	
Leveraging RAG-Enhanced Large Language Model for Semi-Supervised Log Anomaly Detection .	168
<i>Wanhao Zhang (Tsinghua University, China), Qianli Zhang (Tsinghua University, China; Zhongguancun Laboratory, China), Enyu Yu (Advance Computing and Storage Lab, Huawei Technologies, China), Yuxiang Ren (Advance Computing and Storage Lab, Huawei Technologies, China), Yeqing Meng (Tsinghua University, China), Mingxi Qiu (Tsinghua University, China), and Jilong Wang (Tsinghua University, China; Zhongguancun Laboratory, China)</i>	

Research Session V: Security and Performance

Enhancing AI-Based Generation of Software Exploits with Contextual Information	180
<i>Pietro Liguori (University of Naples Federico II, Italy), Cristina Improta (University of Naples Federico II, Italy), Roberto Natella (University of Naples Federico II, Italy), Bojan Cukic (University of North Carolina at Charlotte, NC), and Domenico Cotroneo (University of Naples Federico II, Italy)</i>	

Android’s Cat-and-Mouse Game: Understanding Evasion Techniques against Dynamic Analysis ..	192
<i>Shuang Li (Shandong University), Rui Li (Shandong University), Shishuai Yang (Shandong University), and Wenrui Diao (Shandong University)</i>	
REDLC: Learning-Driven Reverse Engineering for Deep Learning Compilers	204
<i>Minghui Li (Nanjing University of Aeronautics and Astronautics, China), Yang Li (Nanjing University of Aeronautics and Astronautics, China), Hao Han (Nanjing University of Aeronautics and Astronautics, China), Xiaopeng Ke (Nanjing University, China), Tongyu Wang (Nanjing University of Aeronautics and Astronautics, China), Fengyuan Xu (Nanjing University, China), and Liming Fang (Nanjing University of Aeronautics and Astronautics, China)</i>	
Assessing the Performance of AI-Generated Code: A Case Study on GitHub Copilot	216
<i>Shuang Li (Wuhan University, China), Yuntao Cheng (Wuhan University, China), Jinfu Chen (Wuhan University, China), Jifeng Xuan (Wuhan University, China), Sen He (University of Arizona, United States), and Weiyi Shang (University of Waterloo, Canada)</i>	

Research Session VI: Tools and Artefacts

CovSBOM: Enhancing Software Bill of Materials with Integrated Code Coverage Analysis	228
<i>Yunze Zhao (New York University, United States of America), Yuchen Zhang (New York University, United States of America), Dan Chacko (Depository Trust & Clearing Corporation), and Justin Cappos (New York University)</i>	
LabelEase: A Semi-Automatic Tool for Efficient and Accurate Trace Labeling in Microservices	238
<i>Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Zeyu Che (Nankai University), Zhongjie Pan (Nankai University), Xiaohui Nie (Computer Network Information Center, Chinese Academy of Sciences), Yongqian Sun (Tianjin Key Laboratory of Software Experience and Human Computer Interaction; Nankai University), Lemeng Pan (Huawei), and Dan Pei (Tsinghua University)</i>	

Research Session VII: Safety

Aspis: Lightweight Neural Network Protection Against Soft Errors	248
<i>Anna Schmedding (William & Mary), Lishan Yang (George Mason University), Advait Jog (University of Virginia), and Evgenia Smirni (William & Mary)</i>	
GAS: Generating Fast & Accurate Surrogate Models for Simulations of Autonomous Vehicle Systems	260
<i>Keyur Joshi (University of Illinois Urbana-Champaign), Chiao Hsieh (Kyoto University; University of Illinois Urbana-Champaign), Sayan Mitra (University of Illinois Urbana-Champaign), and Sasa Misailovic (University of Illinois Urbana-Champaign)</i>	

Applying Concept-Based Models for Enhanced Safety Argumentation	272
<i>João Paulo Costa de Araujo (Humboldt University of Berlin, Germany), Balahari Vignesh Balu (Fraunhofer IKS, Germany), Eik Reichmann (Humboldt University of Berlin, Germany), Jessica Kelly (Fraunhofer IKS, Germany), Stefan Kugele (Technische Hochschule Ingolstadt, Germany), Núria Mata (Fraunhofer IKS, Germany), and Lars Grunske (Humboldt University of Berlin, Germany)</i>	
AI-Supported Eliminative Argumentation: Practical Experience Generating Defeaters to Increase Confidence in Assurance Cases	284
<i>Torin Viger (University of Toronto, Canada), Logan Murphy (University of Toronto, Canada), Simon Diemert (Critical Systems Labs, Inc., Canada), Claudio Menghi (University of Bergamo, Italy), Jeffrey Joyce (Critical Systems Labs, Inc., Canada), Alessio Di Sandro (University of Toronto, Canada), and Marsha Chechik (University of Toronto, Canada)</i>	

Research Session VIII: Fuzzing

Multi-Level Fuzzing for Document File Formats with Intermediate Representations	295
<i>Yifan Wang (Stevens Institute of Technology) and Jun Xu (The University of Utah)</i>	
An Empirical Study on the Distance Metric in Guiding Directed Grey-Box Fuzzing	307
<i>Tingke Wen (National University of Defense Technology, China), Yuwei Li (National University of Defense Technology, China), Lu Zhang (National University of Defense Technology, China), Huimin Ma (National University of Defense Technology, China), and Zulie Pan (National University of Defense Technology, China)</i>	
Enhancing Black-Box Compiler Option Fuzzing with LLM through Command Feedback	319
<i>Taiyan Wang (NUDT, China), Ruipeng Wang (NUDT, China), Yu Chen (NUDT, China), Lu Yu (NUDT, China), Zulie Pan (NUDT, China), Min Zhang (NUDT, China), Huimin Ma (NUDT, China), and Jinghua Zheng (NUDT, China)</i>	
History-Driven Compiler Fuzzing via Assembling and Scheduling Bug-Triggering Code Segments.....	331
<i>Zhenye Fan (Northwest University, China), Guixin Ye (Northwest University, China), Tianmin Hu (Northwest University, China), and Zhanyong Tang (Northwest University, China)</i>	

Research Session IX: Testing I

Hierarchy-Aware Regression Test Prioritization	343
<i>Hao Wang (UC Berkeley, USA), Pu Yi (Stanford University, USA), Jeremias Parladorio (National University of Rio Cuarto, Argentina), Wing Lam (George Mason University, USA), Darko Marinov (University of Illinois, USA), and Tao Xie (Peking University, China)</i>	

An Empirical Investigation on Android App Testing Practices	355
<i>Tarek Mahmud (Texas State University, USA), Meiru Che (Central Queensland University, Australia), Anne H. H. Ngu (Texas State University, USA), and Guowei Yang (The University of Queensland, Australia)</i>	
Fix the Tests: Augmenting LLMs to Repair Test Cases with Static Collector and Neural Reranker	367
<i>Jun Liu (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences; University of Chinese Academy of Sciences (UCAS)), Jiwei Yan (Technology Center of Software Engineering, Institute of Software, Chinese Academy of Sciences), Yuanyuan Xie (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences; Hangzhou Institute for Advanced Study, UCAS), Jun Yan (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences; Technology Center of Software Engineering, Institute of Software, Chinese Academy of Sciences; University of Chinese Academy of Sciences (UCAS)), and Jian Zhang (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences; University of Chinese Academy of Sciences (UCAS); Hangzhou Institute for Advanced Study, UCAS)</i>	
Code Ownership: The Principles, Differences, and Their Associations with Software Quality	379
<i>Patanamon Thongtanunam (The University of Melbourne, Australia) and Chakkrit Tantithamthavorn (Monash University, Australia)</i>	

Research Session X: Root Cause Analysis and Program Repair

SparseRCA: Unsupervised Root Cause Analysis in Sparse Microservice Testing Traces	391
<i>Zhenhe Yao (Tsinghua University; Beijing National Research Center for Information Science and Technology), Haowei Ye (Ant Group), Changhua Pei (Chinese Academy of Sciences; University of Chinese Academy of Sciences), Guang Cheng (Ant Group), Guangpei Wang (Ant Group), Zhiwei Liu (Ant Group), Hongwei Chen (Ant Group), Hang Cui (Chinese Academy of Sciences; University of Chinese Academy of Science), Zeyan Li (Bytedance Inc.), Jianhui Li (Chinese Academy of Sciences), Gaogang Xie (Chinese Academy of Sciences), and Dan Pei (Tsinghua University; Beijing National Research Center for Information Science and Technology)</i>	
KPIRoot: Efficient Monitoring Metric-Based Root Cause Localization in Large-Scale Cloud Systems	403
<i>Wenwei Gu (The Chinese University of Hong Kong, China), Xinying Sun (Huawei Cloud Computing Technology Co., Ltd, China), Jinyang Liu (The Chinese University of Hong Kong, China), Yintong Huo (The Chinese University of Hong Kong, China), Zhuangbin Chen (Sun Yat-sen University, China), Jianping Zhang (The Chinese University of Hong Kong, China), Jiazhen Gu (The Chinese University of Hong Kong, China), Yongqiang Yang (Huawei Cloud Computing Technology Co., Ltd, China), and Michael R. Lyu (The Chinese University of Hong Kong, China)</i>	

FaaSRCAs: Full Lifecycle Root Cause Analysis for Serverless Applications	415
<i>Jin Huang (Sun Yat-sen University, China), Pengfei Chen (Sun Yat-sen University, China), Guangba Yu (Sun Yat-sen University, China), Yilun Wang (Sun Yat-sen University, China), Haiyu Huang (Sun Yat-sen University, China), and Zilong He (Sun Yat-sen University, China)</i>	
RATCHET: Retrieval Augmented Transformer for Program Repair	427
<i>Jian Wang (Singapore and Singapore Management University, Singapore; Nanyang Technological University, Singapore), Shangqing Liu (Nanyang Technological University, Singapore), Xiaofei Xie (Singapore Management University, Singapore), Jingkai Siow (Nanyang Technological University, Singapore), Kui Liu (Software Engineering Application Technology Laboratory, China), and Yi Li (Nanyang Technological University, Singapore)</i>	

Research Session XI: Testing II

Testing Diverse Geographical Features of Autonomous Driving Systems	439
<i>Seongdeok Seo (Hyundai Motors, South Korea), Judy Lee (ADP, United States), and Mijung Kim (UNIST, South Korea)</i>	
Themis: Automatic and Efficient Deep Learning System Testing with Strong Fault Detection Capability	451
<i>Dong Huang (The University of Hong Kong), Tsz On Li (The University of Hong Kong), Xiaofei Xie (Singapore Management University), and Heming Cui (The University of Hong Kong)</i>	
A Combinatorial Interaction Testing Method for Multi-Label Image Classifier	463
<i>Peng Wang (Nanjing University, China), Shengyou Hu (Nanjing University, China), Huayao Wu (Nanjing University, China), Xintao Niu (Nanjing University, China), Changhai Nie (Nanjing University, China), and Lin Chen (Nanjing University, China)</i>	
Mutation-Based Integration Testing of Knowledge Graph Applications	475
<i>Tobias John (University of Oslo, Norway), Einar Broch Johnsen (University of Oslo, Norway), and Eduard Kamburjan (University of Oslo, Norway)</i>	

Research Session XII: Failure Monitoring, Prediction and Diagnosis

DRLFailureMonitor: A Dynamic Failure Monitoring Approach for Deep Reinforcement Learning System	487
<i>Yi Cai (Beihang University, China), Xiaohui Wan (Beihang University, China), Zhihao Liu (Beihang University, China), and Zheng Zheng (Beihang University, China)</i>	

Can We Trust Auto-Mitigation? Improving Cloud Failure Prediction with Uncertain Positive Learning	499
<i>Haozhe Li (Microsoft, China), Minghua Ma (Microsoft, USA), Yudong Liu (Microsoft, China), Pu Zhao (Microsoft, China), Shuo Li (Carnegie Mellon University), Ze Li (Microsoft, USA), Murali Chintalapati (Microsoft, USA), Yingnong Dang (Microsoft, USA), Chetan Bansal (Microsoft, USA), Saravan Rajmohan (Microsoft, USA), Qingwei Lin (Microsoft, China), and Dongmei Zhang (Microsoft, China)</i>	
Demystifying and Extracting Fault-Indicating Information from Logs for Failure Diagnosis	511
<i>Junjie Huang (The Chinese University of Hong Kong, China), Zhihan Jiang (The Chinese University of Hong Kong, China), Jinyang Liu (The Chinese University of Hong Kong, China), Yintong Huo (The Chinese University of Hong Kong, China), Jiazhen Gu (The Chinese University of Hong Kong, China), Zhuangbin Chen (Sun Yat-sen University, China), Cong Feng (Huawei Cloud Computing Technology Co., Ltd, China), Hui Dong (Huawei Cloud Computing Technology Co., Ltd, China), Zengyin Yang (Huawei Cloud Computing Technology Co., Ltd, China), and Michael R. Lyu (The Chinese University of Hong Kong, China)</i>	
Large Language Models Can Provide Accurate and Interpretable Incident Triage	523
<i>Zexin Wang (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Jianhui Li (Computer Network Information Center, Chinese Academy of Sciences), Minghua Ma (Microsoft), Ze Li (Microsoft), Yu Kang (Microsoft), Chaoyun Zhang (Microsoft), Chetan Bansal (Microsoft), Murali Chintalapati (Microsoft), Saravan Rajmohan (Microsoft), Qingwei Lin (Microsoft), Dongmei Zhang (Microsoft), Changhua Pei (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences), and Gaogang Xie (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences)</i>	

Research Session XIII: Security and Privacy

A Security Verification Framework for the LoRaWAN Protocol with Application in the Manufacturing Industry	535
<i>Wenting Dong (East China Normal University, China), HuiBiao Zhu (East China Normal University, China), Sini Chen (East China Normal University, China), and Ning Ge (Beihang University, China)</i>	
MDIplier: Protocol Format Recovery via Hierarchical Inference	547
<i>Kai Liang (Central South University, China), Zhengxiong Luo (Tsinghua University, China), Yanyang Zhao (Tsinghua University, China), Wenlong Zhang (Central South University, China), Ronghua Shi (Central South University, China), Yu Jiang (Tsinghua University, China), Heyuan Shi (Central South University, China), and Chao Hu (Central South University, China)</i>	
Beyond the Horizon: Exploring Cross-Market Security Discrepancies in Parallel Android Apps.....	558
<i>Shishuai Yang (Shandong University), Guangdong Bai (The University of Queensland), Ruoyan Lin (Shandong University), Jialong Guo (Shandong University), and Wenrui Diao (Shandong University)</i>	

Understanding and Detecting Privacy Leakage Vulnerabilities in Hyperledger Fabric Chaincodes	570
<i>Ziming Chen (Peking University, China), Yue Li (Taiyuan University of Technology, China), Jianbo Gao (Beijing Jiaotong University, China; Peking University, China), Jiashuo Zhang (Peking University, China), Ke Wang (Peking University, China), Jianbin Hu (Peking University, China), Zhi Guan (Peking University, China), and Zhong Chen (Peking University, China)</i>	

Research Session XIV: Performance and Reliability Analysis and Prediction

Understanding Atomics and Memory Ordering Issues in Real-World Rust Software	582
<i>Cheng Wang (Beijing University of Posts and Telecommunications; Zhongguancun Laboratory), Tengfei Tu (Beijing University of Posts and Telecommunications), Sujuan Qin (Beijing University of Posts and Telecommunications), Guangjun Wu (Zhongguancun Laboratory), Fei Gao (Beijing University of Posts and Telecommunications), and Mingchao Wan (Beijing Academy of Blockchain and Edge Computing)</i>	
A Compositional Approach to Coordinated Software Rejuvenation of Component-Based Systems .	593
<i>Leonardo Paroli (University of Florence, Italy), Tommaso Botarelli (University of Florence, Italy), Laura Carnevali (University of Florence, Italy), and Enrico Vicario (University of Florence, Italy)</i>	
Feedback-Directed Cross-Layer Optimization of Cloud-Based Functional Actor Applications	605
<i>Andrea Cappelletti (University of Illinois, USA) and Mark Grechanik (University of Illinois, USA)</i>	
Exact Computation of Network Reliability with Sentential Decision Diagrams	617
<i>Delong Li (Jinan University, China), Jiayu Zeng (Jinan University, China), Liangda Fang (Jinan University, China), Chaonan Wang (Jinan University, China), Lin Cui (Jinan University, China), and Quanlong Guan (Jinan University, China)</i>	
Author Index	629
