Intelligent Rehabilitation Assisting Technology

1.	Virtual Co-embodiment Rehabilitation An Innovative Method Integrating Virtual Co-embodiment and Action Observation Therapy	
2.	in Virtual Reality Rehabilitation Feature Fusion of Gramian Angular Field Deep Learning EEG-Based	
	Epileptic Seizure Classification	
3.	Dynamic stability analysis of walking on flat ground and over obstacles in different groups	
4.	Dynamic Three-Dimensional Spinal Model Based on Biological Anatomy Mechanisms	
5.	The clinical efficacy of dynamic balance training instrument in the	
	treatment of Pusher syndrome after stroke	
6.	A Novel Gamified Approach for Collecting Speech Data from Young	
	Children with Dysarthria: Feasibility and Positive Engagement Evaluation	22.5
7		
7.	The Influence of Early Weight-Bearing Training with Real-Time Supervision on Postoperative Rehabilitation of Tibial Shaft Fractures:	
	Case Series Report	
8.	A Preliminary Investigation into the Effects of different mobility aids	057
0.	on the Kinematics of the Trunk and Pelvis in the Elderly	
9.	Repetitive Passive Movement Modulates Cortical Dynamics in	
	Subacute Stroke Patients with Sensory Deficits	
10	Research on Rehabilitation Exercise Guidance System based on Action	
	Quality Assessment	
11.	To Adapt Waveforms of Transcutaneous Electrical Stimulation for Effective Relief of Chronic Pain	0.40
17		
12	Facial Expression Recognition and Integration with External Devices: A Computer Vision-Based Alternative Approach to Empower Individuals	
	with Physical Impairments in Restoring Access and Control	
13	Reinforcement Learning-Based human kinetics Estimation from	000
	Kinematics	
14	Design and Implementation of a Finger Rehabilitation Device for	
	Stroke Patients	
15	Motion Retargeting Using Graph Neural Network for Vision-Guided	
	Dexterous Robot Teleoperation	
16	Hypertension identification system for stroke patients based on photoplethysmography device	0.70
17	A Segment Anything Model for Automated Intracranial Aneurysm	
17.	Segmentation in Computed Tomography Angiography Images	
18	Impact of Pattern Design on the Performance of Kirigami-inspired	004
	Flexible Piezoresistive Strain Sensors	
19	A risk prediction system based on machine learning for acute ischemic	
	stroke in patients with atrial fibrillation	
20	EEG-Based Assessment of Bilateral Brain Activation Comparison and	
	Hand Functional Improvement using Virtual Reality Mirror Therapy	
~ 4	Combined with Robot-Assisted Upper Limb Intervention	
21	A Real-Time Acceleration-Based Frailty Detection System for Elderly Car	105
าา	Car	
22	Design of Assisting Sitting to Standing and Lower Limber Walking	
25	Device	
24	Research on measurement system of upper limb by using single	
	monocular web camera and inference AI	
25	Advancing Mobility in Stair Climbing with BART LAB's Intelligent	
	Wheelchair: A Deep Learning Approach to Pose Estimation	
26	Evaluating Face Validity and Patients' Comprehension of	
	a Mobile Tele-Assessment Interface for Detecting Sensory	
	Impairment in Dermatomal Segments among Individuals	100
	with Spinal Cord Injury: A Semi-Structured Interview Study	

Pioneering Rehabilitation Science and Technology	
27. Emotional EEG Prediction Based on Spatial-Temporal Graph	
Convolutional Neural Network	
28. A Pilot Study on Quantitative Muscle Strength Assessment Using EMG	
and Motion Data	
29. A prediction model of continuous lower limb motion based on FOX	1.40
optimized LSTM	
30. A Comprehensive Assessment of Lower Limb Muscle Fatigue through Fusion of sEMG and VMG Signals	154
Fusion of Service and Vivice Signals	
31. Development of a Bionic Massage Robot Based on the Seating Knee- Adjustment Manipulation	160
32. The Potential of Seat Shaking for Balance Improvement in Older Adult	
33. Impact of iWakka Training on Cerebral Blood Flow and Hand Function	105
in Stroke Patients with Left Hemiplegia	
34. Analysis of the Corrective Effects of 3D Printed Orthotic Insoles on	170
Mild Compensatory Scoliosis	
25 Spontaneous cortical activity alterations induced by Tui Na in post	
stroke patients: A pilot resting-state fNIRS study	
36. fNIRS-based Graph Frequency Analysis Quantified the Effect of	
Dopaminergic Medication on Gait in Parkinson's Disease	
37. Clinical research on the method of measuring respiratory cycle based	
on inertial measurement units	
38. A CNN-Transformer Hybrid Network for Hand Gesture Classification	
based on High-Density sEMG	
39. Continuous Prediction of Hand Joint Angles Based on sEMG and Tf-	
LSTM	
40. Research on EEG signal classification method based on brain-	
computer interface control of rehabilitation robot	
41. Effect of Botulinum toxin type A on EMG-based motion detection: a	215
pilot study on post-stroke patients	
42. Brain Rhythmic Activity and Hemodynamic Response During Wrist Extension Induced by Functional Electrical Stimulation	210
43. An Intelligent Signage Color Configuration Workflow Base on Universal	
Design	
44. A Motor Imagery Transfer Learning Approach Based on Riemannian	224
Alignment and Distance Preservation to Local Mean	
45. Reorganization of Undirected and Directed Cortico-muscular	250
Connectivity after Exoneuromusculoskeleton-assisted Poststroke	
Telerehabilitation	
46. Enhanced Feature Extraction with Superlet Transformation for EEG	
Emotion Classification	
47. Feature Selection and Machine Learning for Online Upper Limb	
Spasticity Detection	
48. A fNIRS Study of Brain Activation in Stroke Patients under Three	
Different Walking Modes ·····	
49. Development of a Personalized and Portable Ear-EEG Recording	
System for Enhanced Biopotential Measurements	
50. Finger-wrist Gesture Recognition based on Surface Electromyography	
and Inertial Signals	
51. Navigation route planning for visually impaired people based on Ultra	260
Wideband indoor positioning system	
52. Investigation of the reliability of oculomotor assessment of gaze and	272
smooth pursuit with a novel approach	
53. A Primary Study on Ipsilateral Motor Cortex Activation during Unilateral Hand Movements Using EEG-fNIRS-sEMG	
54. Localization of the Upper Extremity Area on the Primary Motor Cortex	
with Transcranial Magnetic Stimulation Figure-of-Eight Coil for Motor	
Rehabilitation: A Clinical Study	
	201

56. Effect of Different Soft Knee Braces on Quadriceps and Hamstring 26 57. Terrain Detection for Lower Limb Prostheses Using Depth Camera 307 58. A Docking Control Method for a Split Nursing Bed 307 59. Advances in sensory feedback based on transcutaneous electrical stimulation 313 60. Effect of visual feedback task-oriented training system on post-stroke publier syndrome 318 61. Performance Validation of Joint Modular Soft Actuators for Finger Joint Stiffness Estimation 322 63. The sensitivity of wearable sensor on fall risk prediction for community-dwelling older people in Hong Kong: A proposective cohort study N/A 64. Toward Improving the Performance of Hand Movement Intention Recognition for Upper Limb Amputees Using Flexible Ultrasound Transducers 338 65. Innovative Methods for "Introduction to Rehabilitation Engineering": a Focus on Fostering Pioneering Competencies 344 66. Validation of Customized Functional Insoles for The Very Elderly with Complex Foot Conditions 348 67. Study of a novel soft robotic actuator for hand rehabilitation 360 69. A design of multi-brain region electrical stimulation system based on real-time feedback regulation of Sta fCuators 364 70. Development of an FEM model of a Spherical Dummy Joint-Soft Actuator Complex for Evaluation of Fracture Rehabilitation Robot with Human-Machine Interaction System 374 71. Design and Devel	Advanced Tehabilitation Device Technology 55. Design and Experiment of a Compact Intelligent Mobile Rehabilitation Exoskeleton Robot for Children with Cerebral Palsy Aged 3 to 6 Years	
57. Terrain Detection for Lower Limb Prostheses Using Depth Camera 301 Assistance 301 58. A Docking Control Method for a Split Nursing Bed 307 59. Advances in sensory feedback based on transcutaneous electrical stimulation 313 60. Effect of visual feedback task-oriented training system on post-stroke pusher syndrome 318 61. Performance Validation of Joint Modular Soft Actuators for Finger Joint Stiffness Estimation 322 62. Design of a rigid-fexible hybrid bionic lower limb robot 328 63. The sensitivity of wearable sensor on fall risk prediction for community-dwelling older people in Hong Kong: A proposective cohort study N/A 64. Toward Improving the Performance of Hand Movement Intention Recognition for Upper Limb Amputees Using Flexible Ultrasound Transducers 338 65. Innovative Methods for "Introduction to Rehabilitation Engineering": a Focus on Fostering Pioneering Competencies 344 66. Validation of Customized Functional Insoles for The Very Elderly with Complex Foot Conditions 348 67. Study of a novel soft robotic actuator for hand rehabilitation Assisted by a Hybrid Soft Robot Poststroke 360 69. A design of Multi-Drain region electrical stimulation system based on real-time feedback regulation online for neuromodulation therapy 364 70. Development of an KEM model of a Spherical Dummy Joint-Soft Actuators 379	56. Effect of Different Soft Knee Braces on Quadriceps and Hamstring	
58. A Docking Control Method for a Split Nursing Bed 307 59. Advances in sensory feedback based on transcutaneous electrical stimulation 313 60. Effect of visual feedback task-oriented training system on post-stroke pusher syndrome 318 61. Performance Validation of Joint Modular Soft Actuators for Finger Joint Stiffness Estimation 322 62. Design of a rigid-flexible hybrid bionic lower limb robot 328 63. The sensitivity of wearable sensor on fall risk prediction for community-dwelling older people in Hong Kong: A proposective cohort study N/A 64. Toward Improving the Performance of Hand Movement Intention Recognition for Upper Limb Amputees Using Flexible Ultrasound Transducers 338 65. Innovative Methods for "Introduction to Rehabilitation Engineering": a Focus on Fostering Pioneering Competencies 344 66. Validation of Customized Functional Insoles for The Very Elderly with Complex Foot Conditions 348 67. Study of a novel soft robotic actuator for hand rehabilitation metabilitation Assisted by a Hybrid Soft Robot Poststroke 360 69. A design of multi-brain region electrical stimulation system based on real-time feedback regulation online for neuromodulation therapy 364 70. Development of a Netrical Stimulation System 379 71. Design and Development of a Wrist-Hand Integrated Rehabilitation Robot with Human-Machine Interaction System 379 72. Analysis of Fing	57. Terrain Detection for Lower Limb Prostheses Using Depth Camera	
59. Advances in sensory feedback based on transcutaneous electrical 313 60. Effect of visual feedback task-oriented training system on post-stroke 318 61. Performance Validation of Joint Modular Soft Actuators for Finger 318 61. Performance Validation of Joint Modular Soft Actuators for Finger 322 62. Design of a rigid-flexible hybrid bionic lower limb robot 328 63. The sensitivity of wearable sensor on fall risk prediction for 328 64. Toward Improving the Performance of Hand Movement Intention Recognition for Upper Limb Amputes Using Flexible Ultrasound Transducers 338 65. Innovative Methods for "Introduction to Rehabilitation Engineering": a 344 66. Validation of Customized Functional Insoles for The Very Elderly with 348 67. Study of a novel soft robotic actuator for hand rehabilitation 354 68. Effects of Sensorimotor-integrated (SMI) Wrist/hand Rehabilitation 364 70. Development of an FEM model of a Spherical Dummy Joint-Soft 364 71. Development of a NEM model of a Spherical Dummy Joint-Soft 364 72. Analysis of Finger Motions for Assisting Spoon Scooping with Soft 377 73. A Multimodal Knee Exoskeleton for Fracture Rehabilitation 379 73. A Multimodal Knee Exoskeleton for Fracture Rehabilitation <td< td=""><td>Assistance</td><td></td></td<>	Assistance	
60. Effect of visual feedback task-oriented training system on post-stroke 318 61. Performance Validation of Joint Modular Soft Actuators for Finger 318 61. Performance Validation of Joint Modular Soft Actuators for Finger 322 62. Design of a rigid-Rexible hybrid bionic lower limb robot 328 63. The sensitivity of wearable sensor on fall risk prediction for community-dwelling older people in Hong Kong: A proposective N/A 64. Toward Improving the Performance of Hand Movement Intention Recognition for Upper Limb Amputees Using Flexible Ultrasound Transducers 338 65. Innovative Methods for "Introduction to Rehabilitation Engineering": a 334 66. Validation of Customized Functional Insoles for The Very Elderly with Complex Foot Conditions 348 67. Study of a novel soft robotic actuator for hand rehabilitation 354 354 68. Effects of Sensorimotor-integrated (SMI) Wrist/hand Rehabilitation 360 369 360 69. A design of multi-brain region electrical stimulation system based on 374 374 374 70. Development of an FEM model of a Spherical Dummy Joint-Soft 374 374 374 71. Design and Development of a Wrist-Hand Integrated Rehabilitation 376 374 374 72. Analysis of Finger Motions	58. A Docking Control Method for a Split Nursing Bed	
60. Effect of visual feedback task-oriented training system on post-stroke 318 61. Performance Validation of Joint Modular Soft Actuators for Finger 318 61. Performance Validation of Joint Modular Soft Actuators for Finger 322 62. Design of a rigid-Rexible hybrid bionic lower limb robot 328 63. The sensitivity of wearable sensor on fall risk prediction for community-dwelling older people in Hong Kong: A proposective N/A 64. Toward Improving the Performance of Hand Movement Intention Recognition for Upper Limb Amputees Using Flexible Ultrasound Transducers 338 65. Innovative Methods for "Introduction to Rehabilitation Engineering": a 334 66. Validation of Customized Functional Insoles for The Very Elderly with Complex Foot Conditions 348 67. Study of a novel soft robotic actuator for hand rehabilitation 354 354 68. Effects of Sensorimotor-integrated (SMI) Wrist/hand Rehabilitation 360 369 360 69. A design of multi-brain region electrical stimulation system based on 374 374 374 70. Development of an FEM model of a Spherical Dummy Joint-Soft 374 374 374 71. Design and Development of a Wrist-Hand Integrated Rehabilitation 376 374 374 72. Analysis of Finger Motions	59. Advances in sensory feedback based on transcutaneous electrical stimulation	
Joint Stiffness Estimation 322 62. Design of a rigid-flexible hybrid bionic lower limb robot 328 63. The sensitivity of wearable sensor on fall risk prediction for community-dwelling older people in Hong Kong: A proposective cohort study N/A 64.
