2024 IEEE International Conference on Medical Artificial Intelligence (MedAI) **MedAI 2024**

Table of Contents

Foreword	xix
Acknowledgement	xxi
Committee Members	xxii

Automated AI

Multi-Scale Histopathology Image Registration Based on Radiation-Variation Insensitive	1
<i>Haodong Wang (Chongqing University of Posts and Telecommunications, China), Dajiang Lei (Chongqing University of Posts and Telecommunications, China), Jiheng He (Chongqing University of Posts and Telecommunications, China), Yulan Dai (Chongqing University of Posts and Telecommunications, China), and Weisheng Li (Chongqing University of Posts and Telecommunications, China)</i>	
Adapting Segment Anything Model (SAM) through Prompt-Based Learning for Enhanced Protein Identification in Cryo-EM Micrographs	9
<i>Fei He (University of Missouri, USA), Zhiyuan Yang (University of Missouri, USA), Mingyue Gao (University of Missouri, USA), Biplab Poudel (University of Missouri, USA), Newgin Sam Ebin Sam Dhas (University of Missouri, USA), Rajan Gyawali (University of Missouri, USA), Ashwin Dhakal (University of Missouri, USA), Jianlin Cheng (University of Missouri, USA), and Dong Xu (NextGen Precision Health, Bond Life Sciences Center, USA)</i>	
Surgical Instrument Segmentation Network by SAM and Gradient Feature	21
<i>Penglong Zhang (Changchun University of Science and Technology, China; University of Science and Technology, China), Ziyang Zhang (Changchun University of Science and Technology, China; University of Science and Technology, China), and Yongze Tao (Jilin Province Qianwei Hospital, China)</i>	
ComBat-MLE: A Novel Perspective on Developing and Solving ComBat Harmonization Method	26
<i>Yingping Li (Xidian University, China), Emilie Chouzenoux (Université Paris-Saclay, France), Shuiping Gou (Xidian University, China), Peng Zeng (Xidian University, China), Samy Ammari (Université Paris-Saclay, France), and Nathalie Lassau (Université Paris-Saclay, France)</i>	

Cardiopulmonary Resuscitation Skill Assessment Based on Transformer with Temporal Filtering	38
<i>Xiaojuan Shi (Air Force Military Medical University, China), Hailin Sun (Xidian University, China), Ziyu Zhao (Xidian University, China), Ruimin Li (Xidian University, China), Shuiping Gou (Xidian University, China), and Shuqing Sun (Intensive Care Unit, Weifang People's Hospital, China)</i>	

Spectral Clustering Enhanced Classifier Chain Ensemble for Multi-Disease Prediction	44
<i>Chunlin Zhou (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China), Haoran Liu (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China), Zongqing Yang (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China), and Hong Yu (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China)</i>	

Automated Medicine

Knee Osteoarthritis Image Classification Based on A Novel Multi-Granularity Feature Fusion Network	50
<i>Meiling Fu (Chongqing University of Posts and Telecommunications, China), Qinghua Zhang (Chongqing University of Posts and Telecommunications, China), Ruhan Deng (Chongqing University of Posts and Telecommunications, China), and Ying Yang (Chongqing University of Posts and Telecommunications, China)</i>	

Review on Artificial Intelligence in Medicine and Health	59
<i>Hassan Almaeeni (Purdue University, USA)</i>	

A Lung Nodule Labelling and Recognition Method Based on Variational Auto Encoder	67
<i>Shuai Zhang (Chongqing University of Posts and Telecommunications, China) and Qun Liu (Chongqing University of Posts and Telecommunications, China)</i>	

Multi-Channel Seismic Network-Inspired Myocardial Infarction Detection and Localization Models	75
<i>Chuanlin Tang (University of Electronic Science and Technology of China, China), Chunyang Wang (University of Electronic Science and Technology of China, China), Sijia Zhao (University of Electronic Science and Technology of China, China), Boyang Yu (University of Electronic Science and Technology of China, China), Chengsi Luo (University of Electronic Science and Technology of China, China), and Nini Rao (University of Electronic Science and Technology of China, China)</i>	

HCGN: Hierarchical Convolution and Graph Network for Predicting Knee Osteoarthritis	81
<i>Xionghui Yang (Chongqing Key Laboratory of Computational Intelligence, Chongqing University of Posts and Telecommunications, China), Pengju Tang (Chongqing Key Laboratory of Computational Intelligence, Chongqing University of Posts and Telecommunications, China), Kai Zou (Chongqing Key Laboratory of Computational Intelligence, Chongqing University of Posts and Telecommunications, China), and Dawei Dai (Chongqing Key Laboratory of Computational Intelligence, Chongqing University of Posts and Telecommunications, China)</i>	
Deep Learning Method for Predicting ATRX Mutation Status in Gliomas Using Multimodal MRI ...	91
<i>Yapeng Wu (Shaanxi Normal University, China), Rong Liu (Shaanxi Normal University, China), Shuiping Gou (Xidian University, China), Jisheng Li (Shaanxi Normal University, China), Yijie Zhu (Xidian University, China), Chi Zhang (Central South University, China), and Yingping Li (Xidian University, China)</i>	

Collective AI (1)

Ensemble Multi-Kernel Broad Learning System for Disease Diagnosis	97
<i>Fan Yun (South China University of Technology, China), Zhiwen Yu (South China University of Technology, China), Kaixiang Yang (South China University of Technology, China), Ziwei Fan (South China University of Technology, China), Song Sun (Chongqing Normal University, China), and Jianming Lv (South China University of Technology, China)</i>	
Enhancing Single-Source Domain Generalization From CT to MR by Data Augmentation Based on Grayscale Distribution Remapping	105
<i>Xibin Jia (Beijing University of Technology, China), Yiming Zhang (Beijing University of Technology, China), Luo Wang (Beijing University of Technology, China), Fangzhou Liao (Shukun Technology, China), Yicong Mao (Shukun Technology, China), Zhenghan Yang (Capital Medical University, China), and Hui Xu (Capital Medical University, China)</i>	
An Integrated Approach for Improved Mammography Image Classification Using EfficientNet and Attention Mechanism	114
<i>Yangsheng Long (Chongqing University of Science and Technology, China), Mou Zhou (Chongqing University of Science and Technology, China), Shangzhu Jin (Chongqing University of Science and Technology, China; CQUST, China), Jun Peng (Chongqing University of Science and Technology, China, China; CQUST, China), and Yingxu Wang (IEEE; CQUST, China; University of Calgary, Canada)</i>	
A Multi-View Clustering Ensemble via Graph Tensor Learning in Medicine Images	123
<i>Xu Chen (South China University of Technology, China; PengCheng Laboratory, China), Ziyang Dong (South China University of Technology, China), Jichao Bi (Zhejiang Institute of Industry and Information Technology, China), Kaixiang Yang (South China University of Technology, China), Jianming Lv (South China University of Technology, China), and Zhiwen Yu (South China University of Technology, China; PengCheng Laboratory, China)</i>	

Adaptive Tamper Detection and Self-Recovery of Medical Images Based on Image Inpainting	130
<i>Mingyue Li (Shanghai Lida College, China), Jianzhao Li (Shanghai Lida College, China), Guangwei Liu (Shanghai Lida College, China), Ziqian Liu (Shanghai Lida College, China), Xiangdong Tian (Shanghai Lida College, China), and Shaomin Zhang (Shanghai Lida College, China)</i>	

Collective AI (2)

Pre-Training and Fine-Tuning Transformer for Brain Network Classification	136
<i>Jia Li (Beijing University of Technology, China), Gan Liu (Beijing University of Technology, China), and Junzhong Ji (Beijing University of Technology, China)</i>	
Adaptive Fuzzy Weighted Broad Network for Imbalanced Medical Diagnosis	145
<i>Leqi Tang (South China University of Technology, China), Wuxing Chen (South China University of Technology, China), Zhiwen Yu (South China University of Technology, China), Huan Wang (Guangdong Institute of Scientific & Technical Information, Industrial Technology Research Center, China), Jianming Lv (South China University of Technology, China), and Kaixiang Yang (South China University of Technology, China)</i>	
Hybrid Collaborative Ensemble Clustering for Cancer Gene Expression Data	153
<i>Yi Li (Huaqiao University, China) and Yifan Shi (Huaqiao University, China)</i>	
Unsupervised Cross-Modal Medical Image Retrieval with Ensemble Prototype Alignment	161
<i>Yishan Yao (South China University of Technology, China), Xiaqing Liu (South China University of Technology, China), Zhiwen Yu (South China University of Technology, China), Jianming Lv (South China University of Technology, China), Yang Hu (University of Oxford, China), and Kaixiang Yang (South China University of Technology, China)</i>	
A Comparative Study of Different Deep Learning Models Over Diverse Mammography Datasets .	168
<i>Sixiao Hu (Chongqing University of Science and Technology (CQUST), China), Mou Zhou (CQUST, China), Shangzhu Jin (CQUST, China), Jun Peng (Chongqing University of Science and Technology, China), and Yingxu Wang (CQUST, China; University of Calgary, Canada; FIEEE)</i>	
Endoscope Posture Calculation Method for Minimally Invasive Surgery	174
<i>Shuo Du (Changchun University of Science and Technology, China; University of Science and Technology, China), Yongze Tao (Jilin Province Qianwei Hospital, China), and Weili Shi (Changchun University of Science and Technology, China; University of Science and Technology, China)</i>	

Computational Systems Biology

Mining Underlying Structural Insights via High-Order Interactions	180
<i>Meilin Liu (Shanxi University, China) and Wenping Zheng (Shanxi University, China)</i>	

Parallel Computing-Based Genome-Wide Epistasis Analysis of CSF Total Tau in ADNI Cohort	192
<i>Qiushi Zhang (Northeast Electric Power University, China), Junfeng Liu (Northeast Electric Power University, China), Yizhou Chen (Carnegie Mellon University, USA), Lang Ao (Northeast Electric Power University, China), and Dandan Chen (Northeast Electric Power University, China)</i>	
CLGraph: A Contrastive Learning-Based Multimodal Fusion Approach for Spatial Domain Identification	201
<i>Sijing Du (School of Computer Science and Technology, Harbin Institute of Technology (Shenzhen), China), Yangen Zhan (Tsinghua University, China), and Yongbing Zhang (School of Computer Science and Technology, Harbin Institute of Technology (Shenzhen), China)</i>	
CytoFlow: A Novel Computational Method to Construct Signal Transduction Networks at Single-Cell Resolution Based on Flow Networks	212
<i>Yi Dai (University of California, USA), Ziheng Duan (University of California, USA), Siwei Xu (University of California, USA), and Jing Zhang (University of California, USA)</i>	
Gene Name Recognition in Gene Pathway Figures Using Siamese Networks	218
<i>Micheal Olaolu Arowolo (Xavier University of Louisiana, USA), Muhammad Azam (University of Missouri, USA), Fei He (University of Missouri, USA), Mihail Popescu (University of Missouri, USA), and Dong Xu (University of Missouri, USA)</i>	

Digital and Precise Medicine (1)

Region-Aware Multiple Instance Learning for Whole Slide Image Classification: Dual-layer Attention Network Inspired by Pathologists	231
<i>Hailun Cheng (Tsinghua university, China), Shenjin Huang (Faculty of Computing, Harbin Institute of Technology, China), Runming Wang (Tsinghua University, China), Linghan Cai (School of Computer Science and Technology, Harbin Institute of Technology, China), and Yongbing Zhang (School of Computer Science and Technology, Harbin Institute of Technology, China)</i>	
T-M Net: A Fusion Convolutional Neural Network Method for Lung Aging Assessment	239
<i>Tangbin Tian (Qilu University of Technology (Shandong Academy of Sciences), China; Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Jingshan Pan (Qilu University of Technology (Shandong Academy of Sciences), China; Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Ge Jing (Qilu University of Technology (Shandong Academy of Sciences), China; Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Na Li (Qilu University of Technology (Shandong Academy of Sciences), China; Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Dexin Yu (Qilu Hospital of Shandong University, China), and Liping Zuo (Qilu Hospital of Shandong University, China)</i>	

Accurate Neuroanatomy Segmentation Based on Voxel-Wise Densely Predicted Network Using Multi-Task Learning	249
<i>Jiaxin Yang (Chongqing University of Posts and Telecommunications, China), Ming Zhao (Chongqing University of Posts and Telecommunications, China), and Hwei Cheng (Chongqing University of Posts and Telecommunications, China)</i>	

Visual Reality Based Aortic Vessel Inner Diameter Precise Measurement	254
<i>Yuqi Feng (Beijing University of Posts and Telecommunications, China), Di Zhang (Beijing University of Posts and Telecommunications, China), and Tao Luo (Beijing University of Posts and Telecommunications, China)</i>	

Digital and Precise Medicine (2)

Predicting Complications of Cirrhosis using Synthetic Data Generation Enhanced Dynamic Classifier Selection	260
<i>Zixin Shi (Chongqing Medical University, China), Linjun Huang (Chongqing Medical University, China), and Haolin Wang (Chongqing Medical University, China)</i>	

Plasma Glucose Reconstruction Based on Data Driven Real-Time Monitoring of CGM Devices	268
<i>Hengsheng Tang (Liaocheng University, China), Yining Zhang (Liaocheng University, China), Chao Yang (Shenzhen PiAn Biomedical Technology Co., Ltd, China), Lina Zhou (Liaocheng University, China), Chaojun Zhang (Liaocheng University, China), Shufeng Zhou (Liaocheng University, China), and Lishan Qiao (Shandong Jianzhu University, China)</i>	

Smart Microscope for Online Detection of Hepatocellular Carcinoma	276
<i>Tianyu Ma (Binjiang Institute of Zhejiang University, China), Penghui Xin (Binjiang Institute of Zhejiang University, China), Jiahui Yu (Zhejiang University; Binjiang Institute of Zhejiang University, China), and Yingke Xu (Zhejiang University; Binjiang Institute of Zhejiang University, China)</i>	

Dual-Domain Image Reconstruction Network Integrating Residual Attention for Sparse View Computed Tomography	282
<i>Tao He (Chongqing University of Posts and Telecommunications, China), Xiaoming Jiang (Chongqing University of Posts and Telecommunications, China), Jia Wu (Chongqing University of Posts and Telecommunications, China), Wanyun Wang (Chongqing University of Posts and Telecommunications, China), Han Zhang (Chongqing University of Posts and Telecommunications, China), and Zhangyong Li (Chongqing University of Posts and Telecommunications, China)</i>	

Medical Image Super-Resolution Algorithm Based on Multi-Scale Feature Aggregation	288
<i>Xinyu Han (Southwest Jiaotong University, China) and Xun Gong (Southwest Jiaotong University, China; Engineering Research Center of Sustainable Urban Intelligent Transportation Ministry of Education, China; Southwest Jiaotong University, China; Province Southwest Jiaotong University, China)</i>	

Digital and Precise Medicine (3)

Emotional EEG Recognition and Classification Based on GCN Combined with LSTM	294
<i>Haohuan Kong (University of Posts and Telecommunications, China), Xicheng Lou (University of Posts and Telecommunications, China), and Zhangyong Li (University of Posts and Telecommunications, China)</i>	
A Survival Prediction Model for Colorectal Cancer Based on Multimodal Learning	302
<i>Jin Dai (Chongqing University of Posts and Telecommunications, China), Ranyi Liao (Chongqing University of Posts and Telecommunications, China), and Feng Hu (Chongqing University of Posts and Telecommunications, China)</i>	
A Lightweight Deep Learning Model for Breast Cancer Segmentation on Small Datasets	313
<i>Xikai Luo (Zhejiang University, China), Tianyu Ma (Binjiang Institute of Zhejiang University, China), Zhi Fan (Zhejiang University, China), Danqing Yin (Zhejiang University, China), Jiahui Yu (Zhejiang University; Binjiang Institute of Zhejiang University, China), and Yingke Xu (Zhejiang University; Binjiang Institute of Zhejiang University, China)</i>	
A Model for the Prediction of Ventilator-Associated Conditions in Patients with Acute Respiratory Failure	319
<i>Zhichen Zhu (East China Normal University, China), Jiang Du (Jiaotong University, China), Ning Kang (East China Normal University, China), Kaixuan Li (East China Normal University, China), and Yixiang Chen (East China Normal University, China)</i>	
DAC-UNet: Dual Attention CNN-Enhanced CswinUnet for Gastric Cancer Pathological Image Segmentation	325
<i>Tao Hu (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Jingshan Pan (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Na Li (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Tangbin Tian (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), and Shengyu Liu (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China)</i>	

GLR-Net:Generic Latent Representation Network for Missing Modality Brain Tumor Segmentation	331
<i>Lifang Zhou (Chongqing University of Posts and Telecommunication, China), Xiaoqing Li (Chongqing University of Posts and Telecommunication, China), Yu Jiang (Chongqing University of Posts and Telecommunication, China), and Jun Hu (Southwest Hospital Third Military Medical University, China)</i>	

Generative AI (1)

PIRTRE-C: A Two-Stage Retrieval and Reranking Enhanced Framework for Improving Chinese Psychological Counseling	337
<i>Qiyang Wang (Shanghai Jiao Tong University, China), Ling-I Wu (Shanghai Jiao Tong University, China), and Guoqiang Li (Shanghai Jiao Tong University, China)</i>	

Reunderstanding of the Classification of Syndromes in the Traditional Chinese Medicine Classic "Shang Han Lun" Based on Large Language Models	348
<i>Haotian Li (Beijing University of Chinese Medicine, China), Youjuan Hou (Institute of Information on Traditional Chinese Medicine, China Academy of Chinese Medical Sciences, China), Jianqin Yang (Wangjing Hospital, China Academy of Chinese Medical Sciences, China), Yuewei Song (Wangjing Hospital, Beijing University of Chinese Medicine, China), Yanjun Liu (Institute of Basic Theory for Chinese Medicine, China Academy of Chinese Medical Sciences, China), and Sile Hu (Institute of Basic Theory for Chinese Medicine, China Academy of Chinese Medical Sciences, China)</i>	

Accelerating Complex Disease Treatment through Network Medicine and GenAI: A Case Study on Drug Repurposing for Breast Cancer	354
<i>Ahmed Abdeen Hamed (Northeastern University, China; iMol Polish Academy of Sciences, Poland), Tamer E. Fandy (Texas Tech University HSC, China), and Xindong Wu (Hefei University of Technology, China)</i>	

AiMed: Artificial Intelligent Large Language Model For Medicine in China	360
<i>Jinhua Du (Tsinghua University, China), Xiaoying Li (Institute of Medical Information, Chinese Academy of Medical Sciences, China), Zexun Jiang (Communication University of China, China), Yuyang Liu (Institute of Medical Information, Chinese Academy of Medical Sciences, China), Hao Yin (Tsinghua University, China), and Hui Liu (Institute of Medical Information, Chinese Academy of Medical Science, China)</i>	

Revolutionizing Digital Health with Generative AI: User Experiences and Healthcare Performance	366
<i>Kainan Deng (The University of Queensland, Australia), Xiang Liu (The University of Queensland, Australia), Dongming Xu (The University of Queensland, Australia), and Avijit Sengupta (The University of Queensland, Australia)</i>	

Generative AI (2)

Multi-View Feature Fusion Encoding and Memory-Driven Report Generation for OCTA Fundus Image Diagnosis	372
<i>Ruirui Li (Beijing University of Chemical Technology, China), Menghan Yue (Beijing University of Chemical Technology, China), Xiaoqiang Jin (Infervision Medical Technology Co., Ltd, China), and Ye Wang (Chongqing University of Posts and Telecommunications, China)</i>	
MOADM: Manifold Optimization Adversarial Diffusion Model for Cross-Modality Medical Image Translation	380
<i>Yixin Xiang (Chongqing University of Posts and Telecommunications, China), Xianhua Zeng (Chongqing University of Posts and Telecommunications, China), Dajiang Lei (Chongqing University of Posts and Telecommunications, China), and Tao Fu (Chongqing University of Posts and Telecommunications, China)</i>	
KEMedGPT: Intelligent Medical Pre-Consultation with Knowledge-Enhanced Large Language Model	386
<i>Cai Wang (East China Normal University, China), Qian Chen (East China Normal University, China), Weizi Shao (East China Normal University, China), and Xiaofeng He (East China Normal University, China)</i>	
Reinforcement Explainability of ChatGPT Prompts by Embedding Breast Cancer Self-Screening Rules into AI Responses	392
<i>Yousef Khan (Sano Centre for Computational Medicine, Poland) and Ahmed Abdeen Hamed (Northeastern University, USA)</i>	

Infrastructure and Knowledge-based AI (1)

Joint Explicit and Implicit Cross-Modal Interaction Network for Anterior Chamber Inflammation Diagnosis	398
<i>Qian Shao (Zhejiang University, China), Ye Dai (Sun Yat-sen University, China), Haochao Ying (Zhejiang University, China), Kan Xu (Sun Yat-sen University, China), Jinhong Wang (Zhejiang University, China), Wei Chi (Sun Yat-sen University, China), and Jian Wu (Zhejiang University, China)</i>	
Emotional Interaction Activities for Home Robots Based on EEG Emotion Recognition	407
<i>Tie Hua Zhou (Northeast Electric Power University, China), Chunxu Yang (Northeast Electric Power University, China), Ling Wang (Northeast Electric Power University, China), and Dongsheng Li (Northeast Electric Power University, China)</i>	
A Mixed Graph Convolutional Network with Cross-Distance Syntactic Aware for Aspect-Based Sentiment Analysis	418
<i>Ruhan Deng (Chongqing University of Posts and Telecommunications, China), Qinghua Zhang (Chongqing University of Posts and Telecommunications, China), Man Gao (Chongqing University of Posts and Telecommunications, China), Meiling Fu (Chongqing University of Posts and Telecommunications, China), Ye Wang (Chongqing University of Posts and Telecommunications, China), and Guoyin Wang (Chongqing University of Posts and Telecommunications, China)</i>	

Class Incremental Learning for Knowledge Acquisition Based on Prototype Network Gating Mechanism	429
<i>Yuming Feng (University of Chinese Academy of Sciences; CAS Key Laboratory of Network Data Science and Technology, Institute of Computing Technology, Chinese Academy of Sciences), Xiaolong Jin (University of Chinese Academy of Sciences; CAS Key Laboratory of Network Data Science and Technology, Institute of Computing Technology, Chinese Academy of Sciences), Haozhe Liang (Institute of Systems Engineering, Academy of Military Science), and Jiafeng Guo (University of Chinese Academy of Sciences; CAS Key Laboratory of Network Data Science and Technology, Institute of Computing Technology, Chinese Academy of Sciences)</i>	
Machine Learning to Predict Surgery Duration: Towards Implementing AI and Digital Twin for Effective Scheduling	435
<i>Madhu Sudan Sapkota (University of Essex, UK), Faiyaz Doctor (University of Essex, UK), Hugo Herrera (ESNEFT, UK), Michael Kampaouridis (University of Essex, UK), and Xinan Yang (University of Essex, UK)</i>	

Infrastructure and Knowledge-based AI (2)

DCP++: A New Registration Method for Brain MRI	441
<i>Yucheng Liao (Zhejiang University, China), Bohan Lei (Zhejiang University, China), Yueting Zhuang (Zhejiang University, China), Xiaoyin Xu (Zhejiang University, China), and Min Zhang (Zhejiang University, China)</i>	
Cycle Based Link Prediction Method for Cross-Granularity Contrast Learning	449
<i>Zehua Zhang (Taiyuan University of Technology, China), Feihu Zheng (Taiyuan University of Technology, China), Bin Wang (Taiyuan University of Technology, China), and Surui Yan (Taiyuan University of Technology, China)</i>	
Fuzzy Linguistic Concept Rule Extraction Algorithm for Ventilator-Associated Complications in Patients with Acute Respiratory Failure	456
<i>Ning Kang (East China Normal University, China), Zhichen Zhu (East China Normal University, China), Ziyi Jin (East China Normal University, China), and Yixiang Chen (East China Normal University, China)</i>	
AgentMV: A Deep Reinforcement Learning Model For Mechanical Ventilation	465
<i>Zhichen Zhu (East China Normal University, China), Jiang Du (Jiaotong University, China), and Yixiang Chen (East China Normal University, China)</i>	

CQUPT-HDS: Health Big Data Security Monitoring Scheme for the Whole Life Cycle	476
<i>Yunpeng Xiao (Chongqing University of Posts and Telecommunications, China), Yun Lu (Chongqing University of Posts and Telecommunications, China), Xiaohan Liu (Chongqing University of Posts and Telecommunications, China), Peiyan Pei (Chongqing University of Posts and Telecommunications, China), Dengke Zhao (Chongqing University of Posts and Telecommunications, China), Yutong Guo (Chongqing University of Posts and Telecommunications, China), Zhenzhou Xue (Chongqing University of Posts and Telecommunications, China), and Guoyin Wang (Chongqing University of Posts and Telecommunications, China)</i>	

Infrastructure and Knowledge-based AI (3)

Ensemble Causal Structure Learning for Data with Mixed Feature Relationships: Application to Lung Cancer	482
<i>Tong Ye (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China), Chenglin Zhang (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China), Xiwen Chen (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China), and Hong Yu (Chongqing Key Laboratory of Computational Intelligence (Chongqing University of Posts and Telecommunications), China)</i>	
A Knowledge Graph Completion Model with Path-Specific Learning	491
<i>Xiulin Zheng (Key Laboratory of Knowledge Engineering with Big Data (The Ministry of Education of China), China; Hefei University of Technology, China), Zan Zhang (Key Laboratory of Knowledge Engineering with Big Data (The Ministry of Education of China), China; Hefei University of Technology, China), Rui Li (Key Laboratory of Knowledge Engineering with Big Data (The Ministry of Education of China), China; Hefei University of Technology, China; Inspur Academy of Science and Technology, China), and Xindong Wu (Key Laboratory of Knowledge Engineering with Big Data (The Ministry of Education of China), China; Hefei University of Technology, China)</i>	
Ma-HGNN+: A Hypergraph Neural Network for Depth Analysis of Multimodal Data	501
<i>Zhangyu Mei (Shandong University, China), Xiao Bi (Shandong University, China), Yating Wen (Chongqing Traditional Chinese Medicine Hospital, China), Xianchun Kong (Heze Municipal Hospital, China), and Hao Wu (Shandong University, China)</i>	
FoTNet: An Effective Deep Learning Model for Preoperative Differentiation of Common Malignant Brain Tumors	509
<i>Chenyi Hong (Zhejiang University, China), Hualiang Wang (The Hong Kong University of Science and Technology, China), Zhuoxuan Wu (Zhejiang University, China), Zuozhu Liu (Zhejiang University, China), and Junhui Lv (Zhejiang University, China)</i>	

Learning Rate Optimization for Medical Image Classification Based on Federated Learning and Gaussian Process Regression	520
<i>Fei Tang (Chongqing University of Posts and Telecommunications, China), Tianhao Cao (Chongqing University of Posts and Telecommunications, China), Ping Wang (Chongqing University of Posts and Telecommunications, China), and Yunpeng Xiao (Chongqing University of Posts and Telecommunications, China)</i>	

Infrastructure of Medicine (1)

VSSI-L1N: EEG Extended Source Imaging Based on Variation Sparsity and Nuclear-Norm Regularization	526
<i>Hang Jiang (Chongqing University of Posts and Telecommunications, China), Ke Liu (Chongqing University of Posts and Telecommunications, China), Hong Yu (Chongqing University of Posts and Telecommunications, China), and Guoyin Wang (Chongqing University of Posts and Telecommunications, China)</i>	
Organ-Aware Transformer for Medical Image Segmentation	535
<i>Lihong Qiao (Chongqing University of Posts and Telecommunications, China), Huasheng Pang (Chongqing University of Posts and Telecommunications, China), Yucheng Shu (Chongqing University of Posts and Telecommunications, China), Xinghai Long (AI LAB of Chongqing Changan Automobile, China), Chuang Liu (Chongqing University of Posts and Telecommunications, China), and Ping Yi (Chongqing University of Posts and Telecommunications, China)</i>	
Predicting Sepsis Onset in ICU Patients Using Machine Learning and Feature Selection: A Case Study of MIMIC-IV Data	546
<i>Wenhong Shan (Shandong University, China), Duanchen Sun (Shandong University, China), and Zhi-Ping Liu (Shandong University, China)</i>	
DKGC-LSTM:Fusion of Domain Knowledge to Guide CNN and LSTM for Heart Failure Risk Prediction	552
<i>Zhijun Wang (Chongqing University of Posts and Telecommunications, China), Hongyu Long (Chongqing University of Posts and Telecommunications, China), Hong Yu (Chongqing University of Posts and Telecommunications, China), and Li Tan (Chongqing University of Posts and Telecommunications, China)</i>	
Cancer Gene Selection Algorithm Based on Neighborhood Rough Sets Combined with Quantum Genetic Techniques	558
<i>Jiangtao Zhang (Chongqing University of Posts and Telecommunications, China), Xiaoxia Zhang (Chongqing University of Posts and Telecommunications, China), Wenjing Lei (Lanzhou University, China), and Guoyin Wang (Chongqing Normal University, China)</i>	
Computational Analysis and Modeling of Gut Microbe Data: ASD Identification and Potential Biomarkers Detection	564
<i>Yannuo Feng (Northeast Normal University, China), Meiwen Gao (Northeast Normal University, China), and Chang Lu (Northeast Normal University, China)</i>	

Infrastructure of Medicine (2)

Image Semantic Information Fusion for MR Brain Tissue Segmentation	571
<i>Xiao Luan (Chongqing University of Posts and Telecommunications, China) and Jiamin Wang (Chongqing University of Posts and Telecommunications, China)</i>	
Deep Learning-Based Recurrence Risk Prediction for Differentiated Thyroid Cancer Using Local Clustering Contrastive Learning	580
<i>Junhao Zhu (Chongqing University of Posts and Telecommunications, China), Pengbo Gao (Chongqing University of Posts and Telecommunications, China), Feng Hu (Chongqing University of Posts and Telecommunications, China), and Hong Yu (Chongqing University of Posts and Telecommunications, China)</i>	
TCMRD-KG: Design and Development of a Rheumatism Knowledge Graph Based on Ancient Chinese Literature	588
<i>Haotian Li (Beijing University of Chinese Medicine, China), Congmin Xia (Guang'anmen Hospital, China Academy of Chinese Medical Sciences, China), Youjuan Hou (Institute of Information on Traditional Chinese Medicine, China Academy of Chinese Medical Sciences, China), Sile Hu (Institute of Basic Theory for Chinese Medicine, China Academy of Chinese Medical Sciences, China), Jiang Quan (Guang'anmen Hospital, China Academy of Chinese Medical Sciences, China), and Yanjun Liu (Institute of Basic Theory for Chinese Medicine, China Academy of Chinese Medical Sciences, China)</i>	
An Antigen Design Method Based on Molecular Dynamics and Deep Learning	594
<i>Hongtu Li (Chongqing University of Posts and Telecommunications, China) and Shuangyan Zhou (Chongqing University of Posts and Telecommunications, China)</i>	
Predicting Mortality Risk in Heart Failure Patients: Insights from COX Regression and Machine Learning	601
<i>Jiaojiao Wang (Institute of Automation, CAS, China), Yuwen Bu (Beijing University of Technology, China), Ruiguang Wang (Beijing University of Technology, China), Xin Li (Beijing Institute of Technology, China), Zhixuan Qi (Cornell University, USA), Xiliang Liu (Beijing University of Technology, China), Zhidong Cao (Institute of Automation, CAS, China), Hong Wang (The People's Hospital of Guangxi, Zhuang Autonomous Region, China), and Daniel Dajun Zeng (Institute of Automation, CAS, China)</i>	

Trustworthy AI

Self-Supervised Representation Matching Model for Treatment Effect Estimation	607
<i>Yaoyao Zhao (University of Jinan, China), Fan Yang (Shandong University, China), Xiaohui Yang (University of Jinan, China), Jiayi Teng (Shandong Normal University, China), Xiaobin Zhang (University of Jinan, China), and Qian Li (Shandong University, China)</i>	

MoCaGCN: Cancer Subtype Classification by Developing Causal Graph Structure Learning	617
<i>Xiaobin Zhang (University of Jinan, China), Fan Yang (Shandong University, China), Xiaohui Yang (University of Jinan, China), Qian Li (Shandong University, China), Na Li (Shandong Normal University, China), and Yaoyao Zhao (University of Jinan, China)</i>	
CautionGCN: Cancer Subtype Classification by Developing Causal Multi-Head Autoencoder and Graph Convolutional Network	626
