Volume 13138

Proceedings of SPIE 0277-786X, V. 13138

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Applications of Machine Learning 2024*, edited by Michael E. Zelinski, Tarek M. Taha, Barath Narayanan, Abdul A. Awwal, Khan M. Iffekharuddin, Proc. of SPIE 13138, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vi *Conference Committee*

HEALTHCARE AND BIOMEDICAL APPLICATIONS

- 13138 04 **Deep learning-based explainable approaches for RNA-seq gene expression data analysis** [13138-3]
- 13138 05 **Left and right lung-specific method of segmentation in chest radiographs** [13138-4]
- 13138 06 **Keratoconus classification using a novel convolutional neural network architecture and corneal curvature maps** [13138-5]
- 13138 07 **Advancing breast cancer detection with intelligent full-field polarization sensitive optical coherence tomography** [13138-6]

ENVIRONMENTAL APPLICATIONS

- 13138 09 **Assessing the importance of soft labels and probability calibration for sea ice classification in synthetic aperture radar imagery** [13138-8]
- 13138 0A **BurNet: automated deep learning system for fire and smoke detection from drone imagery** [13138-9]
- 13138 0E **Detecting decision-makers of an AI system in the feature maps under uncertainty by leveraging Bayesian search theory** [13138-14]

INDUSTRY, NEW METHODS, AND SCIENCE APPLICATIONS I

- 13138 0F **Understanding convolutional neural network classification errors caused by image quality degradation** [13138-15]
- 13138 0H **Convolutional neural networks for engineering design validation** [13138-17]
- 13138 0I **Resolution enhancement with machine learning** [13138-18]
- 13138 0J **Machine vision enabled characterization of defects and their fatigue effects in additively manufactured steels** [13138-19]

INDUSTRY, NEW METHODS, AND SCIENCE APPLICATIONS II

- 13138 OM **Nondestructive pipeline monitoring using intelligent fiber-optic acoustic sensor system** [13138-21]
- 13138 ON **Optimizing deep learning performance in PCB x-ray inspection through synthetic data tuner** [13138-23]
- 13138 OO **SHIELD-PCB: securing hardware inspection with enhanced learning and defense against adversarial examples in printed circuit boards images** [13138-24]

INDUSTRY, NEW METHODS, AND SCIENCE APPLICATIONS III

- 13138 OP **Optimizing the segment anything model for PCB component segmentation in x-ray images through few-shot parameter-efficient fine-tuning** [13138-25]
- 13138 OQ **Evergreen missions: modeling long term user interests in e-commerce** [13138-26]

INDUSTRY, NEW METHODS, AND SCIENCE APPLICATIONS IV

- 13138 OS **Modeling and simulation of noise vectors for improving diversity and quality of a generative AI** [13138-30]
- 13138 OT **Analysis of rotation phenomena of speckle patterns in an output light spot from multimode optical fiber with deep learning scheme** [13138-31]
- 13138 OU **GISD: generation of corner cases in infrared autonomous driving dataset with stable diffusion** [13138-32]
- 13138 OV **Automatic weapon detection using hand poses** [13138-33]

POSTER SESSION

- 13138 OX **Brain tumor identification with MRI imaging using convolutional neural networks** [13138-35]
- 13138 OY **A novel multimodal deep learning approach to shelf life estimation of agricultural produce** [13138-36]
- 13138 OZ **Transfer learning and hybrid models for the classification of eye diseases on retinal images** [13138-37]
- 13138 10 **YOLO driven dashcam analysis for road surface defect and pothole detection** [13138-38]
- 13138 11 **A PyTorch benchmark for high-contrast imaging post processing** [13138-39]

- 13138 15 **Radio frequency channel estimation with generative machine learning** [13138-43]
- 13138 16 **Automated detection and classification of broadleaf and grassy weeds in fallowed fields through vision transformer** [13138-44]
- 13138 17 **Investigation of unsupervised and supervised hyperspectral anomaly detection** [13138-45]
