

PROCEEDINGS OF SPIE

Laser Communication and Propagation through the Atmosphere and Oceans XIII

**Jaime A. Anguita
Jeremy P. Bos
David T. Wayne**
Editors

**20–21 August 2024
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 13147

Proceedings of SPIE 0277-786X, V. 13147

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Communication and Propagation through the Atmosphere and Oceans XIII*, edited by Jaime A. Anguita, Jeremy P. Bos, David T. Wayne, Proc. of SPIE 13147, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

PROPAGATION OF ULTRASHORT PULSED LASERS IN THE ATMOSPHERE

- 13147 02 **Ultrashort pulsed laser research results at the U.S. Army DEVCOM Analysis Center (Invited Paper)** [13147-1]
- 13147 04 **Propagation of laser pulse trains through the air** [13147-3]

TURBULENCE EFFECTS ON FREE SPACE OPTICAL SYSTEMS

- 13147 05 **Anisotropic optical turbulence in the stably stratified atmosphere (Invited Paper)** [13147-4]
- 13147 06 **Coherent mode decomposition of Kolmogorov optical turbulence in a finite aperture** [13147-5]
- 13147 07 **Analysis of the impact of turbulence strength fluctuations on the performance of atmospheric electro-optics systems** [13147-6]
- 13147 08 **Approximation of wave optics calculation of scintillation in horizontal free space optical links** [13147-7]
- 13147 09 **Architecture and analysis of telescope arrays for deep space optical communication** [13147-25]

ORBITAL ANGULAR MOMENTUM (OAM) BEAMS IN TURBULENCE

- 13147 0A **Improved detection of vortex superpositions in turbulence using optimal transport theory: simulations and experiments** [13147-9]
- 13147 0B **Phase screen modeling of vortex beam propagation through a turbid medium** [13147-11]

EXPERIMENTS CHARACTERIZING THE FREE SPACE OPTICAL CHANNEL

- 13147 0C **SEETREE: a pioneering optical ground station in Chile (Invited Paper)** [13147-12]
- 13147 0D **2.09-micron laser propagation at 1-km range through diverse atmospheric conditions** [13147-13]

- 13147 OF **Transmission of single photons through atmospheric turbulence with spatial diversity** [13147-15]
- 13147 OH **Colocated transmissometer for EO atmospheric measurements** [13147-17]

CHARACTERIZING LASER BEAM PROPAGATION THROUGH ATMOSPHERIC TURBULENCE

- 13147 OI **Phenomenology of weather-driven diurnal and nocturnal optical turbulence trends** [13147-18]
- 13147 OJ **Turbulence strength experimental measurements for improved detection in free space optical communications** [13147-19]
- 13147 OK **Simultaneous high bandwidth data reception and irradiance variance monitoring for free space optical links (Invited Paper)** [13147-20]
- 13147 OL **Demonstration of a mid-wave infrared (10 μ m) free space optical communication system through artificial fog** [13147-21]
- 13147 OM **1064nm laser propagation test and analysis at the TISTEF 1 kilometer range** [13147-22]

ADVANCES IN FREE SPACE OPTICAL COMMUNICATIONS

- 13147 OO **Diversity of repeat-coded waveforms with forward-error correction and interleaving in fading atmospheric channels (Invited Paper)** [13147-24]

IMAGING IN RANDOM MEDIA: ANALYSIS AND TECHNIQUES

- 13147 OQ **Wavefront sensor based on angle selectivity of an optical filter (Invited Paper)** [13147-27]
- 13147 OR **Turbulence spectral models and their effect on anisoplanatic error** [13147-28]
- 13147 OS **Optical turbulence model-based imaging analysis employing eddy length scale and refractive index statistics** [13147-30]

APPLICATIONS OF AI IN ATMOSPHERIC PROPAGATION AND IMAGING

- 13147 OT **Machine-learning-based image quality prediction from optical turbulence and meteorological observations (Invited Paper)** [13147-31]
- 13147 OU **Channel selection of hybrid communication systems using machine learning** [13147-32]

POSTER SESSION

- 13147 0V **Turbulence strength detection with Resistance Temperature Detectors** [13147-34]
- 13147 0X **Characterization of fiber-coupled, 125um InAlAs/InGaAs APDs for free space optics communications** [13147-38]

DIGITAL POSTER SESSION

- 13147 0Y **Free-space optical transceiver enabled by polarization independent liquid crystal on silicon phase modulators** [13147-26]
