Volume 13193

Proceedings of SPIE 0277-786X, V. 13193

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of Clouds and the Atmosphere XXIX*, edited by Evgueni I. Kassianov, Simone Lolli, Proc. of SPIE 13193, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

REMOTE SENSING OF CLOUDS, AEROSOLS, TRACE GASES AND METEOROLOGICAL PARAMETERS I

- 13193 02 **The cloud identification and classification (CIC) algorithm for high spectral resolution observations in the far- and mid-infrared part of the spectrum** [13193-1]
- 13193 03 **Developments of the σ -IASI/F2N radiative transfer model: a new linear-in-T approach for accurate treatment of clouds** [13193-2]
- 13193 04 **Comparative analysis of precipitation scavenging effects on aerosol loading in Shanghai: seasonal variability and implications for air quality management** [13193-4]

REMOTE SENSING OF CLOUDS, AEROSOLS, TRACE GASES AND METEOROLOGICAL PARAMETERS II

- 13193 06 **Estimating surface water loss using WDI and ECI: a climatological study on different land covers** [13193-6]
- 13193 07 **Machine learning techniques for spatial interpolation of the IASI water deficit index (Best Paper Award)** [13193-7]
- 13193 08 **Nitric acid retrieval in the Antarctic atmosphere with all-sky IASI spectra and comparison with aura-MLS observations** [13193-8]
- 13193 09 **GHG measurements using an imaging FTS on a stratospheric balloon: a tech demo for the Arctic Observing Mission** [13193-9]

TECHNOLOGIES, TECHNIQUES AND ALGORITHMS FOR ACTIVE AND PASSIVE REMOTE SENSING I

- 13193 0A **Estimation of BBA plume altitude from cross reference between satellite observations and model simulations** [13193-10]
- 13193 0B **Stereoscopic height estimation of biomass burning aerosol and volcanic ash plumes by the second-generation global imager (SGLI)** [13193-11]
- 13193 0C **Short-range high spectral resolution lidar: a proof-of-concept for aerosol characterization near the source** [13193-12]

TECHNOLOGIES, TECHNIQUES AND ALGORITHMS FOR ACTIVE AND PASSIVE REMOTE SENSING II

- 13193 OE **Utilizing CLAVR-x to model sensitivity of cloud products to satellite sensor performance** [13193-15]
- 13193 OF **Deep-learning-based cloud segmentation and classification for weather monitoring** [13193-16]
- 13193 OH **Precipitation water at the peak cloud liquid water and surface rainfall** [13193-18]
- 13193 OI **Cloud detection for multispectral images of space-based Earth observational sensors using imagery simulation model** [13193-19]
- 13193 OJ **Modeling of atmospheric radiative transfer with polarization effects using scattering phase matrix** [13193-20]

POSTER SESSION

- 13193 OL **Consideration of aerosol injection processes originating from wildfires in a chemical transport model** [13193-23]
- 13193 OM **Towards an optimal estimation retrieval of cirrus cloud optical and microphysical properties using hyperspectral shortwave instruments and a fast radiative transfer algorithm** [13193-24]
- 13193 ON **Optimal cloud-clearing radiances for GIIRS onboard FengYun-4A satellite** [13193-25]
- 13193 OO **A novel satellite optical sensing system for atmospheric NO₂: motivation, concept design, and instrument modelling** [13193-26]
