

PROCEEDINGS OF SPIE

Sensors and Communication Technologies in the 1 GHz to 10 THz Band

**Neil A. Salmon
Wladislaw Michailow**
Editors

**18–19 September 2024
Edinburgh, United Kingdom**

Sponsored by
SPIE

Event Sponsor
Leonardo MW Ltd. (United Kingdom)

General Sponsors
HGH Infrared Systems (France) • Photon Lines Ltd. (United Kingdom) • Pro-Lite Technology Ltd.
(United Kingdom) • Thales (United Kingdom)

Cooperating Organisations
Cranfield University (United Kingdom) • Quantum Security and Defense Working Group (United Kingdom) •
CENSIS (United Kingdom) • Innovate UK (United Kingdom) • Optoelectronics Research Centre
(United Kingdom) • Photonics21 (Germany) • Technology Scotland (United Kingdom) • Science and
Technology Facilities Council (United Kingdom) • UKQuantum (United Kingdom) • Visit Britain

Volume 13203

Proceedings of SPIE 0277-786X, V. 13203

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensors and Communication Technologies in the 1 GHz to 10 THz Band*, edited by Neil A. Salmon, Wladislaw Michailow, Proc. of SPIE 13203, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Conference Committee</i>
vii	<i>Introduction</i>

MICROWAVE AND TERAHERTZ SENSORS AND APPLICATIONS

13203 03	Polarimetric 3D SAR imaging and analysis of polarization signatures for enhanced subsurface detection [13203-2]
13203 04	Development of a low-cost volumetric moisture content sensor at 76 GHz for industrial drying applications using effective medium modeling [13203-3]
13203 05	Generative model-based image reconstruction from back-scattered data in computational microwave imaging [13203-4]
13203 06	Fully integrated on-chip rectennas for K-band applications using a novel tunnelling diode [13203-5]
13203 07	Sensing matrix prediction from aperture distribution fields in computational microwave imaging with coded-apertures [13203-6]

THZ DETECTORS, FOCAL PLANE ARRAYS AND COMMUNICATION TECHNOLOGIES

13203 08	Exploiting quantum phenomena for sensitive photonic terahertz detection (Invited Paper) [13203-7]
13203 09	Study of the optimal photoresponse, speed, and temperature performance of terahertz photoelectric tunable-step detectors (Best Paper Award) [13203-8]
13203 0A	AI-assisted ultrafast and efficient terahertz spectrometer using frequency selective surfaces [13203-10]

METASURFACES, IMAGING AND COMMUNICATION TECHNOLOGIES

13203 0D	A graphene-metal metasurface for terahertz modulation with a depth of several orders of magnitude [13203-14]
13203 0E	Telemetric position sensing using resonant frequency parameterization of a millimeter-wave metamaterial [13203-15]
13203 0F	Metamaterial-based photoelectric tunable-step THz detectors using the in-plane photoelectric effect [13203-16]

THZ DETECTORS, MICROWAVE RADAR SYSTEMS, AND NDT SYSTEMS

- 13203 OH **Recent developments in the industrial application of microwave NDT** [13203-18]
- 13203 OI **Antipodal Vivaldi antenna with frequency selective surface for ultrawideband radar systems** [13203-20]
- 13203 OJ **THz to IR converter for incoherent detection of radiation (Invited Paper)** [13203-21]

POSTER SESSION

- 13203 OL **Multistatic 3-D microwave imaging with dynamic metasurface antennas: a Fourier-based approach** [13203-24]
- 13203 OM **Three-dimensional near-field microwave imaging with multiple-input multiple-output coded generalized reduced dimension Fourier algorithm** [13203-25]
