PROCEEDINGS OF SPIE

Artificial Intelligence for Security and Defence Applications II

Henri Bouma
Radhakrishna Prabhu
Yitzhak Yitzhaky
Hugo J. Kuijf
Editors

17–19 September 2024
Edinburgh, United Kingdom

Sponsored by
SPIE

Event Sponsor
Leonardo MW Ltd. (United Kingdom)

General Sponsors
HGH Infrared Systems (France) • Photon Lines Ltd. (United Kingdom) • Pro-Lite Technology Ltd. (United Kingdom) • Thales (United Kingdom)

Cooperating Organisations
Cranfield University (United Kingdom) • Quantum Security and Defense Working Group • (United Kingdom) • CENSIS (United Kingdom) • Innovate UK (United Kingdom) • Optoelectronics Research Centre • (United Kingdom) • Photonics21 (Germany) • Technology Scotland • (United Kingdom) • Science and Technology Facilities Council (United Kingdom) UKQuantum (United Kingdom) • Visit Britain (United Kingdom)

Volume 13206

Proceedings of SPIE 0277-786X, V. 13206

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Artificial Intelligence for Security and Defence Applications II*, edited by Henri Bouma, Radhakrishna Prabhu, Yitzhak Yitzhaky, Hugo J. Kuijf, Proc. of SPIE 13206, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

AI-BASED LOCALIZATION, FUSION AND ROBOT SURVEILLANCE

13206 02 **BIPSG: a fusion positioning method base on surveillance camera and geomagnetism for indoor security** [13206-1]

13206 03 **Bayesian networks for interpretable and extensible multisensor fusion** [13206-2]

13206 04 **Enhancing mobile robot surveillance in restricted areas: an optimal visual perception methodology for preventive security** [13206-3]

13206 05 **Enhancing underwater situational awareness: RealSense camera integration with deep learning for improved depth perception and distance measurement** [13206-4]

13206 06 **Generative model for visualisation of complex behaviours exhibited by homogeneous swarms (Best Paper Award)** [13206-5]

AI AND MARITIME SURVEILLANCE

13206 07 **Maritime surveillance using unmanned vehicles: deep learning-based vessel re-identification** [13206-6]

13206 08 **Ship detection and identification for maritime security and safety based on IMO numbers using deep learning** [13206-7]

13206 09 **DASBoot: an annotation toolkit for DAS-based maritime surveillance** [13206-8]

13206 0A **Adaption of AI models for processing formal reports in the field of Joint ISR** [13206-9]

13206 0B **Applying deep learning to enhance person detection in maritime images** [13206-10]

AI-BASED IDENTIFICATION, AUTHENTICATION AND PRIVACY, AND VISION-BASED AI

13206 0C **Securing multimedia-based personal data: towards a methodology for automated anonymization risk assessment seeking GDPR compliance** [13206-11]

13206 0D **Secure sparse gradient aggregation with various computer-vision techniques for cross-border document authentication and other security applications** [13206-13]

13206 0E **Bimodal accuracy distribution in quantisation aware training of SNNs: an investigation** [13206-14]

13206 0F **An FPGA-based neuromorphic vision system accelerator** [13206-15]

AI-BASED DETECTION, CLASSIFICATION, AND MATCHING

13206 0G **Visual prompt tuning and ensemble undersampling for one-shot vehicle classification** [13206-16]

13206 0H **Few-shot multilabel multiclass continuous learning for dark web image categorization** [13206-17]

13206 0I **Classifying emotions via analysis of facial physiological response without relying on expressions** [13206-18]

13206 0J **PERFEX-I: confidence scores for image classification using decision trees** [13206-45]

13206 0K **Context-aware model training for attention-based multicamera multiobject tracking** [13206-20]

AI AND SYNTHETIC DATA GENERATION I

13206 0L **Synthetic training data bias in instance segmentation algorithms** [13206-21]

13206 0M **On the use of simulated data for target recognition and mission planning** [13206-22]

13206 0N **Automatic detection and identification of ground vehicles with YOLO-based deep learning using MuSES-generated OPIR synthetic imagery** [13206-23]

13206 0O **Balancing 3D-model fidelity for training a vehicle detector on simulated data** [13206-24]

AI AND SYNTHETIC DATA GENERATION II

13206 0P **The validation of simulation for testing deep-learning-based object recognition** [13206-25]

13206 0Q **Training embedded DNN-based military vehicle detectors for aerial applications with few images using multisource vehicle signatures, data augmentation, and generative AI** [13206-26]

13206 0S **Satellite image manipulation detection in generative AI era** [13206-28]

13206 0T **Exploring the limits of diffusion models to generate person detection training datasets** [13206-29]

AI-BASED DETECTION AND ADVERSARIAL AI

13206 0U **Object detection in the thermal infrared spectral range by diffusion model based domain adaptation of the training data** [13206-30]

13206 0V **Part-aided military vehicle detection** [13206-31]

13206 0W **Anti-AI camouflage** [13206-32]

13206 0X **Network transferability of adversarial patches in real-time object detection** [13206-33]

13206 0Y **Adversarial AI image perturbation attack invariant to object scale and type** [13206-34]

AI-BASED IMAGE ENHANCEMENT AND NOVEL AI DIRECTIONS

13206 0Z **Deep learning-based turbulence mitigation for long range imaging** [13206-35]

13206 10 **Improving automatic text recognition through atmospheric turbulence** [13206-36]

13206 11 **Joint super-resolution and classification of radar images using convolutional neural networks** [13206-37]

13206 12 **The transformative potential of vector symbolic architecture for cognitive processing at the network edge** [13206-38]

13206 13 **A demonstration of vector symbolic architecture as an effective integrated technology for AI at the network edge** [13206-39]

POSTER SESSION

13206 14 **Synthetic side-scan sonar data for detecting mine-like contacts** [13206-40]

13206 15 **Robust firearm classification in RGB images: overcoming occlusion with compositional convolutional neural networks** [13206-41]

13206 16 **Adaptive path-planning for AUVs in dynamic underwater environments using sonar data** [13206-42]

13206 17 **Investigation into autolabeling a novel dataset for off-road autonomy using transfer learning** [13206-43]

13206 18 **Optimization of illumination for security hologram authentication** [13206-44]
