**Volume 13215**

Proceedings of SPIE 0277-786X, V. 13215

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Extreme Ultraviolet Lithography 2024*, edited by Kurt G. Ronse, Patrick P. Naulleau, Paolo A. Gargini, Toshiro Itani, Joern-Holger Franke, Proc. of SPIE 13215, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## RESIST

---

- 13215 02 **A dry development process for vertically tailored hybrid multilayer EUV photoresist: chemical vapor development (CVD) (Photonics Student Award 1st Place)** [13215-6]
- 13215 03 **EUUV CAR-NTD with new developer for stochastic reduction** [13215-7]
- 13215 04 **The k1-factor and stochasticity in EUV lithography: from the perspective of multi-photon-induced collaborative molecular dissolution** [13215-8]

---

## COMPUTATIONAL LITHOGRAPHY

---

- 13215 05 **Increasing throughput in EUV logic applications with thinner low-n masks and wavefront optimization (Invited Paper)** [13215-10]
- 13215 06 **Benefits of using advanced sub-resolution features for 0.55NA brightfield imaging** [13215-12]
- 13215 07 **OPC and modeling solution to support 0.55NA EUV stitching** [13215-13]
- 13215 08 **Pattern selection strategy by clustering for logic EPE monitoring** [13215-15]

---

## PROCESS CONTROL FOR EUV

---

- 13215 09 **Comprehensive EUV fab data management solution bridging reticle and wafer inspections** [13215-17]
- 13215 0A **Enhancing lithography precision: characterizing resist profiles in semiconductor manufacturing with rapid probe microscopy** [13215-19]
- 13215 0B **Single exposure EUV patterning optimization and defect inspection of hexagonal contact hole arrays using voltage contrast metrology** [13215-20]

---

## PELLICLE

---

- 13215 0C **Evaluation of ultra-thin membrane for EUV pellicles using metal core materials** [13215-24]
- 13215 0D **Multilayered EUV pellicle: enhanced mechanical strength and thermal stability** [13215-26]

---

#### JOINT SESSION WITH PHOTOMASK AND EUVL: PROSPECTS OF EUV BLANKS

---

- 13215 0E **New EUV mask and blanks for DRAM 1a nm and beyond (Invited Paper)** [13215-28]
- 13215 0F **Development of advanced EUV mask absorbers with various properties** [13215-29]

---

#### RESIST FUNDAMENTALS

---

- 13215 0G **BEFORCE: a pathway to unravel metal oxide resist (MOR) reactions upon EUV exposure, bake, and environment (Invited Paper)** [13215-31]
- 13215 0H **Time-dependent characterization of total electron yield and outgassing in model EUV resist materials** [13215-32]
- 13215 0I **Exploring the impact of electron affinity on the electron emission in EUV photolithography** [13215-33]
- 13215 0J **Development kinetics analysis based on frequency and impedance changes measured with quartz crystal microbalance method (EUV Tech Award for Emerging Talent in the Industry 1st Place)** [13215-36]

---

#### SUSTAINABILITY AND PRODUCTIVITY

---

- 13215 0K **EUV dose reduction for pitch 28nm line-space** [13215-39]
- 13215 0L **PFAS-free EUV rinse for advanced technology nodes** [13215-40]
- 13215 0M **Substantial dose reduction using dry deposited underlayer for EUV lithography while maintaining roughness and minimizing defects** [13215-42]

---

#### PATTERNING, EPE AND DEFECTIVITY

---

- 13215 0N **Holistic patterning technology for DRAM 29nm pitch contact hole and pillar patterning (Invited Paper)** [13215-44]
- 13215 0O **Reticle thermal properties impact on overlay at 500W and beyond (Invited Paper)** [13215-45]
- 13215 0P **Enhanced EUV photolithography control for overcoming defectivity challenges** [13215-46]
- 13215 0Q **LCDU decomposition and scaling: mask and resist effects on local MEEF and stochastics** [13215-47]
- 13215 0R **Enabling 0.33NA EUV lithography patterning towards MP16 SADP semi-damascene metallization, setting the benchmark for High-NA EUV** [13215-48]

## POSTER SESSION

---

- 13215 0S **The effect of TiO<sub>2</sub> film on the surface roughness and optical properties of Mo/Si periodic films by atomic layer deposition** [13215-50]
- 13215 0T **Dissolution dynamics of poly (4-hydroxystyrene) partially protected with t-butoxycarbonyl group in alkyl-trimethyl-ammonium hydroxide (A-TMAH) aqueous developers** [13215-51]
- 13215 0U **The two-mask stage scanner for High-NA EUV lithography** [13215-52]
- 13215 0V **Development of a porous patterned membrane with a large field size for EUV pellicles** [13215-53]
- 13215 0W **Performance testing system for extreme ultraviolet lithography components** [13215-55]
- 13215 0X **Development progress of Gigaphoton's LPP EUV light source for inspection systems** [13215-57]
- 13215 0Y **Exceptional dimensional stability of non-ferromagnetic Invar alloy for advanced semiconductor manufacturing equipment** [13215-58]
- 13215 0Z **The impact of aberrations in extreme ultraviolet lithography systems on exposure results** [13215-60]
- 13215 11 **Prediction of 3D morphological features of nano-patterns from SEM images using a frequency domain approach** [13215-62]
- 13215 12 **EUV spectral responsivity standard for dose calibration process** [13215-64]
- 13215 13 **Improving etchability of challenging materials through the ion implantation process (Photonics Student Award 2nd Place)** [13215-66]
- 13215 14 **Study of dissolution mechanism and printability of positive tone organometallic resist with alkyl acetate developers** [13215-70]
- 13215 15 **Broadband reflective spectrometer for high-resolution spectral characterization of radiation sources (EUV Tech Award for Emerging Talent in the Industry 2nd Place)** [13215-73]
- 13215 16 **Tailoring the support constraint of phase retrieval algorithms improves lensless EUV nanostructures metrology** [13215-76]
- 13215 17 **Understanding molecular weight effects in polymer photoresists and how variations in molecular weight can affect dissolution rates** [13215-80]
- 13215 18 **Underlayer dependent local wafer deformation during EUV exposure** [13215-83]
- 13215 19 **A semi-empirical approach for predicting LER statistical distribution in advanced nodes** [13215-85]

- 13215 1A **Source optimization for the whole arc slit with minimum optical proximity correction applied to contact hole patterns** [13215-86]
- 13215 1B **Inspection of next generation EUV resists with nano-projectile SIMS** [13215-89]
- 13215 1C **Relative lifetime estimation of EUV pellicle by normalized thermal stress** [13215-90]
- 13215 1D **All-dry zinc-imidazolate resists for electron beam and EUV lithography** [13215-103]
