**Volume 13243**

Proceedings of SPIE 0277-786X, V. 13243

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Sensor Systems and Applications XIV*, edited by Minghong Yang, Chang-Seok Kim, Xinyu Fan, Jianzhong Zhang, Proc. of SPIE 13243, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

- vii *Symposium Committees*
- xi *Conference Committee*

---

## DISCRETE AND DISTRIBUTED OPTICAL SENSORS

---

- 13243 04 **In situ measurement of residual magnetic field in SERF atomic magnetometer based on transient response** [13243-3]
- 13243 05 **Description of spun fibers within the Jones matrix formalism in modeling of fiber optic devices** [13243-4]

---

## OPTICAL SENSOR SYSTEMS AND NETWORKS

---

- 13243 06 **Differential fiber optic gyroscope for rotational seismic observation** [13243-5]
- 13243 07 **Optical fiber lossy mode resonance immunoprobe for serum PSA detection** [13243-6]
- 13243 08 **Resolution limits of core-cladding intermodal fiber optic refractive index sensors with spectral interferometric interrogation** [13243-7]
- 13243 0A **Identification of age markers from the structural features of Baltic amber using SERS** [13243-9]

---

## NEW FIBERS, SMART STRUCTURES, AND MATERIALS FOR OPTICAL SENSING

---

- 13243 0C **Ultrasensitive fiber temperature sensor based on Fabry Perot interferometer and Vernier effect** [13243-12]

---

## PASSIVE AND ACTIVE DEVICES FOR OPTICAL SENSING

---

- 13243 0D **Resonant optical gyroscopes based on low-coherence radiation sources** [13243-13]
- 13243 0E **In situ state characterization monitoring of 18650 lithium-ion batteries with high-rate charge and discharge based on the high-stability fibre-optic sensor** [13243-14]
- 13243 0G **An unfolding-based model for analysis of rotation and translation coupling in grating interferometers** [13243-16]

---

**OPTICAL SENSORS FOR CHEMICAL, ENVIRONMENTAL, BIOLOGICAL, MEDICAL, AND OTHER APPLICATIONS**

---

13243 OI **Time delay estimation accuracy enhancement with envelope filtering in LFM-DAS**  
[13243-18]

---

**OPTICAL SENSORS BASED ON FIBER GRATINGS, PHOTONIC CRYSTAL FIBERS, PLANAR/INTEGRATED WAVEGUIDES**

---

13243 OJ **An ultraprecision and real-time algorithm for 6-DOF displacements based on four grating interferometers** [13243-20]

13243 OK **Ring confocal cavity with gradient lens as sensitive element for the passive optical gyro**  
[13243-21]

13243 OL **Arrangement optimization of fiber Bragg grating temperature sensor network for wafer surface temperature field reconstruction with grey wolf optimization-Kriging algorithm based on K-medoids** [13243-22]

---

**POSTER SESSION**

---

13243 ON **A novel leakage sensing system of hydrogen transportation pipeline based on hybrid UWFBG array** [13243-24]

13243 OO **Portable multicomponent gas fiber probe based on silver-coated capillary enhanced Raman spectroscopy** [13243-25]

13243 OR **Miniaturized atomic magnetometer employing pump-beam modulation** [13243-28]

13243 OS **Elderly monitoring system based on multisensor information fusion** [13243-29]

13243 OT **Investigating the impact of adjustable baseline distance on signal-to-noise ratio in atomic magnetic gradiometers for different magnetic sources** [13243-30]

13243 OU **Enhancement of a refractive index sensitivity by thinned the diameter of a plastic optical fiber assisted by a long period grating** [13243-31]

13243 OV **Liquid-level sensor based on flat-shaped plastic optical fiber assisted by a long-period grating** [13243-32]

13243 OW **A label-free sensor system for bioanalysis based on fiber optic sensing and 2D scattering imaging technologies** [13243-33]

13243 OX **Optimization of radio-over-fiber links with dispersion-induced power fading compensation and tunable carrier-to-sideband ratio technology** [13243-34]

13243 OY **WGM microprobe device for high-sensitivity ultrasound sensing** [13243-35]

- 13243 10 **Mach-Zehnder interferometer sensor based on tapered DCF for measuring axial strain, bending, and magnetic field** [13243-37]
- 13243 12 **An on-line weight traceability measuring system of vehicle based on optical imaging technologies** [13243-39]
