PROCEEDINGS OF SPIE

International Conference on Automation and Intelligent Technology (ICAIT 2024)

Ryspek Usubamatov
Shou Feng
Xiaojun Mei
Editors

24–26 August 2024
Wuhan, China

Organized by
Nanjing Tech University (China)

Sponsored by
Wuhan Textile University (China)
Wuhan Qidesheng Conference Service Co., Ltd. (China)

SPIE

Volume 13401

Proceedings of SPIE 0277-786X, V. 13401

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Automation and Intelligent Technology (ICAIT 2024)*, edited by Ryspek Usubamatov, Shou Feng, Xiaojun Mei, Proc. of SPIE 13401, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ELECTRICAL AND AUTOMATION TECHNOLOGY

13401 02 **Design and loss analysis of ultra-high-speed permanent magnet motor for electric turbo-compound** [13401-1]

13401 03 **Research on robot automatic drilling technology for analog components** [13401-3]

13401 04 **Robust H∞ control for switched networked systems** [13401-13]

13401 05 **MPPT control technology based on improved variable step conductance increment** [13401-16]

13401 06 **Dynamic simulation analysis of typical traction plate passing through pulley based on finite element method** [13401-27]

SIGNAL PROCESSING AND DATA ANALYSIS

13401 07 **Research on the detection of safflower filaments in natural scenarios based on deep learning algorithms** [13401-5]

13401 08 **Rail track surface defect detection algorithm integrating MobileNetv3 and Transformer** [13401-6]

13401 09 **Estimation of state based on Gaussian filter for nonlinear systems with correlated noises and one-step randomly delayed measurements** [13401-7]

13401 0A **Improving Chinese knowledge enhancement models with unified representation space** [13401-14]

13401 0B **Self-organizing network preference method based on hierarchical model and ant colony algorithm** [13401-17]

13401 0C **Bidirectional authentication algorithm for wireless sensor network nodes** [13401-26]

13401 0D **Design of signal processing module for fault diagnosis system** [13401-28]

13401 0E **Deep learning solutions for pneumonia detection: performance comparison of custom and transfer learning models** [13401-30]

OPTOELECTRONIC TECHNOLOGY AND SENSORS

13401 0F **Design of terahertz varifocal devices based on dielectric metasurface** [13401-8]

13401 0G **Temperature monitoring of turbine winding based on up-conversion fluorescent life-time of the fiber optic temperature sensor** [13401-9]

13401 0H **Research on temperature measurement of the laser optical fiber scalpel based on up-conversion fluorescence peak ratio** [13401-11]

INTELLIGENT SYSTEMS AND AUTOMATION APPLICATIONS

13401 0I **A kind of efficient drilling holes technology modularistically for aircraft beam products** [13401-2]

13401 0J **Design and implementation of a crop growth information collection system based on ZigBee** [13401-4]

13401 0K **Stability analysis of the ship deck foreign-matters-cleaning robot moving with ship** [13401-15]

13401 0L **Drifting resistant algorithm for video target tracking based on kernelized correlation filters framework** [13401-20]

13401 0M **Radio frequency identification: examination room management** [13401-29]

13401 0N **A semantic SLAM system for dynamic environments** [13401-31]

INTERDISCIPLINARY RESEARCH

13401 0O **Research on the solution method of unsteady flow field based on hard boundary enforcement residual PINN** [13401-12]

13401 0P **Microstructure evolution and hardening mechanism of 18Cr2Ni4WA steel during combined carburized and carbonitrided treatment** [13401-21]

13401 0Q **Nonlinear dynamic analysis of gear systems based on refined dynamic model** [13401-22]

13401 0R **Detailed performance analysis of FTO/TiO_2/$FAPbI_3$/CZTS solar cells: computational study** [13401-24]
