SPIE

Volume 13402
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13402

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Remote Sensing, Mapping, and Geographic Information Systems (RSMG 2024)*, edited by Bin Zou, Yaoping Cui, Proc. of SPIE 13402, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xii *Conference Committee*

Part One

REMOTE SENSING INFORMATION EXTRACTION AND IMAGE ANALYSIS

- 13402 02 **A two-stage task mechanism network for building change detection method in remote sensing images** [13402-154]
- 13402 03 **Landslide susceptibility mapping in southern China: a study based on remote sensing data and random forests** [13402-130]
- 13402 04 **Impact of urbanisation process on extreme high temperature urban heat island phenomenon in Chengdu: based on satellite remote sensing land use** [13402-126]
- 13402 05 **Remote sensing image segmentation method based on AD-TransUnet** [13402-149]
- 13402 06 **Sensitivity study of WRF cumulus schemes based on ERA5 remote sensing datas** [13402-92]
- 13402 07 **Identification of energy facilities in remote sensing images: comparison of single and joint models** [13402-161]
- 13402 08 **Compressive sensing-based sparse representation analysis for remote sensing SAR imagery** [13402-102]
- 13402 09 **Remote sensing monitoring and analysis of the spatiotemporal evolution of ecological environment in Lengshuijiang mining area, Hunan** [13402-165]
- 13402 0A **Application of remote sensing big data in provincial natural resource management: a case of Hainan Province** [13402-33]
- 13402 0B **Remote sensing monitoring of ecosystem quality and land cover changes in Beijing** [13402-31]
- 13402 0C **Real-time moving vehicle detection in satellite videos based on hole features and motion direction information** [13402-151]
- 13402 0D **Peanut crop identification based on UAV remote sensing image and random forest** [13402-101]
- 13402 0E **Semantic segmentation network of remote sensing image buildings based on LEDNet** [13402-10]

- 13402 OF **Optimal selection method of redundant orbiter images in planetary mapping based on multi-constraints** [13402-99]
- 13402 OG **Accessible road detection from remote sensing image based on the deep learning method** [13402-66]
- 13402 OH **A comprehensive study on the variation and driving factors of solar photovoltaic potential in Ningxia from 2020 to 2023** [13402-86]
- 13402 OI **Reference remote sensing image scene segmentation based on multi-scale cross-axis attention network** [13402-119]
- 13402 OJ **Minimal range sampling algorithm for algebraic circle fitting and precision analysis** [13402-15]
- 13402 OK **Methods for extracting vegetation phenology information and results analysis** [13402-32]
- 13402 OL **Individual tree detection in urban land based on multi-source remote sensing data** [13402-127]
- 13402 OM **Unraveling the phenological diversity of corn effects on environmental stress in Wisconsin** [13402-129]
- 13402 ON **Sampling method for fire point data based on multi-source remote sensing data fusion** [13402-109]
- 13402 OO **USE a variety of meteorological and geographic data to build a LightGBM temperature predicted model and quantify the impact of feature on temperature changes based on SHAP** [13402-54]
- 13402 OP **Spatial distribution information extraction of winter wheat in Henan Province based on multi-source sentinel remote sensing data** [13402-14]
- 13402 OQ **SAR remote sensing image segmentation algorithm based on improved DeepLabV3+** [13402-90]
- 13402 OR **Research on data quality evaluation method of OpenStreetMap road network: taking Taiwan island as an example** [13402-83]
- 13402 OS **Statistical method of remote sensing image application area based on graphic metadata** [13402-106]
- 13402 OT **A salt marsh vegetation extracting method with heterogenous-sensor remote sensing images** [13402-112]
- 13402 OU **Analysis of tidal creek morphology in the Yellow River estuary based on high-resolution remote sensing imagery** [13402-91]
- 13402 OV **Remote sensing weak information extraction and its indicative significance from the Tawendariha site of Nomhom cultural** [13402-40]

- 13402 0W **Research on house change detection algorithm based on satellite remote sensing and big data** [13402-142]
- 13402 0X **Analysis of river morphology change in Zhengzhou reach of the Yellow River based on long time series remote sensing images** [13402-5]

ENVIRONMENTAL MONITORING AND DATA FUSION TECHNOLOGY

- 13402 0Y **Estimation of vegetation canopy chlorophyll content based on sunlight-induced chlorophyll fluorescence** [13402-156]
- 13402 0Z **A novel low-rank blind spot reconstruction network based on multi-scale mask convolution for hyperspectral anomaly detection** [13402-29]
- 13402 10 **Construction of an ecological security pattern in mountainous city: a case study of Chongqing city, China** [13402-125]
- 13402 11 **Construction scene change detection based on octree structure optimization** [13402-160]
- 13402 12 **Research on the high-risk slope deformations of hydropower station base on GNSS measurements** [13402-38]
- 13402 13 **Research on key technologies of UAV oblique photography and SLAM in surveying and mapping for the preservation of ancient buildings** [13402-124]
- 13402 14 **Improved retrieval of aerosol optical depth from MODIS measurements over the Pearl River delta region** [13402-57]
- 13402 15 **Newly-developed multi-band spectral ratio index for estimating leaf SPAD content at different angles of HSL** [13402-2]
- 13402 16 **Denoising and simplification of deep-sea sound speed profiles based on wavelet transform** [13402-131]
- 13402 17 **The multibeam bathymetry model is constructed based on the optimization of the survey line** [13402-104]
- 13402 18 **Boundary position attention network for enhanced cloud detection in mixed cloud and snow scenes** [13402-108]
- 13402 19 **Design and implementation of the port scene situation deduction system** [13402-118]
- 13402 1A **Sugarcane classification using the Chinese satellite image with high-resolution based on the PSENet algorithm** [13402-121]
- 13402 1B **3D joint inversion of gravity and MT data for Alxa Block deep structure analysis** [13402-56]
- 13402 1C **Investigation of mining subsidence over three major coal mines using time-series SAR interferometry** [13402-70]

- 13402 1D **Simulation and analysis of air quality in the main urban area of Chongqing based on GIS and LUR modeling** [13402-107]
- 13402 1E **Ground point filtering method for terrestrial laser scanning point clouds using iterative relative density analysis and its mapping applications** [13402-80]
- 13402 1F **Application of YOLOv5 object detection in pipeline radar imaging** [13402-105]
- 13402 1G **Spatio-temporal distribution of XCO₂ concentrations in northeast China based on Downscaling-XGBoost model** [13402-97]
- 13402 1H **Brief description of the current status of the application of 3D laser scanning technology in the field of surveying and mapping** [13402-153]
- 13402 1I **Urban tree species identification based on UAV hyperspectral and LiDAR data** [13402-23]
- 13402 1J **Spatio-temporal clustering model based on angular depth for regional division of PM_{2.5} in China** [13402-143]
- 13402 1K **Application analysis of quantum Lidar technology in air pollution monitoring** [13402-139]
- 13402 1L **A constant bank angle-based two-stage predictor-corrector method for Mars atmospheric entry** [13402-100]
- 13402 1M **CEDA-UNet: computational-efficient dilated attention UNet for multiclass cloud image segmentation** [13402-34]
- 13402 1N **GateSTNet: a novel model for mapping spatiotemporal forest cover** [13402-8]
- 13402 1O **Research on finite element model for tank safety evaluation based on high precision surveying and mapping data** [13402-12]
- 13402 1P **Fast and robust camera calibration using a compound planar target with ArUco markers** [13402-45]
- 13402 1Q **High-speed videogrammetry for structural response of rocky slopes in shaking table tests** [13402-42]
- 13402 1R **Multi-time scale impact analysis of GPP-SIF based on random forest model** [13402-62]
- 13402 1S **FIRE point detection algorithm based on MODIS radiation angle normalization** [13402-58]
- 13402 1T **Solar spectral observations at high altitudes in Xizang** [13402-79]
- 13402 1U **A combined plane fitting strategy and comparative analysis of plane fitting methods for landing hazard detection** [13402-27]

- 13402 1V **Enhanced satellite images block adjustment via preliminary RPCs correction and adaptive two-step tie points matching strategy** [13402-94]
- 13402 1W **Analysis of surface albedo characteristics of alpine desert plant communities** [13402-164]

Part Two

- 13402 1X **Research on 3D model construction of rural reality scene based on oblique photogrammetry technology** [13402-167]
- 13402 1Y **A new methodology for quantitative assessment of nearby disaster rescue capacity** [13402-152]

GEOGRAPHIC INFORMATION TECHNOLOGY AND PRECISE POSITIONING

- 13402 1Z **Multi-GNSS observation weighting optimization for real-time precise point positioning and positioning performance analysis** [13402-81]
- 13402 20 **An automatic geometric positioning method for optical satellite image assisted by SAR image** [13402-133]
- 13402 21 **A model for semantic and spatio-temporal interconnected trajectory representation** [13402-166]
- 13402 22 **Quantitative evaluation of the ecological service function on the Qinghai-Tibet plateau based on GIS analysis** [13402-114]
- 13402 23 **Quick detecting of urban built-up areas using the neural network model based on the nighttime light data** [13402-41]
- 13402 24 **Study on public transportation transfer layout based on GIS network analysis: a case study of Guangzhou higher education mega center** [13402-85]
- 13402 25 **Spatial patterns and regionalization of cultivated land resource stability in major grain producing areas of China** [13402-168]
- 13402 26 **Geographic entity extraction and correction methods based on the 12345 public service hotline** [13402-48]
- 13402 27 **Research on identifying the geographical scope of urban physical area** [13402-113]
- 13402 28 **Wetland mapping of Yellow River delta wetlands based on multi-feature optimization of Sentinel-1/2 data** [13402-60]
- 13402 29 **General series expansion and mathematical analysis of three auxiliary latitudes of meridian arc length** [13402-20]

- 13402 2A **Design of geographic information data storage system for land change survey based on ArcGIS** [13402-115]
- 13402 2B **Design of a railway visualization system based on cesium** [13402-44]
- 13402 2C **City expansion and evolution of urban green space pattern in Chongqing (2000-2020)** [13402-74]
- 13402 2D **Research on the location of highway wildlife passage: taking the Tomur as an example** [13402-155]
- 13402 2E **Study on the spatial distribution pattern and influencing factors of Guanzhong grottoes heritage based on GIS** [13402-138]
- 13402 2F **Dynamic monitoring and evaluation of urban ecological environment quality in Jinan city based on GIS and RS** [13402-111]
- 13402 2G **Analysis of lunar rover wheel slippage based on discrete element method** [13402-11]
- 13402 2H **A modified attitude domain search method for GNSS attitude determination** [13402-37]
- 13402 2I **Performance study of real-time PPP based on broadcast ephemeris** [13402-64]
- 13402 2J **Precise estimation of PCV and its influence on POD for COSMIC-2** [13402-63]
- 13402 2K **High-precision ionospheric modeling and its application in positioning under geomagnetic storm conditions** [13402-159]
- 13402 2L **Research on refinement of the empirical tropospheric models and enhanced precise point positioning** [13402-158]
- 13402 2M **Development and accuracy analysis of a regional ionospheric model for the middle reaches of the Yangtze River using multi-source data** [13402-157]
- 13402 2N **Analysis of urban expansion drivers: a case study of Xiamen-Zhangzhou-Quanzhou** [13402-71]
- 13402 2O **A weighted method modelling the trajectory uncertainty based on moving objects' speeds and positions** [13402-146]
- 13402 2P **A new approach of initial localization for planetary lander with the bag of visual words model** [13402-51]
- 13402 2Q **Analysis of circular-walking underwater localization algorithm considering transceiver separation** [13402-22]
- 13402 2R **Research into range errors in hydroacoustic positioning systems** [13402-19]

- 13402 2S **Study on the method for calculating the time-variable gravity field using GRACE data** [13402-123]
- 13402 2T **Research and implementation of GNSS receiver antenna phase center outdoor absolute calibration algorithm** [13402-30]
- 13402 2U **Large scale river monitoring and analysis with high resolution satellite image and meteorological information** [13402-162]
- 13402 2V **A study on geographic information retrieval methods based on GML data** [13402-46]
- 13402 2W **Research on the construction and application of digital twin of chemical plant based on five-dimensional model** [13402-137]

GEOLOGICAL TECTONIC EVOLUTION AND TERRAIN MONITORING

- 13402 2X **Temporal and spatial analysis of construction land changes in the Yangzonghai basin from 2005 to 2020** [13402-39]
- 13402 2Y **An improved algorithm for ice shelf crevasses extraction considering morphological characteristics** [13402-136]
- 13402 2Z **Analysis of spatiotemporal changes in ecological environment quality in the Yangtze River delta region from 2012 to 2022 based on multi-source data** [13402-49]
- 13402 30 **New generation geostationary satellite nighttime total column ozone retrieval** [13402-77]
- 13402 31 **Assessing ecological vulnerability in the Guangdong-Hong Kong-Macao Greater Bay area: an ESA framework approach** [13402-4]
- 13402 32 **Extreme disaster risk evaluation model based on comprehensive weighting method** [13402-68]
- 13402 33 **Flood disaster inundation analysis based on HAND model under extreme rainfall conditions** [13402-110]
- 13402 34 **22-year dynamic analysis of vegetation cover in karst area: a case study in Guangxi, China** [13402-55]
- 13402 35 **Atmospheric quality monitoring in the Qilian mountains nature reserve using the dark target-deep blue fusion algorithm** [13402-75]
- 13402 36 **Urban growth scenario projection based on black hole optimization algorithm in arid areas** [13402-116]
- 13402 37 **NDVI-based trends change detection of surface greenness in Sichuan** [13402-3]
- 13402 38 **Hole repair of 3D terrain mesh in satellite stereo image reconstruction** [13402-13]

- 13402 39 **Ecological sensitivity analysis of Zhengxiangbai banner based on GIS spatial analysis** [13402-53]
- 13402 3A **Research on soil Ni elements inversion based on VIS-NIR spectroscopy** [13402-95]
- 13402 3B **Wetland classification based on improved BiSeNet using Sentinel-1 and Sentinel-2 data** [13402-21]
- 13402 3C **Vegetation extraction and classification based on UAV hyperspectral data for the Loess Hilly and Gully region** [13402-6]
- 13402 3D **Spatio-temporal prediction model for sea ice density based on ConvLSTM network** [13402-59]
- 13402 3E **Analysis of the current status of landscape pattern of wetland city land use: a case study of Liangping District, Chongqing** [13402-25]
- 13402 3F **Spatial and temporal evolution and multidimensional driving factors of NPP in Hubei Province** [13402-144]
- 13402 3G **Assessment of ecological environment quality and recommendations for management in Helan mountain national nature reserve, Ningxia** [13402-89]
- 13402 3H **Soil moisture inversion in the Shandian River Basin based on multi-temporal sentinel data** [13402-65]
- 13402 3I **Estimating the lifetime and emission of ammonia based on IASI satellite data** [13402-120]
- 13402 3J **Research on warning threshold of horizontal displacement of landslide monitoring based on clustering idea** [13402-36]
- 13402 3K **Research on airborne laser point cloud thinning algorithm with terrain features** [13402-67]
- 13402 3L **Research on overlying rock damage and surface deformation prediction during coal seam mining under water bodies** [13402-122]
- 13402 3M **Spatial and temporal characterization of extreme precipitation in the Liaohe River Basin, China** [13402-82]
- 13402 3N **Change detection and impact analysis of coastal wetlands in the Shandong Peninsula based on Landsat data** [13402-16]
- 13402 3O **Spatial-temporal dynamic evolution and influencing factors of county innovation level evidence: based on the patent data of county scale in Hebei Province** [13402-61]
- 13402 3P **Landscape ecological risk assessment of Jilin province based on terrain gradient** [13402-72]

- 13402 3Q **Monitoring and analysis of 2020 flooding at Poyang Lake based on Sentinel-1B SAR data**
[13402-147]
- 13402 3R **Study on the intensity of ecological land changes in seven major urban agglomerations
in the Yellow River Basin** [13402-135]
- 13402 3S **Long-time monitoring and analysis of lake changes with satellite technology** [13402-163]
