**Volume 13443**

Proceedings of SPIE 0277-786X, V. 13443

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Computer Vision and Information Technology (CVIT 2024)*, edited by Jixin Ma, Proc. of SPIE 13443, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## IMAGE ANALYSIS AND MODEL CALCULATION

---

- 13443 02 **Texture-attention discriminator for real-world image super-resolution** [13443-1]
- 13443 03 **Two-stage video scene segmentation method based on multimodal semantic interaction** [13443-5]
- 13443 04 **Design of material sorting system based on OpenMV** [13443-7]
- 13443 05 **Research on intelligent estimation of human posture in multiplayer complex scenarios** [13443-4]

---

## IMAGE DETECTION MODELS AND ALGORITHMS

---

- 13443 06 **A video retrieval algorithm with embedded position coding for moment localization and highlight detection** [13443-2]
- 13443 07 **A bio-inspired model for object motion direction and speed detection against colored backgrounds** [13443-8]
- 13443 08 **Analyzing handgun handling states: a deep learning approach using YOLOv8** [13443-11]

---

## INTELLIGENT INFORMATION SYSTEM AND MANAGEMENT BASED ON DATA

---

- 13443 09 **Using hash learning for a multi-model fashion recommendation system** [13443-10]
- 13443 0A **RSKCNN: introducing randomly-sparse-kernel CNN** [13443-9]
- 13443 0B **Research on auditing of large-scale instruments and equipment opening and sharing in universities based on data mining** [13443-6]
