

Effects of Climate Change of Life-Cycle Performance of Structure Systems

Safety, Reliability, and Risk

Editors:

**Fabio Biondini
Zoubir Lounis
Michel Ghosn**

Contents

Contributors	xi
Preface	xv
Chapter 1 Structures and Infrastructures under Climate Change: An Introduction	1
Fabio Biondini, Zoubir Lounis, Michel Ghosn	
1.1 Background	1
1.2 SEI/ASCE Special Project	2
1.3 Survey and International Workshop.....	4
1.4 Book Structure.....	5
References	6
Chapter 2 Climate Projection Models and Data	7
Jason P. Giovannettone, Amir AghaKouchak, Bilal Ayyub, ZhiQiang Chen, Naresh Devineni, Rick Lader, Fengpeng Sun, Mari R. Tye, Teng Wu	
2.1 Introduction	7
2.2 Objectives and Scope	9
2.2.1 Objectives	9
2.2.2 Scope of Study.....	10
2.3 Global Climate Change and the Portfolio of Responses	14
2.3.1 Observed Change and Definitions of Climate Change Mitigation and Adaptation	14
2.3.2 The Role of Codes and Standards in Protection of Life and Property and Evolving Perspectives.....	18
2.4 Climate Projection Scenarios, Sensitivity, and Downscaling	19
2.4.1 Description of Projection Scenarios and Temperature Responses from IPCC AR5 to AR6	19
2.4.2 Overview and Implications of Climate Sensitivity Metrics from CMIP5 to CMIP6	22
2.4.3 Climate Downscaling and Current Tools.....	23
2.4.4 Summary	25
2.5 Attribution of Extreme Events to a Changing Climate	25
2.5.1 Background and Terminology	25
2.5.2 Event Attribution Approaches and Their Reliability	28
2.5.3 Methodology and Protocol for Extreme-Event Attribution	29
2.5.4 Uncertainties in Extreme-Event Attribution.....	30

2.5.5	Examples of Extreme-Event Attribution	31
2.6	Future Projections of Relevant Engineering Climate Variables	32
2.6.1	Temperature	36
2.6.2	Rainfall	42
2.6.3	Riverine Flooding/Hydrodynamic Loading	50
2.6.4	Sea Level Rise	58
2.6.5	Wind	63
2.6.6	Tropical Cyclones	70
2.6.7	Snow and Atmospheric Icing	76
2.6.8	Wave Climate	81
2.6.9	Wildland–Urban Interface Fires.....	85
2.6.10	Compound Hazards.....	90
2.7	Conclusions and Recommendations.....	95
	References	96

Chapter 3 Impact of Climate Change on Infrastructure Performance 115

Bruce R. Ellingwood, Paolo Bocchini, Zoubir Lounis,
Michel Ghosn, Ming Liu, David Yang, Luca Capacci, Sofia
Diniz, Ning Lin, George Tsiatas, Fabio Biondini, John van de
Lindt, Dan M. Frangopol, Mitsuyoshi Akiyama, Yue Li, Michele
Barbato, Hanping Hong, Therese McAllister, Georgios Tsampras,
Farshid Vahedifard

3.1	Introduction	115
3.2	Objectives and Scope	116
3.2.1	Objectives	116
3.2.2	Scope	117
3.2.3	Overview	118
3.3	Climate Change and Its Impact on Loads for Civil Infrastructure.....	118
3.3.1	Fundamentals of Structural Design for Climatic Loads	118
3.3.2	Issues and Challenges in Climate Data Analysis for Structural Design.....	121
3.3.3	Implementation of Climate Data in Structural Codes and Standards.....	122
3.4	Probability-Based Limit States Design: An Advance toward Risk-Informed Decision-Making.....	123
3.4.1	Historical Background: Earlier Design Approaches.....	123
3.4.2	Probability-Based Limit States Design: Moving toward Uniform Risk	125
3.4.3	Hazard Analysis and Application to Climate Change: An Illustration.....	128
3.4.4	Reliability Targets for a Changing Climate	132
3.4.5	Risk-Informed Structural Design.....	134
3.5	Analysis of Nonstationary Data and Implementation for Practical Design Purposes	136

3.5.1	Nonstationary Climate and How It Can Be Described	136
3.5.2	Design Criteria for a Nonstationary Climate	137
3.5.3	Design Loads That Account for a Nonstationary Climate	137
3.5.4	New Opportunities and Challenges	140
3.5.5	Concluding Remarks	141
3.6	Analysis of Climatic Loads	142
3.6.1	Temperature Effects on Structural Systems	142
3.6.2	Riverine (Fluvial) Flooding	144
3.6.3	Coastal Inundation caused by Sea Level Rise	150
3.6.4	Wind Hazard	158
3.6.5	Snow Loads	161
3.6.6	Ice Loads and Atmospheric Icing	164
3.6.7	Rain Loads	167
3.6.8	Load Combinations	168
3.7	Climate Change Impacts on Geotechnical Systems	170
3.7.1	Impacts on Soil and Earthen Structures	170
3.7.2	Impacts on Geotechnical Infrastructure and Foundations	173
3.7.3	Impacts on Soil–Structure Interaction and Landslides	173
3.8	Performance-Based Approaches to Climate Change	174
3.8.1	Introduction	174
3.8.2	Prescriptive versus Performance-Based Design	175
3.8.3	Performance-Based Design in a Changing Climate	177
3.8.4	Performance-Based Design—Linking Community and Individual System Design Objectives	178
3.8.5	Performance-Based Design: Needs for Engineering Practice	178
3.8.6	Challenges and Barriers to Performance-Based Design	179
3.9	Climate Change Impacts and Community Resilience	180
3.9.1	Community Resilience	180
3.9.2	Design Considerations for Resilience and Climate Impacts	180
3.9.3	Functional Performance of the Built Environment	183
3.9.4	Challenges to Community Resilience in a Changing Climate	185
3.10	Observations, Recommendations, and Future Needs	186
3.10.1	Statistical Modeling and Analysis of Nonstationary Climatic Variables	186
3.10.2	Climate Variables for Reliability-Based Structural Design	188
3.10.3	Implementation in Codes and Standards	189
3.10.4	Performance-Based Engineering	190
3.10.5	Climate Change and Urban Resilience	190
3.10.6	Implementation in Professional Engineering Practice	191
3.11	Acknowledgments	192
	References	192

Chapter 4	Life-Cycle Risk-Based Decision-Making in a Changing Climate	207
	Dan M. Frangopol, Ming Liu, Mitsuyoshi Akiyama, David Y. Yang, Kostas G. Papakonstantinou, Kyle Haas, Mark G. Stewart, Fabio Biondini, Michel Ghosn, Silvia Bianchi, Graziano Fiorillo, Anne S. Kiremidjian, Ji Yun Lee, Abdollah Shafieezadeh, Pablo G. Morato	
4.1	Introduction	207
4.1.1	Climate Adaptation Engineering	207
4.1.2	Life-Cycle Engineering Concepts and Applications.....	210
4.1.3	Risk-Informed Decision-Making Framework in a Changing Climate.....	211
4.1.4	Chapter Objectives and Outline.....	214
4.2	Impact of Climate Change on Life-Cycle Performance of Structures and Infrastructure Systems	214
4.2.1	Time-Variant Reliability-Based Methodologies.....	215
4.2.2	Climate-Sensitive Hazard Modeling	217
4.2.3	Accelerated Structural Deterioration owing to Climate Change.....	220
4.2.4	Structural Redundancy and Robustness.....	224
4.2.5	Impact of Climate Change on Lifetime Resilience.....	226
4.3	Life-Cycle Reliability and Risk of Interdependent Infrastructure under Multihazards	228
4.3.1	Interdependent Infrastructure Systems	228
4.3.2	Effects of Climate Change on Threats from Multiple Hazards.....	234
4.3.3	Comprehensive Analysis of Interdependent Systems under Multihazards.....	239
4.4	Optimization Approaches for Structural Design and Life-Cycle Adaptation Planning	241
4.4.1	Introduction	241
4.4.2	Performance Objectives	242
4.4.3	Risk-Based and Performance-Based Concepts.....	243
4.4.4	Role of Information Accrued Over Time	250
4.4.5	Sequential Decision-Making under Uncertainty	251
4.4.6	Summary	256
4.5	Infrastructure Asset Management under Climate Change and Deep Uncertainty	257
4.5.1	Transportation Asset Management: State-of-the-Practice.....	257
4.5.2	Climate Change Challenges to Transportation Asset Management.....	262
4.5.3	Strategies for Asset Management under Climate Change.....	266
4.5.4	Summary	272
4.6	Conclusions	273

4.6.1	Impact of Climate Change on Life-Cycle Performance of Infrastructure Systems.....	273
4.6.2	Analysis of Interdependencies and Multiple Hazards.....	274
4.6.3	Decision-Making Optimization Techniques	274
4.6.4	Implementation of Life-Cycle Management of Infrastructure Systems.....	275
	References	276
Chapter 5 Conclusions		293
	Zoubir Lounis, Michel Ghosn, Fabio Biondini, Bruce R. Ellingwood, Dan M. Frangopol, Jason P. Giovannettone, Paolo Bocchini, Ming Liu	
5.1	Synopsis	293
5.1.1	Introduction	294
5.1.2	Climate Projection Models and Data.....	294
5.1.3	Impact of Climate Change on Infrastructure Performance.....	295
5.1.4	Life-Cycle Risk-Based Decision-Making in a Changing Climate.....	299
5.2	Recommendations.....	302
	References	306
Appendix A Survey Overview and Results.....		307
	Fabio Biondini, Zoubir Lounis, Michel Ghosn	
A.1	Introduction	307
A.2	Background of Respondents.....	308
A.3	Analysis of Climatic Hazards.....	308
A.4	Structural Design and Analysis of Structural Performance	311
A.5	Life-Cycle Decision-Making	314
A.6	Concluding Remarks	318
A.7	Acknowledgments.....	320
A.8	Addendum. Survey Questions.....	321
Appendix B International Workshop Overview and Outcomes		329
	Fabio Biondini, Zoubir Lounis, Michel Ghosn, Jason Giovannettone, Bruce R. Ellingwood, Dan M. Frangopol, Teng Wu, Paolo Bocchini, Kyle Haas, Graziano Fiorillo, Georgios Tsampras, Kostas G. Papakonstantinou, Luca Capacci	
B.1	Introduction	329
B.2	Greenhouse Gas and Carbon Dioxide Emission Scenarios.....	332
B.3	Projection of Future Climatic Data and Loads	332
B.4	Downscaling Projected Climate Data	333
B.5	Modeling Uncertainties in Projected Climate Parameters	335
B.6	Impact of Climate Change on Structural Deterioration	336
B.7	Definition of Design Life or Planning Horizon	336

B.8	Consideration of Climate Change in Design Standards and Codes	338
B.9	Adaptive Design and Performance-Based Design	340
B.10	Multihazard Analysis	341
B.11	Life-Cycle Analysis	342
B.12	Risk Assessment and Mitigation	343
B.13	Insurance and Liability	344
B.14	Education	345
B.15	Collaborations Between Agencies, Professional Societies, and Code-Writing Groups	345
B.16	Mitigation of Greenhouse Gas Emissions	346
B.17	Concluding Remarks	347
	References	347
	Index.....	349
