## List of submissions

### Full papers

0356   Hammering energy requirements for surveying lunar surface with dynamic cone penetrometers and seismic methods .....	2
0412   Evaluation of grouser wheel traction performance at high-speed by single-wheel test .....	9
0906   Experimental investigation of increased bearing capacity when imparting vibration to loose ground in low atmospheric pressure.....	19
1204   Measurement and visualization of soil cutting and throwing behavior by a rotary tillage blade.....	23
1241   Study on classification of excavated soil using internal sensor data of hydraulic excavator .....	28
1525   Photogrammetry based mobility mapping for small scale model vehicle.....	36
1649   Dynamic mode decomposition for PIV-based sand flow field beneath traveling wheel .....	42
1710   A novel measurement method to aid development of soft soil tyre-terrain interaction models .....	51
1882   Spatio-temporal analysis of sand-density distribution beneath traveling wheel based on particle image velocimetry...57	
1902   The combination of exhaust gas recirculation and water injection in a modern diesel engine.....	62
1928   A novel soil stress estimation method of wheel-soil interaction using photoelasticity .....	71
2369   Experimental verification of particle behavior during crushing and mixing of deteriorated asphalt pavement layers by stabilizer.....	76
2411   Proposing turning motion of the small and lightweight push-rolling rover with minimal configuration.....	81
2651   Rapid assessment tools for estimating trafficability on low-volume roads.....	86
2812   An interaction-aware two-level robotic planning and control system for vegetation override.....	91
2919   Accurate rover mobility analysis using HILS-DRFT with real-time parameter tuning approach.....	99
3181   Assessing sensitivities of off-road pneumatic tire on clay: A finite element investigation on tire operational and design parameters.....	104
3303   Soil instrumentation for measuring normal stress distribution under off-road tire.....	111
3649   Modeling the resistive forces on vehicles in deep snow.....	118
3769   Mobility during the transition seasons in the arctic.....	124
3773   Evaluation of the multi-pass effect of an exploration rover by single wheel testing assuming lunar gravity and soil.....	129
4093   The role of tire-soil interface characteristics on performance parameters through experimental and numerical investigation.....	137
4142   Root system analysis after vibratory roller compaction in dry direct seeding of rice field.....	145
4213   DEM-based analysis and optimization of an excavation bucket drum for in-situ resource utilization .....	151
4476   Effect of initial soil color on sandy soil moisture content determination.....	158
4715   UAV-based three-dimensional rough terrain modelling .....	163
4859   Trafficability conditions for military wheeled trucks on cultivated fields.....	170
4927   Tip angle dependence for resistive force into dry granular materials at shallow cone penetration .....	177
4966   Real-time implementation of non-linear controllers and predictors for off-road vehicle dynamics on embedded systems .....	183
5295   Model-based online optimal control for vehicles in reduced gravity.....	190
5334   Enhanced open-loop control of automatic gear shifting in hydromechanical CVT for agricultural tractors .....	199
5620   Step-climbing motion acquisition of tracked robot with flippers without using environment information by reinforcement learning .....	207
5720   Suppress slip while crossing loose slopes using reverse rotation behavior of rovers with function of independent contraction/expansion mechanism .....	213
6086   Traveling analysis of wheel for lunar exploration rover based on extended terramechanics model: Examination of similarity law of gravity .....	220
6412   Traversing abilities simulation of a biomimetic robot on granular soil terrain.....	227
6422   Sinkage study in granular material for space exploration legged robot gripper.....	233
6476   Improved trafficability over soft soils using ground matting .....	240
7322   Lateral tyre characterization: rolling tyre vs static tyre testing .....	245
7453   The impact of changes in the river regime on the mobility of off-road vehicles.....	250
7603   Evaluation of off-road uninhabited ground vehicle mobility using discrete element method and scalability investigation .....	261
7829   Development of foot in balloon biped robot using buoyancy force for traveling soft ground.....	272
8084   Log detection for autonomous forwarding using auto-annotated data from a real-time virtual environment.....	276
8590   Modeling of terrain deformation by a grouser wheel for lunar rover simulator.....	283
8774   Proposal of hybrid locomotion lunar rover with crawling mechanism .....	290
8812   Energy method to compare performance of new types of sugar cane transport equipment .....	296
9028   Uncertainty quantification for wheeled locomotion machine learning predictions on soft soil.....	301
9295   Granular scaling laws for accurate prediction of wheel mobility on slopes in low-gravity environments.....	310
9663   Year-round measurements of the soil cone index on grass airfields for ground performance of airplane.....	317
9747   Application of a rockie bogie suspension for a new type of sugar cane transport system .....	323

**Abstract-only**

0178   Model to estimate the force exerted on the sphere rolling on the sandy road .....	332
0376   Improvement of formulations of Clegg impact hammer and Rammsonde penetrometer for use in compacted snow .....	332
0677   Adaptive particle refinement in terramechanical DEM simulation.....	332
0815   Using simulation to characterize RASSOR excavation in lunar environments .....	333
1499   Development of evaluation technology for tire traveling performance on soft soil of lunar surface .....	333
2520   Efficient tire-terrain interaction modelling: effect of flexibility on traction.....	333
2800   Granular flow in reduced gravity: analysis and insights from centrifuge experiments at the international space station .....	334
3071   Study on applicability of extended terramechanics model to various traveling modes of wheels .....	334
3304   Development of an unmanned exploration robot for lunar surface geotechnical investigation .....	335
4046   Study on mobility and strategy of Mars rover with faulty-driven wheel.....	335
4375   Development of a multi-legged robot capable of ground stiffness detection.....	335
4695   An image analysis method for obtaining wheel performance of rover using wheel tread traces remained on lunar simulant soil.....	336
4998   Dynamical modeling of the power hop phenomenon in an agricultural tractor with front axle suspension.....	336
6325   Proposal of a new manual for telescopic penetrometer .....	336
6865   Extended terramechanics model considering ground surface deformation and its application to wheel traveling analysis .....	337
7116   DEM-SPH analysis for interaction mechanics of tracked vehicle on wet sand.....	337
7555   Practical applications of hybrid terramechanics model using machine learning.....	337
8330   Semi-empirical terramechanics model for variable terrain height in 3D.....	338
8506   Introduction of Hourglass mission to investigate characteristics of granular materials in low gravity environment .....	338
8861   An efficient and high-fidelity track model for dynamic simulation of off-road tracked vehicles .....	339
9688   Evaluation of the dynamic sinkage and its effect on the compaction force prediction of off-road vehicles .....	339
