Content

7 E-engine

- Comparison of technologies and materials for E-Drive systems under new cooling aspects** 1
S. Guenther; C. Danzer; V. Ambrosius; IAV GmbH, Stollberg

7 Drive concept

- Valeo new high voltage Xin1 eAxle range
A modular and scalable approach from 40 kW to 300 kW** 35
E. Hamon; Valeo, Créteil, France
- New efficiency, cost, and space advantages of highly integrated xONEdrive solutions** 47
K. Wawra; hofer powertrain, Nuertingen

7 Transmission

- High Reduction Hypoids – High ratio, high speed and also high efficiency?** 53
L. Constien, A. Drechsel, J. Pellkofer, K. Stahl;
Gear Research Center (FZG), Technical University of Munich, Munich
- Gear Efficiency Optimization - Macro and Micro Geometry Design for Stepped Planetary Gear Stages** 69
C. Westphal, J. Brimmers, C. Brecher; RWTH Aachen University
- From single contact to mechatronic system – examples of series applications of planetary roller gears in automobiles** 87
S. Merz, R. Voss; Schaeffler Technologies AG & Co. KG, Herzogenaurach

7 NVH

- Merits of using harmonic current injection in electric drives to reduce torque ripple, improve NVH behavior, and more** 103
M. T. Hirsch, G. Götting; Robert Bosch GmbH, Schwieberdingen
- On the effects of electric components on gearbox noises** 117
M. Janousek, B. Schmelzle, D. Werner; AVL Deutschland GmbH, Munich

3D tolerance analysis of gear components: Optimized design of tolerance positions considering noise emission due to gear mesh	125
M. Zinner, B. Somschor, J. Reger; ARRK Engineering, Munich	

7 Simulation

Parameter Study on the Influence of Driving Cycle and Powertrain Parameterization on Fuel Consumption of wheel-hub driven Vehicles	141
T. Peichl, S. Rinderknecht; Technical University Darmstadt	
A MBSE approach for Virtual Verification & Validation of E-Drives with Digital Twins	159
R. Honcak; ZF Friedrichshafen AG, Munich	
Improving Energy & Motion Control Functions through Higher System Integration in the Software-Defined Vehicle	175
J. Meinecke; Magna Powertrain, St. Valentin, Austria	

7 Cooling/Fluids

Efficient and sustainable dielectric fluids for direct battery and e-motor cooling – Enhancing range, lifetime, and safety	185
J. Schießl-Kerbeck, M. Paris, T. Kraft; Fuchs Lubricants Germany GmbH, Mannheim	

7 Thermal management

Efficiency Improvement Potential of a BEV Gearbox using a Mono Fluid Circuit	193
Morhard, Schwarz, Pointner-Gabriel, Lohner, Stahl; Technical University of Munich, School of Engineering and Design, Department of Mechanical Engineering, Gear Research Center (FZG), Garching	
Testing, Simulation and Validation for Designing Battery Safety Materials	213
K. Woo Lee, K. Kreisköther, A. Manickaguptha; Henkel AG & Co. KGaA, Dusseldorf	
Development of efficient thermal management systems for HEVs, BEVs and FCEVs using Co-simulation on the HiL-ThermoLab testbed	219
L. Fiore, C. Beidl, E. Stenger, M. Conin, N. Weimer, Technical University Darmstadt, Institute for Internal Combustion Engines and Powertrain Systems; G. Hohenberg, IVD-Deutschland GmbH, Darmstadt	

7 Hybrid

- The next Audi 48V hybrid powertrain generation with an Integrated Electric Drive System** 235
F. Then, D. Brückel, C. Glück, S. Rudolph; Audi AG, Ingolstadt
- Design of a 48V Integrated Electric Drive System** 243
C. W. Secrest, P. Caporuscio, A. Jain, & C. Ma; BorgWarner PDS, USA
- The new STELLANTIS EDCT P2 hybrid transmission scalable for both 48V/320V Stellantis hybrid models application** 251
A. Vasseur, Stellantis France
Co-Authors: G. Boehler; Stellantis Germany; F. Dubois; Stellantis France, G. Bismans; Joint Venture Punch Powertrain PSA e-transmissions, Belgium
- Dedicated Hybrid Transmissions (DHT) in modern mobility and the future-proof hybrid strategy for multi-modes powertrains** 265
F. Rahnama, R. Mokhti, K. Looek, M. Lutz, M. Kern; hofer powertrain, Nuertingen

7 AI methods

- Thermal Digital Twin using Reduced Order Model (ROM) and Artificial Intelligence (AI) in High Voltage Power Electronics of Electric Vehicles** 283
P. Alagarsamy, C.H. Tan; Volkswagen AG, Gaimersheim
A. Avakian; Volkswagen AG, Baunatal
- Optimization of the Electric Powertrain using Machine Learning Methods** 303
M. Hermanns; M. Derksen; S. Rothe; Volkswagen AG, Baunatal
H. Hetzler; University of Kassel, Engineering Dynamics, Kassel
- Develop efficiently and save resources with engineering AI and the Robust Design method – Practical examples on NVH, inverter and battery** 317
F. Thurner; mts Consulting & Engineering GmbH, Fürstenfeldbruck
- Quality Improvement through AI-based Usage of Production and Field Data Analysis** 331
J. Saberi; Magna Powertrain, Untergruppenbach

7 Transmission 2

Driving dynamics optimization of electrically powered vehicles by means of active limited slip differentials 337
J. Haupt, C. Gillen, M. Kessler, A. Freiburg, R. Fitz;
GKN Driveline International GmbH, Lohmar

Ultra Compact Drive – future development of co-axial solution with Integrated Differential 359
T. Gyarmati, A. Paone, P. Dötschel, M. Reisch; ZF Friedrichshafen AG, Friedrichshafen

7 Sustainability

The path to a CO₂-neutral steel component proof of concept at Richard Neumayer GmbH 369
D. Neumayer, L. Doll, M. Harter; Richard Neumayer GmbH, Hausach

Carbon Footprint Minimization of Electric Powertrains by Multi-Objective Design Optimization 383
M. Hofstetter, D. Lechleitner, M. Hirz; Graz University of Technology, Austria

7 E-engine 2 / Inverter

Automated Design Optimization of Axial and Radial Flux Motors for E-powertrains 397
T. Hofman, O. Borsboom, Eindhoven University of Technology, Eindhoven

7 Drive concept 2

Customized EDU systems from micro mobility to heavy-duty applications 405
M. Stapelbroek, R. Fleuren, FEV Europe GmbH, Aachen
N. Morozov, RWTH Aachen University, Aachen

Magna's Next-Gen eDrive Portfolio 407
D. Prix; Advanced System Engineering Magna Powertrain, Lannach, Austria

The innovative cooling system of the new ID.7 electric drive 415
S. Rothe, S. Gorges, M. Hoffmann, R. Hensel; Volkswagen AG, Baunatal
P.-O. Gronwald, F. Engler; Volkswagen AG, Wolfsburg

7 Inverter 2

Non-isolated onboard charger with three-phase and single-phase operation mode and increased power density 429

M. Khani, S. Frei; G. Griepentrog; Technical University Darmstadt

**Trends for ultra compact inverters in e-drive systems –
Next generation inverter** 445

G. Müller, M. Kohr, T. Lannert; ZF Friedrichshafen AG, Friedrichshafen

Efficiency increase of electric drives by use of multilevel inverters and permanent magnet synchronous motors. 457

J. Sierts; Robert Bosch GmbH, Schwieberdingen;

J. Allgeier, F. Stamer; Robert Bosch GmbH, Renningen
