Content

7 Vehicle Guidance

- Track Planning – an implements point of view** 1
M. Roeingh, Competence Center ISOBUS e.V., Osnabrück
- Guiding principles and challenges in the context of environment perception and geofencing in the agricultural application domain** 7
A. Tauber, S. Röttgermann, LEMKEN GmbH & Co. KG, Alpen (DE);
A. Grever, Maschinenfabrik Bernard Krone GmbH & Co. KG, Spelle (DE)
- Automatic track guidance in high-standing maize crops** 15
R. Konradt, A. Scholz, Otto von Guericke University, Magdeburg;
M. Laghban, S. Schmidt, University of Applied Sciences, Merseburg

7 Standardization

- AEF – Digital Camera Systems – A new project team working on an AEF Functionality for High Speed ISOBUS** 21
N. Niebrügge, ANEDO GmbH, Eydelstedt; D. Schäfer, Motec GmbH, Hadamar
- Introducing the AEF Autonomy in Ag project** 29
A. Grever, Maschinenfabrik Bernard Krone GmbH & Co. KG, Spelle (DE);
R. Abel, Raven Industries, Sioux Falls, SD (USA)
- Integrating High-Speed Data Communication via Automotive Ethernet with a Service-Oriented Architecture Established using SOME/IP in Agricultural Machinery** 37
A. Lohmann, Maschinenfabrik Bernard KRONE GmbH & Co. KG, Spelle
- ISOBUS Migration From CAN to Ethernet – Doing it Right From the Beginning** 43
P. Fellmeth, M. Schlodder, Vector Informatik GmbH, Stuttgart

7 Innovations through AI Technologies

- Green revolution – AI for precise weed and pest control** 49
K. A. Rösler, K. Szelechowicz, University of applied science Ruhrwest, Mülheim an der Ruhr
- Accelerating the AI lifecycle with the AgriGaia-Platform Presentation of a modular platform concept used to support AI developers, based on open-source software** 63
H. Tapken, T. Wamhof, H. Graf, A. Schliebitz, L. Hesse, M. Fruhner, J. Tüpker, University of Applied Sciences Osnabrück, Osnabrück

Distributed Edge-Cloud Intelligence and AI for Large-scale Agricultural Production Systems 69

A. R. M. Wagner, P. Pickel, John Deere GmbH & Co. KG, Kaiserslautern;
A. Locatelli, TTControl GmbH, Wien

7 Data Integration in Agricultural Engineering

Facilitating seamless collaboration: Secure decentralized group management in interoperable wireless in-field communications 75

D. Steinmetzer, ITK Engineering GmbH, Rülzheim; M. Stute, ITK Engineering GmbH, Frankfurt a. M.; J. Witte, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel
T. Nothdurft, AGCO GmbH, Marktoberdorf

**Current situation and challenges of automatization standards in farm machinery and FMIS from a dealer perspective
Future development of agricultural machinery dealer business** 81

S. Wöbcke, Agrartechnik Vertrieb Sachsen GmbH, Ebersbach;
T. Herlitzius, Institute of Natural Materials Technology, TU Dresden, Dresden

Decentral and Central Technologies combined to one „DataXChange System“ 87

J. Sonnen, O. Rahner, DKE-Data GmbH & Co. KG, Osnabrück, Germany

EU Data Act: Data governance as an enabler 97

P. Altschuh, ITK Engineering GmbH, Rülzheim, Germany
S. Held, ITK Engineering GmbH, Holzkirchen, Germany

7 Energy Solutions and Ergonomics Assessment

Fuel cell electric agricultural tractor FCTRAC: operation strategy, homologation, benchmarking, and field testing 103

J. Konrad, C. Varlese, C. Junger, R. Krizan, P. Hofmann, TU Wien, IFA, Vienna;
C. Mayer, CNH Industrial Österreich GmbH, St. Valentin

Is fast charging relevant and beneficial for agricultural machinery? 113

D. Mühlgrabner, Technical Expert E/E Powertrain, AVL List GmbH, Steyr, Austria
R. Kruth, Business Field Lead, AVL Deutschland GmbH, Neuss, Germany
J. Roth, Director Business Development & Sales, AVL List GmbH, Steyr, Austria
B. Langer, Head of Product Line E-Drive, AVL Software and Functions GmbH, Regensburg, Germany

Evaluation of adaptive operating concepts on agricultural tractors in a laboratory test rig to assess cognitive and physical ergonomics	119
B.-G. Hülle, V. Ernst, J. Boysen, S. Böttinger, University of Hohenheim, Stuttgart; M. Racs, University of Stuttgart, Stuttgart	

7 Combine Harvester

Modelling two-dimensional Separation Approach for Rotor Units of Combine Harvesters	
Combining Böttingers Separation Model and Wackers Crop Flow Model to a two-dimensional Separation Model for Rotor Units	127
M. Barther, AD Process Automation, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel, Germany	

Digital Twins in Agricultural Engineering Benefits in Developing New Combine Harvester Concepts	133
B. Thy, H. Korte; Faculty of Agricultural Sciences and Landscape Architecture, University of Applied Science Osnabrück	

Study on the use of DEM for the threshing process	139
C. Korn, F. Uhlig (TU Dresden); K. Düring Jensen, A. Andersen, AGCO A/S – Innovation Center Randers	

7 Networking and Automation

Radio technologies for infrastructureless M2M communication for Ag applications around the world	147
H. Keränen, Satel Oy, Salo, Finland; J. Witte, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel, Germany; T. Nothdurft, AGCO GmbH, Marktoberdorf, Germany; J. Olague, PCTEL Inc., Bloomington, USA; K. Lautenschlaeger, AGCO GmbH, Marktoberdorf, Germany	

Field Trials and Evaluation Methods for Sensors used in Perception Systems for Autonomous Machinery with Respect to SOTIF	159
J. C. Krause, N. Iqbal, M. Niemeyer, J. Hertzberg, DFKI GmbH; S. Röttgermann, A. Tauber, LEMKEN GmbH & Co. KG; J. Herbers, S. Menke, Maschinenfabrik Bernard Krone GmbH & Co. KG; L. Plagge, B. Thy, H. Hollmeier, S. Stiene, Hochschule Osnabrück	

Operation and investigation of adaptive mesh networks to increase the connectivity of agricultural machinery	169
J. Hagert, T. Földner, B. Striller, T. Herlitzius, Institute of Natural Materials Technology, Chair of Agricultural Systems and Technology, Technische Universität Dresden A. Hecker, B. Turkowski, G. Fettweis, Vodafone Chair Mobile Communications Systems, Technische Universität Dresden; J. Schwardt, Meshmerize GmbH, Dresden	

7 Process Automation

SpeediFlow – Non-invasive Measurement of Air Speed and Direction A robust Sensor for Particle-Laden Flows	179
A. Günther, F. Uhlig, C. Korn, Technische Universität Dresden, Germany; S. Müller, P. Mitlöhner, K. Kränzel, miunske solution GmbH, Großpostwitz, Germany	

Field evaluation insights of a novel optical sorting approach suitable for mobile operation on a potato harvester	187
M. Brinkmann, J. Roß, W. Strothmann, T.-F. Minßen, GRIMME Landmaschinenfabrik GmbH & Co. KG, Damme, Germany	

Tillage Quality Measurement: Surface Roughness Analysis using Height Profiles	195
M. Graf, AGCO GmbH, Marktoberdorf; M. Geimer, Karlsruhe Institute of Technology, Karlsruhe	

7 Parameter Measurement in Farming

Fusing SAR and Weather with Physics-Inspired ML for Improved Soil Moisture Estimation	205
T. Das, John Deere GmbH & CO. KG JDWM, Germany B. Rodriguez, B. Mathai, J. Just, John Deere ISG – Urbandale, USA	

Systematic Data Selection for Enhanced Nutrient Prediction and Monitoring in Manure Using NIR	215
L. Friedrich, K.-L. Krieger, University of Bremen – ITEM, Bremen, Germany; J. van den Broek, LUFA Nord-West, Hameln, Germany	

Detection of Rumex spp. in Grassland using Multispectral Images and Deep Learning	223
J. Heil, A. Stein, Artificial Intelligence in Agricultural Engineering, University of Hohenheim, Stuttgart	

Long term validation for app based chop quality estimation for silage maize	229
S. Belau, D. Neitemeier, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel; H. Korte, H. Westendarp, Hochschule Osnabrück, Osnabrück; Y. Ehlert, J. Amsbeck, CLAAS KGaA mbH, Harsewinkel	

7 Digital Innovation

Unpacking the opportunities and limitations of data spaces in agriculture	235
R. Matar, P. Neuschwander, R. Falcão, E. Calvet, Fraunhofer Institute for Experimental Software Engineering IESE, Kaiserslautern, Germany	
Potential of agricultural machinery data for the evaluation of travel times	243
L. Lange, H. J. Meyer, Technische Universität Berlin, Berlin	
Training neural networks for tramline detection in an autonomous driving tractor using synthetic images	249
S. Schulpius, AGCO GmbH, Wolfenbüttel; J. Schattenberg, L. Frerichs, Technische Universität Braunschweig, Braunschweig	

7 Cultivation

CF-Plough – An innovative solution for climate protection, soil fertility and yield security	255
F. Fröming, LEMKEN GmbH & Co. KG, Alpen; M. Gerriets, Leibniz-Centre for Agricultural Landscape Research (ZALF), Müncheberg	
Potential for increasing the efficiency of active soil tillage in crops, which are cultivated in ridges	263
K. Dernjac, A. Lange gen. Detert, GRIMME Landmaschinenfabrik GmbH & Co KG, Damme (Germany)	
A new approach of in-row-weeding sugar beets – using high pressure water jets and GNSS-locations of the crops	269
D. Mayer, A. Baumann, T. Eberhard, A. Stoll, Hochschule für Wirtschaft und Umwelt, Nürtingen	

7 Innovative Technologies

- V-Model Approach for Developing Safe Environment Perception Systems for Autonomous Machinery** 275
M. Komesker, C. Meltebrink, University of Applied Science Osnabrück;
S. Ebenhöch, SICK AG, Waldkirch; S. Stiene, University of Applied Science Osnabrück
- Precise trunk localization using the example of in-row weeding in vineyards** 283
T. Blume, AGCO GmbH, S. Flöser, M. Rasumak, ITK Engineering GmbH
- Field Path Detection for Tractors Based on Acceleration Measurements and Multibody System Simulations** 289
W. Fuchs, G. Jedinger-Pauschenwein, AVL List GmbH, Tech Center Steyr, Austria
- Implementation of a real-time plant detector for a selective grassland weeding machine using high-pressure water jets** 297
I.-L. Haußmann, G. Lohrmann, A. Stoll, Hochschule für Wirtschaft und Umwelt Nürtingen-Geislingen; L. Petrich, V. Schmidt, Institut für Stochastik, Universität Ulm

7 Sustainable Energy and Irrigation Systems

- Production and utilization of methane from cowshed gas on farms** 303
F. von Arnim, C. Gerdes, M. Geimer, KIT Karlsruhe
- Draft force evaluation of a deep ploughing technology for the installation of geothermal collectors under arable land** 311
J. Münch, B. Burkert, T. Herlitzius, Technische Universität Dresden
- Holistic concept of technical solutions for subsurface drip irrigation of major crops in humid central European growing conditions** 317
W. Strothmann, C. Scholz, SLS Systementwicklungen GmbH, Osnabrück

7 Assistant and Safety Concepts

- Integration of a safety concept for an autonomous agricultural machine** 323
T. Schulte, KRONE Agriculture SE, Spelle; J. Roelse, LEMKEN GmbH & Co. KG, Alpen
- Low-Cost, Rapid Development of Object Detectors for Automation of Agriculture**
Knowledge Distillation of GroundingDINO is Strong Pretraining 333
F. C. Eichhorn, L. Schönland, John Deere, Kaiserslautern;
D. Görges, RPTU Kaiserslautern-Landau, Kaiserslautern

**Applicable Safety Tests for Automated Agricultural Machinery and Robots
Operational Design Domains and Dynamic Driving Tasks as Key to
Functional Safety** 341

J. Schöning, N. Kruse, M. Komesker, D. Barrelmeyer, St. Stiene,
Osnabrück University of Applied Sciences

**TIM-Ready Trailer for Harvest Operations
ISOBUS-ready Trailer for Harvest-Automation and -Documentation** 347

M.-A. Favier, T. Burgers, Y. Challe, RPTU, Digital Farming working group

7 Sensor Technologies

**Radar and ultrasonic systems from Bosch Engineering for
automated agricultural machinery** 353

C. Marbach, Bosch Engineering, Abstatt

**Sensor breakthrough? Detection of invisible damages on potatoes
before blackspot develops shown for multiple maturity stages and
varieties using a tactile sensing technique** 363

J. Langfermann, W. Strothmann, J. Westerhoff, GRIMME Landmaschinenfabrik
GmbH & Co. KG, Damme;

C. Scholz, Hochschule Osnabrück, Labor für Mikro- & Optoelektronik, Osnabrück

**Development of a supplement to a test standard for evaluating the
guidance accuracy and working quality of sensor-based technologies
for weed control by use of AI** 369

P. Steinhausen, O. Schmittmann, Institute of Agricultural Engineering University
of Bonn, Germany
