Volume 13237

Proceedings of SPIE 0277-786X, V. 13237

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Design and Testing XIV*, edited by Yongtian Wang, Tina E. Kidger, Rengmao Wu, Proc. of SPIE 13237, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii Symposium Committees
- xi Conference Committee

OPENING CEREMONY AND PLENARY SESSION

- 13237 03 **Inflatable 14-m off-axis far-IR space telescope design (Plenary Paper)** [13237-502]

ADVANCED IMAGING TECHNIQUES I

- 13237 04 **Twin-image free in-line Fresnel incoherent digital holography and in-line Fresnel incoherent color digital holography (Invited Paper)** [13237-1]
- 13237 06 **Waveguide AR system optimization with 2D surface relief grating** [13237-3]
- 13237 07 **Anisotropic guided mode resonances in ultrathin high-index WS₂ metasurfaces for enhanced optical birefringence** [13237-4]
- 13237 08 **Research on multi-channel scenario projector and its application in testing of license plate recognition cameras** [13237-5]

FABRICATION AND TESTING

- 13237 0A **Polarization multiplexing techniques in optical testing (Invited Paper)** [13237-7]

OPTICAL SYSTEMS DESIGN I

- 13237 0C **Design of cascaded diffractive optical elements operating at several wavelengths for generating color images and solving classification problems (Invited Paper)** [13237-10]
- 13237 0E **Modeling a freeform mirror surface for AR system using geometric ray-mapping method** [13237-26]
- 13237 0F **Unidirectional light transmission at telecom wavelengths by polarization-independent diffractive optical element incorporating dual photonic crystal slabs** [13237-12]

OPTICAL SYSTEMS DESIGN II

- 13237 0G **Variable-curvature-mirror-based optical zooming used for space-borne targets monitoring: review and progress (Invited Paper)** [13237-14]

13237 OI **Constructing a metric for the selection of a starting optical design** [13237-16]

ADVANCED IMAGING TECHNIQUES II

13237 OK **Single-pixel imaging using deep learning, FPGA, and non-negative matrix factorization (Invited Paper)** [13237-19]

13237 OM **Investigation and design of car panoramic system based on dual-band** [13237-21]

13237 ON **Design and performance evaluation of a large-aperture variable-focus lens with a liquid-membrane-liquid structure** [13237-22]

13237 OO **Minimalist optical system image restoration based on deep attention Wiener network** [13237-23]

FREEFORM OPTICS

13237 OP **Inverse methods for freeform optical design (Invited Paper)** [13237-24]

13237 OQ **Differentiable freeform lens design for irradiance tailoring on tilted target plane** [13237-25]

13237 OS **Initial design with conic mirrors for four-mirror freeform imaging systems** [13237-27]

POSTER SESSION

13237 OU **Combination of phase and amplitude diffractive structures in computer-generated holograms for aspheric optical testing** [13237-9]

13237 OV **Design and analysis of a fast aperture LWIR continuous zoom optical system** [13237-18]

13237 OW **Research progress on ultra-precision measurement technology based on line chromatic confocal sensors at micro-nano scale** [13237-29]

13237 OX **First experimental demonstration of highly scalable and reconfigurable optical convolution computing based on wavelength routing** [13237-30]

13237 OY **Generating freeform surface polynomial for beam shaping by adaptive weighted particle swarm optimization** [13237-31]

13237 OZ **Design of dual-channel common optical path dispersive objective lens** [13237-32]

13237 IO **Off-axis mirror system design with a dual-level self-updating surface description** [13237-33]

- 13237 12 **Design and research of high-order mode generation based on asymmetric dual-core optical fiber** [13237-35]
- 13237 13 **Dual-object-distance imager design enabled by polarization-sensitive flat phase elements** [13237-36]
- 13237 14 **Method of design and optimization process of variable curvature mirror with variable thickness distribution** [13237-37]
- 13237 15 **End-to-end infrared imaging system design with diffractive optical element** [13237-38]
- 13237 16 **Group design for the initial structure of an extreme ultraviolet lithography projection system** [13237-39]
- 13237 17 **Array-patterned micro-structures in spectacle lens for myopia control via image blurry** [13237-40]
- 13237 19 **A fast broadband phase retrieval model based on Zernike coefficient matrix** [13237-42]
- 13237 1B **Using multi-wavelength phase diversity to improve the detection range of piston in multi-aperture** [13237-44]
- 13237 1C **Noise model and suppression algorithm for high-precision wavefront detection** [13237-45]
- 13237 1E **A multi-directional backlight system** [13237-47]
- 13237 1F **Improved Ronchi lateral-shearing interferometry based on sinusoidal amplitude grating** [13237-48]
- 13237 1G **Simulation and analysis of multilayer film for EUV lithography** [13237-49]
- 13237 1H **Designing free-form optics for high-quality Gaussian beam tailoring from diode lasers for Ti:Sa laser pumping** [13237-50]
- 13237 1J **Study on calibration method of EMCCD readout noise at high gain** [13237-52]
- 13237 1K **Matching design of separated vision measurement system between receiving system and transmitting system based on cooperative target** [13237-53]
- 13237 1L **Research on optimization method of scanner measurement based on cluster analysis** [13237-54]
- 13237 1M **High-precision laser centroid extraction algorithm for slight positional variations using four-quadrant detectors** [13237-55]
- 13237 1N **Effect of protective layer thickness on sub-10 femtosecond laser damage of metal mirror** [13237-56]

- 13237 1O **Broadband stable depolarizing beam splitter with high splitting ratio in 780-nm band**
[13237-57]
- 13237 1P **Accurate image plane tilt correction using the bidirectional rotational symmetry correction (BRSC) method** [13237-58]
- 13237 1Q **Design of compact augmented reality near-eye display using freeform holographic optical element** [13237-59]
- 13237 1R **Optimized LCD local dimming algorithm with multi partitions** [13237-60]
