Volume 13263

Proceedings of SPIE 0277-786X, V. 13263

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Land Surface and Cryosphere Remote Sensing V*, edited by Jing M. Chen, Cheinway Hwang, Proc. of SPIE 13263, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Symposium Committee*
vii *Conference Committee*

INNOVATIONS IN URBAN AND ENVIRONMENTAL REMOTE SENSING

13263 06 **Exploring red-edge spectral indices for mangrove canopy height mapping using random forest regression with Sentinel-2 and spaceborne GEDI LiDAR data** [13263-5]

ADVANCES IN CLIMATE RESEARCH AND ENVIRONMENTAL APPLICATIONS I

13263 08 **Measuring surface subsidence in Taipei, Taiwan with Sentinel-1 data using PS-InSAR** [13263-10]

13263 09 **Multiclass certainty mapped network for high-precision segmentation of high-altitude imagery** [13263-11]

ADVANCES IN CLIMATE RESEARCH AND ENVIRONMENTAL APPLICATIONS II

13263 0G **Assessing heat vulnerability in Ho Chi Minh City: insights from local climate zones and the heat vulnerability index model** [13263-23]

POSTER SESSION

13263 0L **Improving self-supervised segmentation of urban scenes using NDSM-enhanced CRF** [13263-24]

13263 0M **Using Sentinel-2 SWIR to remove forest fire smoke** [13263-25]

13263 0N **Rapid flood monitoring based on Otsu threshold and damage assessment using multisatellite data** [13263-26]

13263 0O **Characteristics of the texture index of damaged buildings using high-resolution satellite images due to the 2024 Noto Peninsula Earthquake** [13263-28]

13263 0Q **Applying precise point positioning method and multiple sensors to monitor the land subsidence in Taiwan (Invited Paper)** [13263-30]

13263 0T **Enhancing automated classification for efficient ground cover analysis with UAV imagery and machine learning in civil construction projects** [13263-33]

13263 0U **Using multitemporal and multiscale satellite imagery for disaster response: case studies in Sentinel Asia and TASA** [13263-34]
