Volume 13265

Proceedings of SPIE 0277-786X, V. 13265

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Lidar and Optical Remote Sensing for Environmental Monitoring XVII*, edited by Upendra N. Singh, Nobuo Sugimoto, Li-Hsueh Chang, Tee-Ann Teo, Proc. of SPIE 13265, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Symposium Committees*

vii *Conference Committee*

LIDAR MEASUREMENT AND ANALYSIS I

- 13265 02 **Sensitivity optimization of low coherence Doppler Lidar for wind measurement** [13265-1]
- 13265 03 **Investigation of the impact of complex terrain on the structure of planetary boundary layer by vehicle-based wind Lidar** [13265-2]
- 13265 04 **An investigation for the deep-learning-based determination of convective boundary layer basing on coherent Doppler wind Lidar** [13265-3]
- 13265 05 **Optical characteristics of 265nm LED mini-Lidar** [13265-4]

LIDAR MEASUREMENT AND ANALYSIS II

- 13265 07 **Measurement of nitrogen leakage by Raman Lidar for observation inside the Fukushima No.1 reactor building** [13265-6]
- 13265 08 **Water/water vapor monitoring using compact Raman Lidar for radiation detection** [13265-7]

SPACE LIDAR AND RELATED STUDIES I

- 13265 0A **Feasibility study of space-based Doppler wind Lidar for global wind profiling** [13265-9]
- 13265 0B **Initiation of the manufacturing design process for MOLI project** [13265-10]
- 13265 0D **Differential absorption Lidar for searching water sources on Mars** [13265-12]

SPACE LIDAR AND RELATED STUDIES II

- 13265 0F **Algorithms to retrieve particle optical properties using the space Lidar ATLID onboard EarthCARE** [13265-14]
- 13265 0G **Validation of EarthCARE ATLID using the ground-based Lidar network AD-Net** [13265-15]

13265 OH **Understanding remote-sensing data and corresponding application by using immersive educational platform with virtual reality** [13265-16]

13265 OI **Particle flow analysis by using the LED mini-Lidar for Mars rover** [13265-17]

POSTER SESSION

13265 OJ **Short-range atmosphere measurements under adverse weather conditions by using 265-nm LED mini-Lidar** [13265-18]

13265 OK **Visualization and quantitative evaluation of fog and smoke activity by using LD mini-Lidar** [13265-19]

13265 OM **Evaluation of a superconducting nanostrip single-photon detector for 2 μm H₂O-DIAL application** [13265-21]
