

PROCEEDINGS OF SPIE

# ***International Conference on Physics, Photonics, and Optical Engineering (ICPPOE 2024)***

**Yingkai Liu**  
*Editor*

**8–10 November 2024**  
**Singapore**

*Organized by*  
Yunnan Normal University (China)

*Published by*  
SPIE

**Volume 13552**

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13552

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Physics, Photonics, and Optical Engineering (ICPPOE 2024)*, edited by Yingkai Liu, Proc. of SPIE 13552, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

xi *Conference Committee*

## Part One

### APPLIED PHYSICS

---

- 13552 02 **Partial discharge characteristics of three different epoxy resin potting microdefects**  
[13552-36]
- 13552 03 **Multimodal health data fusion and analysis based on digital twins** [13552-81]
- 13552 04 **Study on using digital twin technology for monitoring patients remotely** [13552-87]
- 13552 05 **Effect of different temperature gradient distributions on the variation of dielectric spectrum in superconducting cables** [13552-59]
- 13552 06 **Risk warning method for SF<sub>6</sub>/N<sub>2</sub> insulated GIS in low-temperature environments** [13552-61]
- 13552 07 **Visualization of glass insulator surface fouling wetness based on reflectance spectroscopy**  
[13552-52]
- 13552 08 **Measurement of sound velocity and its application in engineering** [13552-131]
- 13552 09 **Interaction optimization strategy of intelligent robots in social media marketing** [13552-125]
- 13552 0A **Research on application of transient electromagnetic method in urban underground pipeline survey** [13552-129]
- 13552 0B **Analysis of data characteristics of multi-cluster fracturing in horizontal wells of tight gas reservoirs** [13552-134]
- 13552 0C **Targeting the one-dimensional harmonic oscillators: exact solutions, approximant approaches, and applications** [13552-56]
- 13552 0D **Experimental and theoretical study on the mechanism of dust-prevention regulation of composite coatings on the surface of high-voltage insulators** [13552-76]
- 13552 0E **An optimal 4-bit absolute-value detector with low energy consumptions and delays**  
[13552-80]
- 13552 0F **Computational fluid dynamics in aerodynamics: a comparative analysis of supersonic and subsonic flow models** [13552-98]

## ELECTRICAL ENGINEERING

---

- 13552 0G **An extended design of sliding mode disturbance observer for PMSM** [13552-63]
- 13552 0H **Predicting voltage fluctuation of photovoltaic generation system by deep learning and its control method** [13552-100]
- 13552 0I **Research on key technologies of power substation inspection based on large model** [13552-48]
- 13552 0J **Application and optimization of networked battery maintenance mode in power system** [13552-103]
- 13552 0K **Research on application of intelligent sensor in condition monitoring of ring network cabinet** [13552-105]
- 13552 0L **Design and implementation of intelligent operation and maintenance system in edge computing environment** [13552-83]
- 13552 0M **Optimization of power system network topology reconstruction algorithm based on edge computing** [13552-84]
- 13552 0N **Edge computing and big data analysis integration framework in smart grid edge gateway** [13552-86]
- 13552 0O **Exploration of evaluation method for power material suppliers based on large language model** [13552-119]
- 13552 0P **Innovative application of power electronics technology in smart grid and its optimization strategy** [13552-108]
- 13552 0Q **A approaching law sliding mode controller for PMSM vector control way** [13552-64]
- 13552 0R **Research on automatic collection method of electrical quantity data in AC power system of smart substation** [13552-31]
- 13552 0S **Automatic electrical fault detection method for power supply and distribution based on fuzzy C-mean** [13552-32]
- 13552 0T **The application of digitalization and decentralization in modern power systems** [13552-136]
- 13552 0U **Electric power material supply demand prediction based on multi-data fusion** [13552-120]
- 13552 0V **Inference method for power large-scale model operation based on distributed computing resource scheduling** [13552-29]
- 13552 0W **Research on regenerative braking strategy for pure electric vehicles based on deep reinforcement learning algorithms** [13552-51]

- 13552 0X **An intelligent control framework based on adaptive PID and reinforcement learning** [13552-39]
- 13552 0Y **Electric energy price prediction based on EMD-PSO-LSTM improved algorithms** [13552-43]
- 13552 0Z **Battery life prediction based on LSTM segmented iteration** [13552-38]
- 13552 10 **Analysis of the influence of grid arrangement and permanent magnet position on DC arc** [13552-41]
- 13552 11 **Sensorless control of BLDC motors based on Luenberger observer** [13552-45]
- 13552 12 **Rolling bearing fault diagnosis based on optimized VMD and CNN-BiLSTM** [13552-46]
- 13552 13 **Research on fault diagnosis of electrical equipment based on large model** [13552-114]
- 13552 14 **Development and integration of intelligent auxiliary emergency disposal software for power grid faults** [13552-112]
- 13552 15 **Application of electric drones and deep learning technology in transmission system operation and maintenance** [13552-88]
- 13552 16 **A fuzzy-control-based sensorless vector control strategy for permanent magnet synchronous motors** [13552-127]
- 13552 17 **Research on numerical simulation and optimization algorithm of electromagnetic wave propagation** [13552-128]
- 13552 18 **Research on fault detection method of aerial sensor based on neural network** [13552-16]
- 13552 19 **Application of big data analysis in improving the efficiency of sensor reliability testing** [13552-4]
- 13552 1A **A method for determining the abnormal state of current transformer accuracy based on statistical relative eigenvalue** [13552-11]
- 13552 1B **Application of CNN in condition monitoring of high-voltage switchgear** [13552-13]
- 13552 1C **Application of big data technology in optimizing emergency response to power grid disasters** [13552-14]
- 13552 1D **State monitoring and fault prediction of power grid equipment are carried out by using deep learning technology** [13552-15]
- 13552 1E **Online monitoring and early warning of arc grounding fault overvoltage in 10kV distribution system based on Internet of Things technology** [13552-20]

- 13552 1F **Research on fault prediction and diagnosis system of high-voltage switchgear based on supervised learning algorithm** [13552-22]
- 13552 1G **Deep learning method for precise fault location of multi-branch hybrid transmission lines** [13552-19]
- 13552 1H **Research and application of transmission line fault location using k-nearest neighbor algorithm** [13552-23]
- 13552 1I **Optimal scheduling method of medium-low voltage AC-DC hybrid distribution network based on parallel ADMM algorithm** [13552-5]
- 13552 1J **Research on the application of deep learning technology in power load forecasting and scheduling optimization** [13552-8]
- 13552 1K **Improved 4-bit absolute value detection circuit with energy optimization** [13552-71]
- 13552 1L **Construction of artificial neural network-driven ship electrical system fault prediction model** [13552-99]
- 13552 1M **Application and analysis of bass diffusion model in power supply forecasting** [13552-118]
- 13552 1N **Evaluation model for mill load based on PSO-SVM algorithm** [13552-97]

---

#### IMAGE PROCESSING

- 13552 1O **Research on key technologies of intelligent vision system of industrial robot** [13552-70]
- 13552 1P **Research on the auxiliary decision method for safety risk management and control of electric power field operations based on multimodal causal knowledge graph** [13552-25]
- 13552 1Q **Optimization of character animation design and motion synthesis in film and television media based on virtual technology** [13552-27]

#### Part Two

- 13552 1R **The fusion strategy of multimodal learning in image and text recognition** [13552-101]
- 13552 1S **An approach to pulmonary nodule detection based on U-Net and 3D-CNN** [13552-121]
- 13552 1T **Application of electric power image recognition technology in power line state assessment** [13552-107]
- 13552 1U **Research on low-illumination image feature extraction algorithm based on improved SuperPoint convolutional neural network** [13552-1]

- 13552 1V **Research on vehicle detection algorithm based on drone image** [13552-30]
- 13552 1W **Algorithms of component recognition and condition assessment in power inspection image** [13552-111]
- 13552 1X **A K-means algorithm For metabolic image analysis of Crohn's disease** [13552-12]
- 13552 1Y **Research on the application of key technologies of intelligent vision systems for industrial robots in object inspection** [13552-53]
- 13552 1Z **Research on design of image processing and recognition based on deep learning** [13552-57]
- 13552 20 **Research on vision-based autonomous precise landing of unmanned aerial vehicles and adaptive inspection software for UAVs** [13552-138]
- 13552 21 **Research on UAV image recognition and fault classification for intelligent power inspection system using deep learning** [13552-94]
- 13552 22 **Research on large matrix transpose based on multi core DSP in real time SAR imaging** [13552-135]
- 13552 23 **Application of visual recognition technology in machine learning-driven waste sorting** [13552-133]
- 13552 24 **Research on surface defect detection technology of power equipment based on image processing** [13552-17]
- 13552 25 **Real-time processing and analysis of truck blind spot images based on computer vision** [13552-2]
- 13552 26 **Research on environment perception and scene recognition based on computer vision in wearable intelligent devices** [13552-3]
- 13552 27 **Bilingual physical education curriculum supported by computer vision and motion analysis algorithms** [13552-7]
- 13552 28 **Application of computer vision technology in interactive teaching tools** [13552-6]
- 13552 29 **Research on accurate recognition and cutting algorithm of tree-head pruning robot for overhead transmission lines based on computer vision technology** [13552-24]
- 13552 2A **Sse-ppl: a machine vision technology to detect aquatic product quality** [13552-9]
- 13552 2B **Motion capture data analysis based on neural network** [13552-10]
- 13552 2C **Research on real-time image processing system combining convolutional neural network and edge computing** [13552-44]

- 13552 2D **Occluded person re-identification based on foreground segmentation and multi-scale feature fusion** [13552-79]
- 13552 2E **A void area identification method for georadar tunnel lining inspection images based on grayscale distribution** [13552-73]
- 13552 2F **3D pose recognition method for rehabilitation training based on the fusion of CBAS-HRNET and stereo vision** [13552-78]
- 13552 2G **Automatically learns task-specific features for high-performance image classification** [13552-93]
- 13552 2H **Applications of deep learning in medical image segmentation: an evaluation of U-Net architecture and its enhancements** [13552-137]
- 13552 2I **MedVQA-APL: enhancing medical visual question answering with assistance prompt learning** [13552-85]
- 13552 2J **Research on image detection methods based on YOLO algorithm and deep learning** [13552-68]

---

#### OPTICAL ENGINEERING

- 13552 2K **Research on perception and control technology of construction robots in the context of human-robot collaboration** [13552-115]
- 13552 2L **GIS data standardization and algorithm optimization for intelligent drainage network monitoring** [13552-130]
- 13552 2M **Preliminary study on cloud-based remote sensing intelligent detection of disaster damage** [13552-69]

---

#### OPTOELECTRONICS

- 13552 2N **Construction and application of high-order tensor network models for large-scale electric power grids** [13552-26]
- 13552 2O **Research on the exterior design of residential energy storage products based on photovoltaic energy storage technology** [13552-55]
- 13552 2P **Design and optimization of test platform for QSFP-DD optical module** [13552-49]
- 13552 2Q **5G real-time data synchronization and safety monitoring for live operation of distribution lines** [13552-102]
- 13552 2R **Design of solar blind corona arc monitoring device and development of online monitoring system** [13552-104]

- 13552 2S **Research on seismic response and optimal design method of inertial damper-isolated liquid tank based on ABAQUS simulation** [13552-106]
- 13552 2T **Resource allocation and task scheduling for computing power aware networks** [13552-109]
- 13552 2U **Application and research of deep learning algorithms in the core technology of photovoltaic inverter diagnosis** [13552-54]
- 13552 2V **Research on stability control of deep learning algorithms in soft fault diagnosis technology for photovoltaic inverters** [13552-66]
- 13552 2W **Research on zero-sequence component method for cable fault location detection** [13552-58]
- 13552 2X **Processing method of unstructured power material data based on edge computing framework** [13552-110]
- 13552 2Y **LN-SLAM: deep learning-based underground low-light loop closure SLAM** [13552-95]
- 13552 2Z **Application of AGV (automated guided vehicle) in intelligent storage for electric power metering** [13552-117]
- 13552 30 **Design of GIS insulation structure equivalent electric field model for partial discharge simulation** [13552-126]
- 13552 31 **Design of control system for automated semiconductor etching equipment** [13552-77]
- 13552 32 **Extended Kalman and center difference Kalman comparative analysis** [13552-40]
- 13552 33 **Short-term wind power prediction of nuclear extreme learning machine based on improved northern goshawk optimization algorithm** [13552-42]
- 13552 34 **Intelligent identification and analysis system for construction robots based on deep learning** [13552-122]
- 13552 35 **The optimization design of optical performance for a tower solar heliostat field using an adaptive gravitational search algorithm** [13552-132]
- 13552 36 **Optimization of wind power generation prediction model based on machine learning** [13552-18]
- 13552 37 **Simulation implementation of erbium-doped fiber laser in the 1550–1600nm band** [13552-96]
- 13552 38 **Research on autonomous navigation and obstacle avoidance algorithms for robotic vacuum cleaners by fusing LiDAR and visual information** [13552-92]
- 13552 39 **Research on structure design and path planning of a photovoltaic panel cleaning robot** [13552-90]

- 13552 3A **Verilog HDL-based implementation of UART design** [13552-62]
- 13552 3B **Construction and practice of virtual simulation experiment teaching for maintenance and upkeep of optical measurement equipment** [13552-67]
- 13552 3C **Research on mitigation strategies for multi-unit nuclear power plants under extreme conditions of long-term loss of external power supply** [13552-72]
- 13552 3D **Research on magnetic cleanliness control technology in the assembly process of satellite optical platform** [13552-113]
- 13552 3E **Implementation and precision analysis of servo control software of satellite communication mobile ground station based on SGP4/SDP4 model** [13552-123]
- 13552 3F **Synchronized sampling algorithm for differential protection based on power line impedance estimation** [13552-140]
- 13552 3G **Prediction of EDM process effect based on GA-BP neural network** [13552-139]
